Mitsubishi Graphic Operation Terminal  
GOT1000 Series

**Tailored solutions to meet your HMI and  
visualization needs**

GRAPHIC OPERATION TERMINAL

**GOT1000**

Compatible with  
Windows® 7

## CONTENTS

LINE-UP 4

CASE STUDY 1 6

Have you ever needed an HMI to do more than provide pretty panel meters? The GOT1000 does more than just visualization, it provides solutions for both the everyday, and not so everyday problem.

CASE STUDY 2 10

Solutions for your FA Device: Innovative solutions for improving uptime, work efficiency and productivity using the GOT1000 and your FA equipment.

# The GOT1000 delivers the competitive advantage:

The speed of your business and the speed of your machine hinges on many forces outside of your control.

The GOT1000 brings them back under control with speed, performance and industry leading functions that are tailored for visualization - real life solutions for your real time process.

Whether your focus is centered on uptime, productivity or serviceability there is a GOT solution that fits your machine, factory and enterprise level requirements.

GOTs evolve the face of control.

GRAPHIC OPERATION TERMINAL  
**GOT1000**

## The GOT1000 series offers six classes of terminals to fit any system or budget requirement.

**High performance models with multimedia and a host of features and functions including embedded communications**

# GT16

\*: The GT16□□-VNBD□, GT1655-VTBD, GT1665HS-VTBD, GT145□, GT12□□-VNBD□ and GT1030 high contrast products (GT1030-H□□□□) are not supported by the screen design software GT Works2/GT Designer2.

# GOT Solutions

Quick response to Comprehensive problems. Easy facility design with the GOT1000 series. solutions to production site problems.

CASE 1

Facility uptime is increased by reducing unexpected errors on the floor.

**Before**

Alarm light is on  
Error!

What's wrong with it?  
How do I deal with the problem?  
What is the cause?

**GOT Solution**

**One-Touch Ladder Jump function**

The one touch function reduces equipment downtime by quickly checking equipment operation, machine status and logic with a single button.

For details, see [P.44](#)

When an error is detected, touch switch operations can search for and display the cause of the problem.

<Error occurred in ST2 device!>

Touch the switch to find how Y10 is set

When errors occur, touch the Search switch to automatically start up the Ladder Monitor Screen.

Touch normally open contact (M20) in on state. (Coil search function)

Touch

ST1 (Normal) ST2 (Error)  
Error indicator light: Y10

No need to go back to my desk to get my PC or check ladder programs!

<Display ladder blocks including Y10>

ST1 error M10 Y10 Error indicator light: ON

<Display ladder blocks including M20>

Pusher LS error M31 Air pressure error M32 Oil pressure error M33

ST2 error Error is detected because oil pressure (M33) is on.

CASE 2

Equipment availability is greatly improved when GOTs are used to quickly edit PLC programs.

**Before**

Sensor malfunction!  
Part not being read by sensor

Check it with the ladder monitor function.

Sensor X10 M20

The device number is wrong.

Need to fix it now.  
I need a PC...

**GOT Solution**

**Ladder Editor function**

It takes only a few touches to make minor ladder program corrections. It is easy and fast.

For details, see [P.45](#)

Repair is made easy and quick without a PC!

Correct

Change the device number from X10 to X20.

CASE 3

Downtime is shortened when debugging can be performed locally or over decentralized systems.

**Before**

2F Electrical Room Control panel

It's difficult to perform debugging without watching the machine in operation.

1F Equipment Floor

I'm not sure how the program is changed and if it's operating correctly.

**GOT Solution**

**FA Transparent function**

Use GOT to connect the PLC and PC. You can check the equipment and debug programs at the same time.

For details, see [P.39](#)

2F Electrical Room Control panel

1F Equipment Floor

PLC debugging can be performed from a PC connected to the GOT!

Touch panel operation is enabled even when a PC is connected. Both the GOT and PLC can be debugged in one single, efficient operation!

CASE 4

Production efficiency is maintained when the GOT is used to manage product changeovers and maintenance recovery plans.

**Before**

Warehouse Office

I need to go to the warehouse to get another PLC!

I also need to go to the office to get a PC.

PLC failed!  
No battery!

**GOT Solution**

**Backup/Restoration function**

No need for a PC on the production floor - simply use the GOT to manage (Read/Write) and store PLC programs.

For details, see [P.42](#)

Speedy restoration! No need for a PC or locating the program.

Change CPU

Restore

It is OK, because the latest program was stored in the GOT.

# GOT Solutions

CASE 5

**Operator efficiency is improved when manuals and work instructions can be accessed directly from the display.**

**Before**

**GOT Solution**

**Document Display function/ Video Manual Playback**

You can save necessary documents such as manuals in a memory card on the GOT.  
For details, see [P.32](#) [P.33](#)

Work instructions are easy to access and written in a language that I can understand.

With the Document Display function, it's easy to read the manual by changing and scrolling through pages.

Directly assign documents and image files to touch switches.

The manual describes how to deal with the error displayed.

<Document display>    <Video manual playback>

CASE 6

**Production quality can be increased when using the GOT to capture and play back real time videos and images.**

**Before**

**GOT Solution**

**Multimedia function**

Check the recorded view of the production line. You can find problem causes quickly.  
For details, see [P.32](#)

I can use the GOT to capture the cause of this problem.

Attach a video camera on GOT. The view of the production line is recorded before and after the occurrence of a problem.

Play it on the GOT. High-resolution pictures are recorded and played in VGA resolution!

<120-second long video images are recorded before and after the occurrence of a problem.>

120-seconds-before    120-seconds-after

Trouble

CASE 7

**Minimize production mistakes by using the GOT to manage authorization and security levels.**

**Before**

**GOT Solution**

**Operator Authentication function + Operation Log function**

Save operator information on a memory card along with operation records. You can find sources of trouble quickly.  
For details, see [P.41](#)

What is the cause of the defective product?

The operation log including the operator information is shown for analysis.

It is found that Jon Smith entered erroneous data.

History check screen

Product A    Display alarm data  
Product B    Display operation log  
Product C

We can determine the cause of the error and this will be helpful in improving operations and preventing a recurrence in the future.

You don't have to panic. The GOT will find the cause.

CASE 8

**Reduce installation costs by using flexible mounting options.**

**Before**

Hardware switches and lamps may require large areas of boards.

Rearranging them and reconnecting cables may be inconvenient when specifications are changed.

**GOT Solution**

**GT10 models (GT1020/GT1030)**

For simple and small applications, GOT1000 compact types are just right.  
For details, see [P.48](#)

Compact and easy-to-use, with simple wiring that reduces assembly time.

Its operation is intuitive. Three backlight colors indicate different equipment statuses.

green    orange    red  
3-color display model  
(white    pink    red)  
3-color model is also available)

Both horizontal and vertical mounting available to meet the needs of different applications.

# FA Solutions

Obstacles are often encountered when using many different types of FA devices. The following problems can be resolved by linking with GOT1000.

## Enhancing sequence control.

General-purpose PLC  
**CASE 1 MELSEC x GOT1000**

Powerful functionality that is useful during startup and the tuning process!

Can the program be debugged without opening the cabinet?

### FA transparent function

For details, see P.39

Connected with a personal computer, the GOT acts as a transparent gateway to enable programming, start up, and adjustment of equipment using GX Works2 or GX LogViewer. Users do not have to bother with opening the cabinet or changing cable connections. (On the GT10 series, the FA transparent function can be used via the interface on the rear side.)

Can the PLC programs be recovered after failure?

### Backup/restoration function

For details, see P.42

Sequence programs and parameters can be backed up to the memory card or USB memory in the GOT. Users can then perform batch operation to restore the data to the PLC.

Can the PLC status or errors be checked quickly?

### System monitor function

For details, see P.46

PLC devices can be monitored and changed.

### Intelligent module monitor function

For details, see P.46

Buffer memory values and I/O information can be monitored and changed.

### Network monitor function

For details, see P.46

Enable monitoring of network line conditions on a dedicated screen.

### Network module status display

Enable monitoring of LED status, error status, among others of network modules on a GOT.

### MELSEC-L troubleshooting function

For details, see P.46

A dedicated maintenance screen for the L series is included. The CPU status and error information can be easily confirmed without a personal computer. If a problem occurs, you can jump to a function screen such as the ladder monitor to quickly take corrective actions.

Ideal for PLCs in the field and on the plant floor!

Can PLC programs be monitored with the GOT?

### Ladder monitor function and ladder editor function

For details, see P.44 P.45

Sequence programs can be monitored in a circuit diagram (ladder format).

### SFC monitor function

For details, see P.44

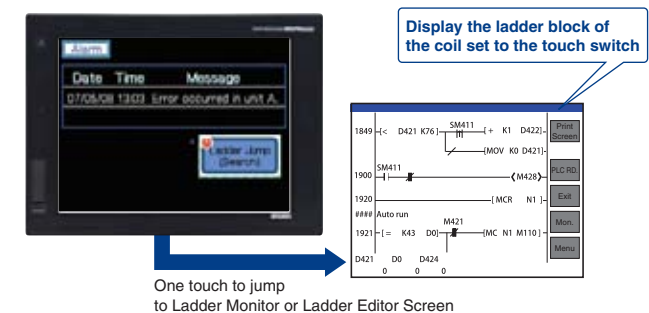

The Q series (Q mode) SFC programs (MELSAP3, MELSAP-L) can be monitored in a SFC diagram format.

Can the root cause be easily identified?

### One-touch ladder jump function

For details, see P.44

By setting a program name and coil number of the PLC to a touch switch, the relevant ladder circuit block can be displayed directly. Troubles can be handled smoothly from the alarm screen.

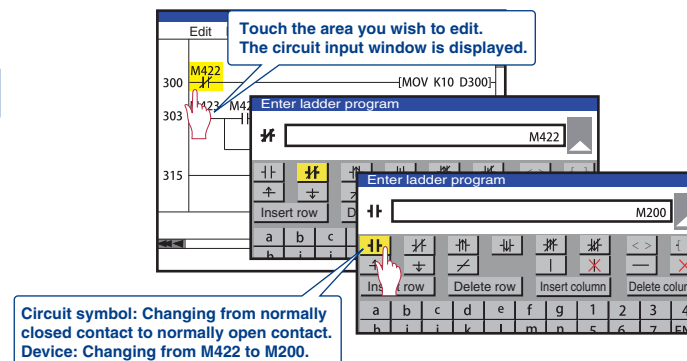

Can simple changes to ladder programs be made without a personal computer?

### Ladder editor function

For details, see P.45

Sequence programs of the Q series (Q mode) and the L series can be edited in a circuit diagram (ladder format).

Using the MELSEC-L series or high-speed data logger module!

Can collected logging data be checked at the worksite?

### Log viewer function

For details, see P.40

Logging data collected using the L series or high-speed data logger module can be displayed on the GOT.

Monitoring batch control!

Can Process and Batch monitoring be simplified?

### Building a process control system using GOT1000

For details, see P.26 P.51

PX Developer creates GOT process control screens automatically. The automatically generated data can be used for both the GOT (worksite) and GT SoftGOT1000 (monitor room), and therefore monitor screens can be created efficiently.

# FA Solutions

**Making drive control even easier.**

**General-purpose AC Servo**  
MITSUBISHI SERVO AMPLIFIERS & MOTORS  
**CASE 2 MELSERVO X GOT1000**  
GRAPHIC OPERATION TERMINAL

**Powerful functionality that is useful during startup and the tuning process!**

**Can the program be debugged without opening the cabinet?**

**FA transparent function**

For details, see **P.39**

Connected with a personal computer, the GOT acts as a transparent gateway to enable programming, startup, and adjustment of equipment using MT Works2, GX Works2, GX Configurator-QP or MR Configurator2. Users do not have to bother with opening the cabinet or changing cable connections.

MT Works2  
GX Works2, etc.

**Can devices in the motion controller be validated?**

**System monitor function**

For details, see **P.46**

Motion controller devices can be monitored and changed.

**For direct connection of servo amplifiers to GOTs!**

**Can errors or the status of servo amplifiers be validated?**

**Servo amplifier monitor function**

For details, see **P.47**

In a system which outputs pulse train, the GOT can be connected to a servo amplifier in a serial connection to perform the following operations: monitoring, alarm display, diagnosis, parameter setting, and test operations.

Item	Value	Unit	Item	Value	Unit
Cumulative feedback pulses	-1001000	pulse	With zero position position	406036	pulse
Servo motor speed	0	r/min	MR counter	-407	rev
Drop status	1	pulse	Load to motor inertia ratio	7.00	times
Cumulative command pulse	0	pulse	Bus voltage	310	V
Command pulse frequency	0	kHz	Encoder internal temperature	59	°C
Analog speed command voltage	-0.05	V	Settling time	2	ms
Analog torque command voltage	0.00	V	Oscillation detection frequency	0	Hz
Regenerative load ratio	0%	%	Tough drive times	0	times
Effective load ratio	0%	%	Unit power consumption	10	W
Peak load ratio	0%	%	Unit total power consumption	10	W
Instantaneous current	0%	%			

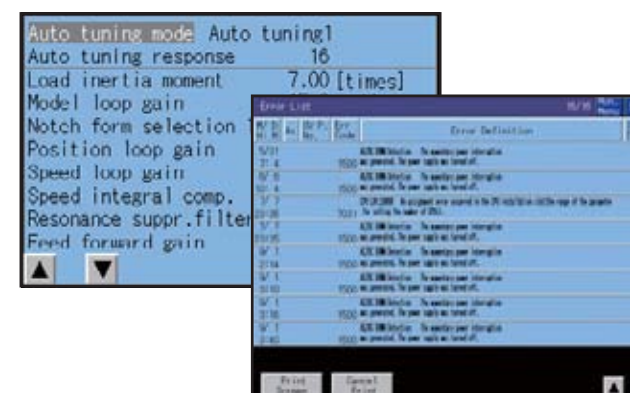

**Ideal for motion controllers in the field and on the plant floor!**

**Can the motion controller's servo parameters be changed easily?**

**Q series motion monitor function**

For details, see **P.47**

The GOT enables easy monitoring of motion controllers (Q series), changing of servo parameters, and display of errors on the screen.

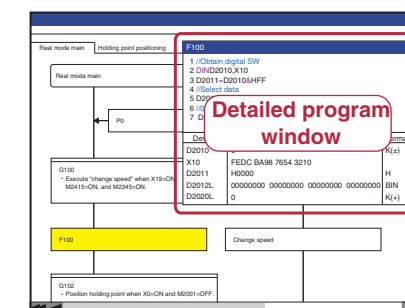

**Can motion SFC programs be checked on the GOT?**

**Motion SFC monitor function**

For details, see **P.45**

Motion controller (Q series) motion SFC programs can be monitored in SFC diagram format. Viewing the batch program monitor or the active step list enables you to see the complete status at a glance.

**Can motion profiles be recovered after controller failures?**

**Backup/restoration function**

For details, see **P.42**

Motion controller (Q series) programs and parameters can be backed up onto a memory card or USB memory in the GOT. Users can perform batch operation to restore the data to the motion controller.

**Embedded functionality for positioning modules/simple motion modules!**

**Can positioning status and errors be validated?**

**Intelligent module monitor function**

For details, see **P.46**

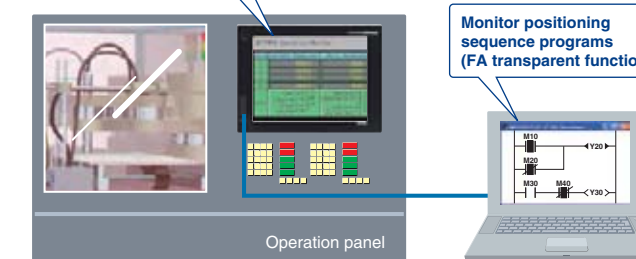

Buffer memory values of modules such as the QD77MS and I/O information can be monitored and changed.

**Other convenient uses!**

When used in combination with the FA transparent function, the positioning module/simple motion module can be efficiently debugged. If an error occurs in the positioning module/simple motion module, the details of the error can be confirmed using just the GOT.

Monitor the status, parameters, input/output information, and other data for each axis of the positioning module/simple motion module (intelligent module monitor function)

Monitor positioning sequence programs (FA transparent function)

Operation panel

# FA Solutions

## Simplifying inverter control.

General-purpose Inverter

**CASE 3** FREQROL X GOT1000 GRAPHIC OPERATION TERMINAL

## Ideal for inverter startups and operation!

Can connections to the inverter be simplified?

### Directly connect inverters

Up to 31 inverters can be connected to a single GOT over a total distance of 500m. FREQROL-A700 inverters can automatically configure the communication parameters for GOT connection, making connections easy.

Can the parameters be checked or changed without opening the cabinet?

### FA transparent function

For details, see P.39

Connected with a personal computer, the GOT acts as a transparent gateway to enable startup and adjustment of equipment using FR Configurator. Users do not have to bother with opening the cabinet or changing cable connections.

## Ideal for inverter operation!

Can the inverter status be monitored on the GOT?

Example of GT16 operation screen

### Easy-to-understand display

Operation commands and parameters can be set from a GOT. On the GT1020/GT1030, three different backlight colors can be switched between screens, making it easy for operators to read and operate the screens.

Example of GT1020 parameter screen

Example of GT1030 operation screen

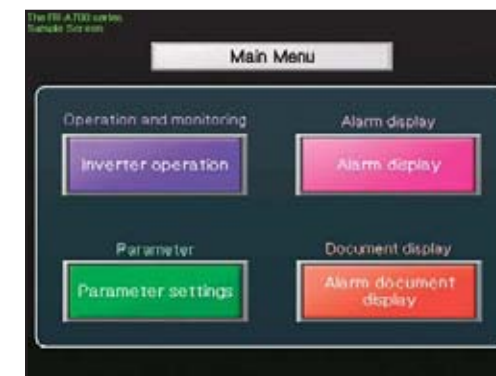

Can inverter parameters be changed easily?

### Ready-to-use sample screens

Sample screen data for specifying parameters is available.

Parameter settings			
0 Torque boost	0123.5%	01 Acceleration/deceleration	012.34s

# FA Solutions

## Faster robot control!

Industrial Robot  
**CASE 4 MELFA X GOT1000**

## Powerful functions for robotic systems!

Can the teaching box and the personal computer used for setup be consolidated into a single unit?

Consolidate and centralize robot monitoring and control functions on production floor using the GOT

Even if a teaching box is not available, the GOT can be used to operate the robot and easily check the current position data and error details. Consolidating panel operations into the GOT improves operation and maintenance work efficiency.

Robot internal information (data)  
Error information/Variable information/Program information  
Robot information (current speed/attainment rate, etc.)  
Maintenance information (battery/grease remaining time, etc.)  
Servo motor (load rate/current value, etc.)

Immediately check the robot status!

- Operation and maintenance on the GOT
- Robot operation screen
- Robot current position monitor screen
- Load rate/current value display screen
- Maintenance forecast screen

Consolidated panel operations

Robot controller Teaching box Robot programming & engineering software

## Ideal for robot programming!

Can the robot program be easily accessed?

Ready-to-use sample screens

Sample screen data is available for robot operation, current position monitoring, and other purposes. There is no need to create robot programs from scratch.

Robot operation panel screen

Robot jog/hand operation screen

Robot current position monitor screen

Robot load rate/current value monitor screen

Robot maintenance forecast screen

Robot manual menu screen

Opens a video of operation examples

Manual display

Can the program be debugged without opening the cabinet?

FA transparent function

For details, see P.39

Connected with a personal computer, the GOT acts as a transparent gateway to enable start up and adjustment of equipment using RT ToolBox2. Users do not have to bother with opening the cabinet or changing cable connections.

RT ToolBox2

Can devices in the robot controller be validated?

System monitor function

For details, see P.46

Embedded monitoring utilities are available enabling users to view and change device values.

## In the event of trouble!

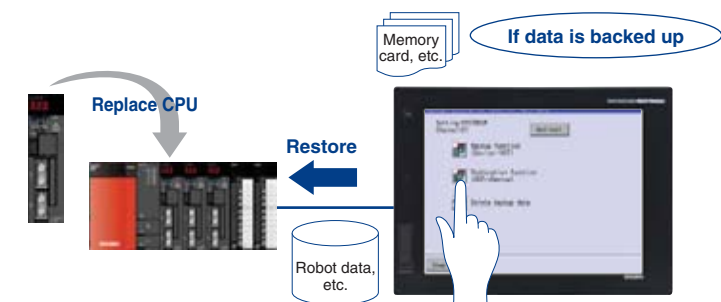

Can robot profiles be recovered after controller failures?

Backup/restoration function

For details, see P.42

Robot controller data can be backed up to the memory card or USB memory in the GOT. Users can perform batch operation to restore the data to the robot controller.

# FA Solutions

## Simplifying numerical control.

Numerical Control Unit  
**CASE5 C70 Series** MITSUBISHI CNC  
 GRAPHIC OPERATION TERMINAL  
**X GOT1000**

## Powerful function for CNC startup, machining and changeover!

Can CNC parameters be changed easily?

### CNC monitor function

For details, see P.47

The CNC C70 can be monitored and the parameters can be changed.

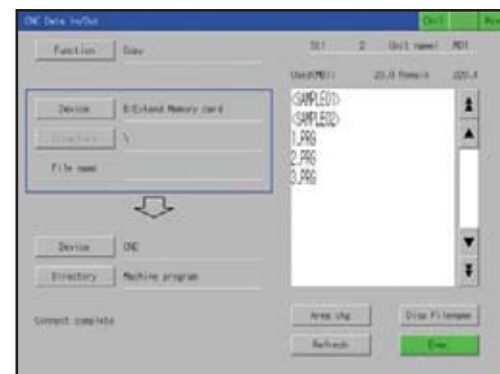

Can errors or the status of the CNC be validated quickly?

### CNC data I/O function

For details, see P.47

Data, such as machining programs and parameters, can be copied from a GOT memory card or USB memory to the CNC C70 and vice versa. Data can be deleted as well.

Can CNC devices be easily validated?

### System monitor function

For details, see P.46

Embedded monitoring utilities are available enabling users to view and change CNC C70 device values.

Can the parameters be checked or changed without opening the panel?

### FA transparent function

For details, see P.39

Connected with a personal computer, the GOT acts as a transparent gateway to specify and adjust parameters of equipment using NC Configurator. Users do not have to bother with opening the cabinet or changing cable connections.

## Ideal for CNC programming!

Can CNC programs be validated directly from the GOT?

### Ladder monitor function

For details, see P.44

CNC C70 sequence programs can be monitored in a circuit diagram (ladder format).

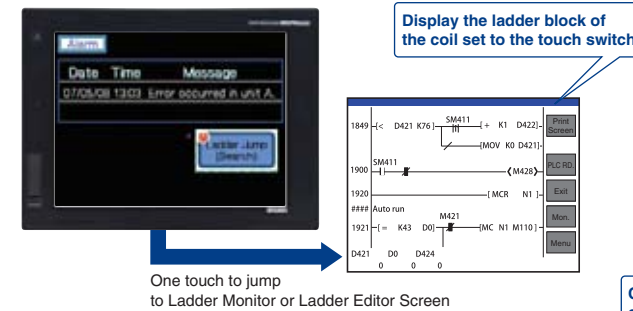

Can the root cause be easily identified?

### One-touch ladder jump function

For details, see P.44

By setting a program name and coil number of the CNC C70 to a touch switch, the relevant ladder circuit block can be displayed directly. Problems can be handled smoothly from the alarm screen.

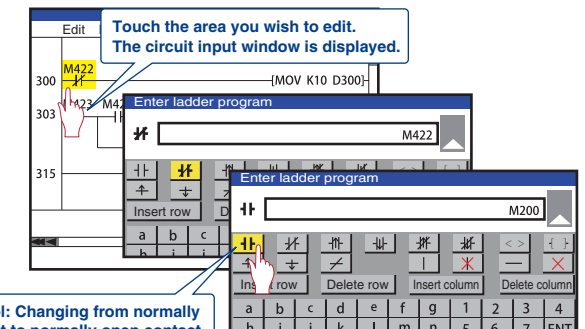

Can programs be changed easily without a personal computer?

### Ladder editor function

For details, see P.45

Sequence programs of the CNC C70 can be edited in a circuit diagram (ladder format).

## In the event of trouble!

Can the CNC programs be recovered after failure?

### Backup/restoration function

For details, see P.42

CNC C70 data such as machining programs and parameters can be backed up to the memory card or USB memory in the GOT. Users can perform batch operation to restore the data to the CNC C70.

# FA Solutions

## Improving vision integration.

## Powerful functions for vision systems!

**Can automation and vision systems be consolidated into a single platform?**

**Displaying the In-Sight Series processing results on the GOT**

By connecting a GOT to the In-Sight Series and PLC over Ethernet, the In-Sight Series processing results can be displayed and parameters can be changed on the GOT. The GT16 model has a built-in Ethernet port, allowing the system to be built easily.

**Can other COGNEX products be connected?**

**Connect to various COGNEX products**

The In-Sight vision system and DataMan barcode reader can be connected to the GOT.

## Ideal for configuration!

**Can vision parameters be changed from the GOT?**

**Ready-to-use sample screens**

Sample screen data is available for checking the results of positioning, inspection, and reading characters.

**[Alignment screen]**

The workpiece position and posture detected with In-Sight Series as well as the success or failure state of the detection are displayed. The workpiece detection threshold can be changed from this screen.

**[Inspection screen]**

The results of workpiece inspections carried out with the In-Sight Series are displayed. The workpiece detection threshold can be changed.

**[Code recognition screen]**

The results of reading ID codes with the In-Sight Series are displayed. The reading mode (read/verify or change character string during verification) can be selected.

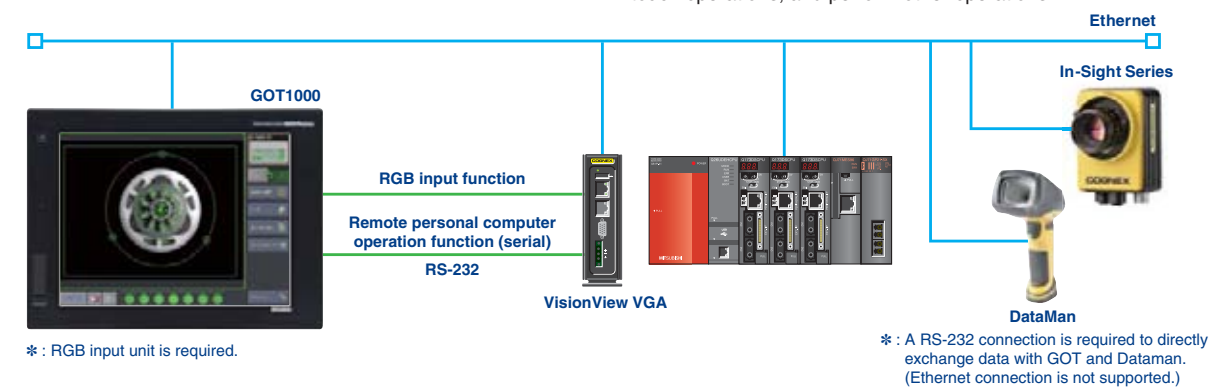

## Ideal for monitoring operations!

**Can vision applications be handled easily at the worksite?**

**Displaying In-Sight Series vision applications on the GOT**

Connect the COGNEX VisionView VGA with the GOT to display the In-Sight Series Vision Application screen. While monitoring connected devices such as PLCs, it is possible to switch to the Vision Application screen when necessary to display live images, specify parameters with touch operations, and perform other operations.

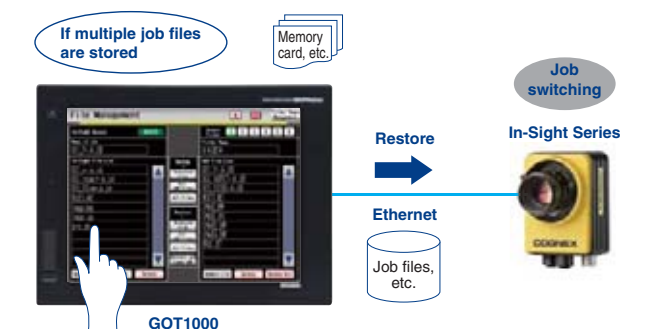

## Ideal for switching jobs!

**Can jobs be switched easily at the worksite?**

**Managing In-Sight Series job files with the GOT**

Jobs can be switched easily by storing the In-Sight Series job files in the GOT's memory card or USB memory, and then restoring and loading them into the In-Sight Series when needed. Various files in the In-Sight Series, including job files, can be backed up in the GOT.

The lineup that fits in with any production line. Find your GOT with the right functions, size, and features.

## GT16

High performance models with multimedia and a host of features and functions including embedded communications

\* See page 25 for GT16 Handy.

- User memory capacity: 15MB (GT16□□-VNB□ : 11MB)
- USB host and USB device ports are included.
- Ethernet, RS-422/485, and RS-232 interfaces are supported as standard interfaces.
- A multimedia unit and a video/RGB unit are supported.\*
- Featuring an analog touch panel

\* : Excluding GT16□□-VNB□, GT1655

## GT14

Standard model with advanced features and communication interfaces

- User memory capacity: 9MB
- USB host and USB device ports are included.
- Ethernet, RS-422/485, and RS-232 interfaces are supported as standard interfaces.
- SD card interface is supported as a standard interface.

Convenient options increase flexibility

Panel-mounted USB port extension  
**GT14-C10EXUSB-4S**  
Bring the rear USB port to the front surface of the control panel.

RS-232/485 signal conversion adapter  
**GT14-RS2T4-9P**  
Convert the GOT's RS-232 port into a RS-485 port.

USB device

## GT15

Performance models ideal for a wide range of applications in a network or standalone environment

- User memory capacity: 9MB (GT15□□-VNB□: 5MB)
- USB device port is included.
- The RS-232 interface is supported as a standard interface.
- A video/RGB unit is supported.\*

\* : GT1585V/GT1575V only

**GOT, available in a variety of compact bodies, is packed with GOT1000 functions.**

## GT12

Large basic models with integrated features and communication interfaces

- User memory capacity: 6MB
- USB device port is included.
- Ethernet, RS-422/485, and RS-232 interfaces are supported as standard interfaces.
- Featuring an analog touch panel

## GT10

Compact models with basic functions

### GT1030/GT1020

- User memory capacity: 1.5MB (GT1030)/ 512KB (GT1020)
- Three-color LED backlight indicates the equipment status at a glance.
- The RS-422/485\* interface or the RS-232 interface is supported as a standard interface.

\* : Only the RS-422 interface for the 5VDC type

\* : For details about the functions of GT10 models, see "GT10 (pages 48, 49)".

### GT1055/GT1050/GT1045/GT1040

- User memory capacity: 3MB
- USB device port is included.
- RS-422/485 and RS-232 interfaces are supported as standard interfaces.

**Rich functionality and high performance in the palm of your hand**

## GT16 Handy GOT

The light body includes the latest GT16 functions

**6.5"** High resolution handy GOT  
**GT1665HS-VTBD**

Options

- Emergency stop switch guard cover
- External connection cable

**Ergonomic design allows you to change the angle of the handle.**

Various types of switches are available

- Operation switches with LEDs (6)
- Emergency stop switch
- Selector switch with key
- Three-position deadman switch

Various types of external connection interfaces are available as standard interfaces

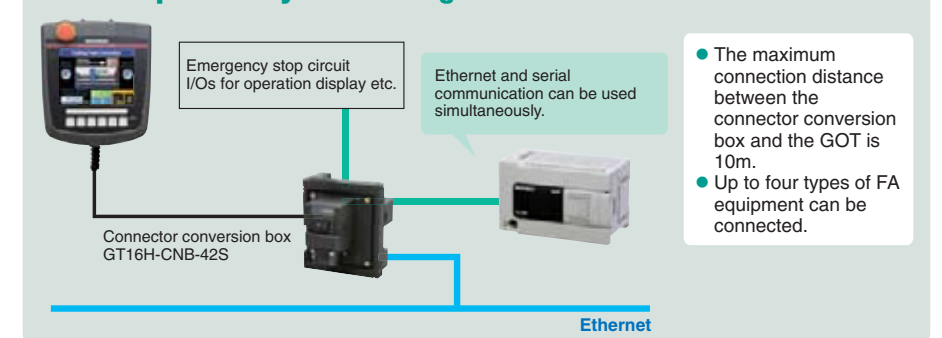

- USB host and USB device
- CF card interface
- RS-422/485 and RS-232 interfaces (switchable)\*1
- Ethernet interface\*1

\*1 : Connector conversion box is required.

- User memory capacity: 15MB
- USB host and USB device ports are included.
- Ethernet, RS-422/485, and RS-232 interfaces are supported as standard interfaces.
- The latest GT16 functions are available, including various types of monitoring functions.
- Display a vibrant 65,536 colors on the 6.5-inch VGA screen!

An example of a system configuration with Ethernet connection

## GT11 Handy GOT

Portable 5.7" operation terminal

**GT1155HS-QSBD**  
**GT1150HS-QLBD**

GT11 Handy can be connected to the CC-Link network.

## Use a personal computer or panel computer as a GOT.

HMI software for the GOT1000 series

# MELSOFT **GT SoftGOT1000** Version3

### GT SoftGOT1000

GT SoftGOT1000 is the HMI software that provides GOT functions on personal computers and panel computers.

This software connects with various types of equipment such as Mitsubishi PLCs and let you see screens just like the GOT1000 series.

You can also reuse GOT's project data without modification.

Along with all the advantages of a GOT, you can also enjoy the convenience and flexibility of personal computers and panel computers.

GT SoftGOT1000 Version3 is software included with the GT Works3 suite. A separate license key is required for use.

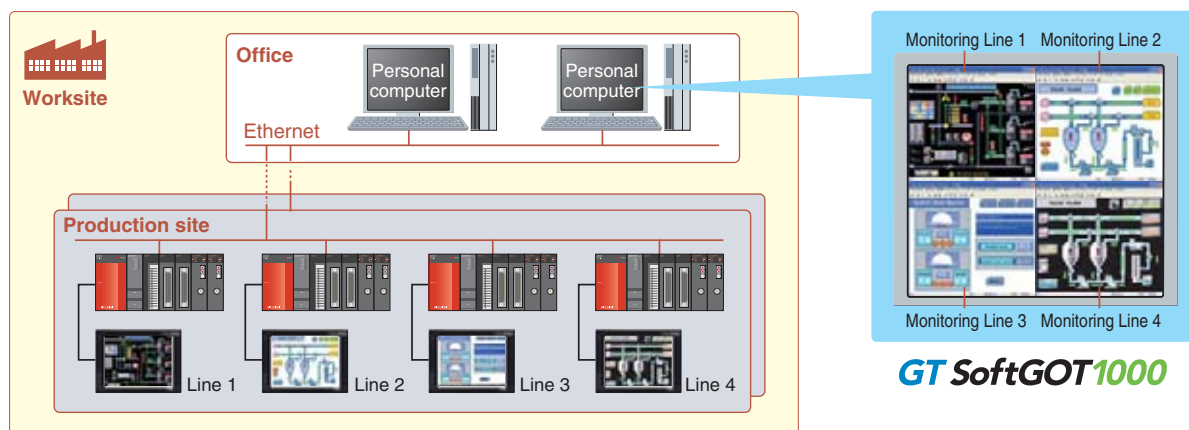

### Monitor the production site from a remote location

#### Reduce downtime

Use GT SoftGOT1000 to monitor the production site from your office. You can collect information quickly when a problem occurs, taking necessary actions immediately.

#### Use GOT project data from the production site

You can reuse project data of the GOT at your production site as the project data of GT SoftGOT1000 to reduce the design cost.

### Connect with MELSEC process control for process control applications

You can connect GT SoftGOT1000 to the monitor tools of the Engineering Environment PX Developer for design and maintenance work for process control. In this way, a process control monitoring system can easily be constructed.

#### PX Developer window screens and other tools

Tools for monitoring, operating, and tuning loop control tags. (The display position can be specified.)

#### GT SoftGOT1000 touch switch/object

Clicking on touch switches and objects displays various screens of PX Developer monitoring tools. (The display position can be specified.)

#### Security collaboration

The GT SoftGOT1000 security level is changed accordingly when the PX Developer monitor tool's mode is changed (engineer mode/operate mode/lock mode). Authority can be set for operations requiring security.

#### PX Developer monitoring tool bar

Clicking on buttons executes various operations such as starting up GT SoftGOT1000 and switching base screens.

#### GT SoftGOT1000 base screen

Make your desktop into a graphic monitoring window by displaying the GT SoftGOT1000 base screen in full-screen mode and sending the window to the back of the screen.

### Link with other applications to construct a high-performance system

You can use a user-created application to read and write information to and from internal devices of GT SoftGOT1000. By linking data with user applications such as a data logger, you can construct a high-performance system package. You can also use a touch switch on the GT SoftGOT1000 monitor to launch another application.

#### <Development environment of user applications>

- Microsoft® Visual C++®/Visual C#®/Visual Basic® included with Microsoft® Visual Studio 6.0/.NET (2002)/.NET 2003/2005/2008
- Embarcadero® C++Builder® XE

### Connect to various devices

The GT SoftGOT1000 can be connected to the Mitsubishi PLC, other PLC brands, MODBUS®/TCP slave devices.

\*: See "List of connectable models" (page 69), for more details on supported models of other manufacturers.

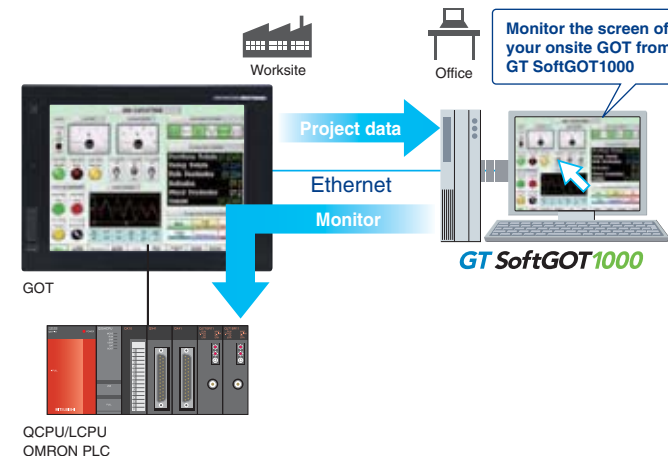

Connect to RFID or barcode reader and input numerical values or ASCII characters.

### The SoftGOT-GOT link function enhances the linkage to your onsite GOT

#### Monitor the screen of your onsite GOT from GT SoftGOT1000

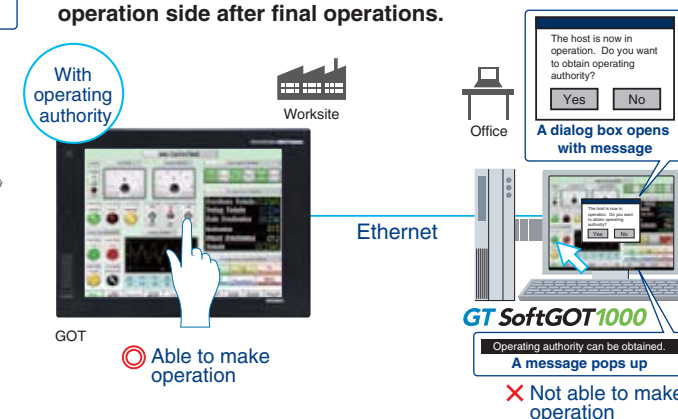

Connect GT SoftGOT1000 with GOT by an Ethernet connection. Use the GOT's project data with GT SoftGOT1000 to monitor connected equipment.\*

\*: Only CH1 can be monitored when GOT is connected via multi-channels. GOT and QCPU/LCPU can be connected by a bus connection, direct CPU connection, computer link connection, or Ethernet connection. GOT and OMRON PLC can be connected via Ethernet connection.

#### Prevent simultaneous operations from GT SoftGOT1000 and GOT

Operation of an input object (e.g. touch switch, numerical input) is allowed by either GT SoftGOT1000 or the GOT, whichever has operating authority. If one terminal does not have operating authority, the status of the operating authority can be displayed in a pop-up window. Whether it is possible to acquire operating authority from the other terminal can be notified with a dialog. It is also possible to specify the time to ensure the operating authority on the operation side after final operations.

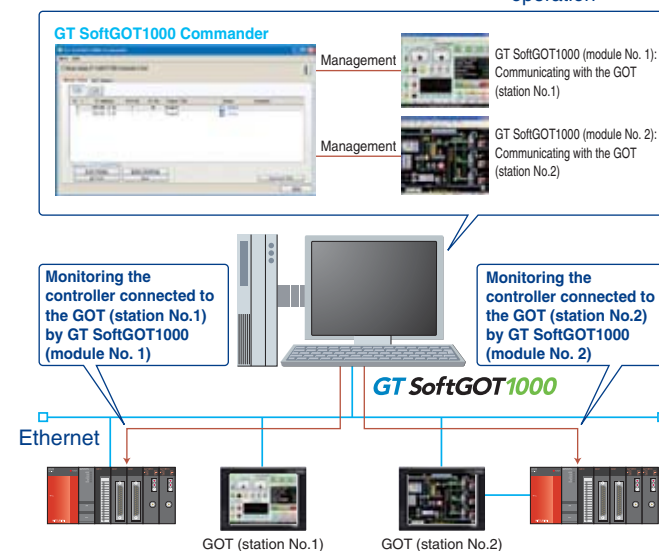

### GT SoftGOT1000 Commander

By using the GT SoftGOT1000 Commander, multiple GT SoftGOT1000 modules using the SoftGOT-GOT link function can be efficiently managed, and the SoftGOT-GOT link function can be utilized easily.

#### <Actions possible with GT SoftGOT1000 Commander>

- Search for GOT on the Ethernet network and start with GT SoftGOT1000 (GT16 only) (It is also possible to select which GOTs are displayed in the Search List.) **NEW**
- Start/stop GT SoftGOT1000
- Check and switch GT SoftGOT1000 monitor status (online/offline)
- Designate GT SoftGOT1000 module No. displayed on top screen

See "List of connectable models" (page 69), "Function list" (page 70), and "Notes for use (Operating environment)" (page 86).

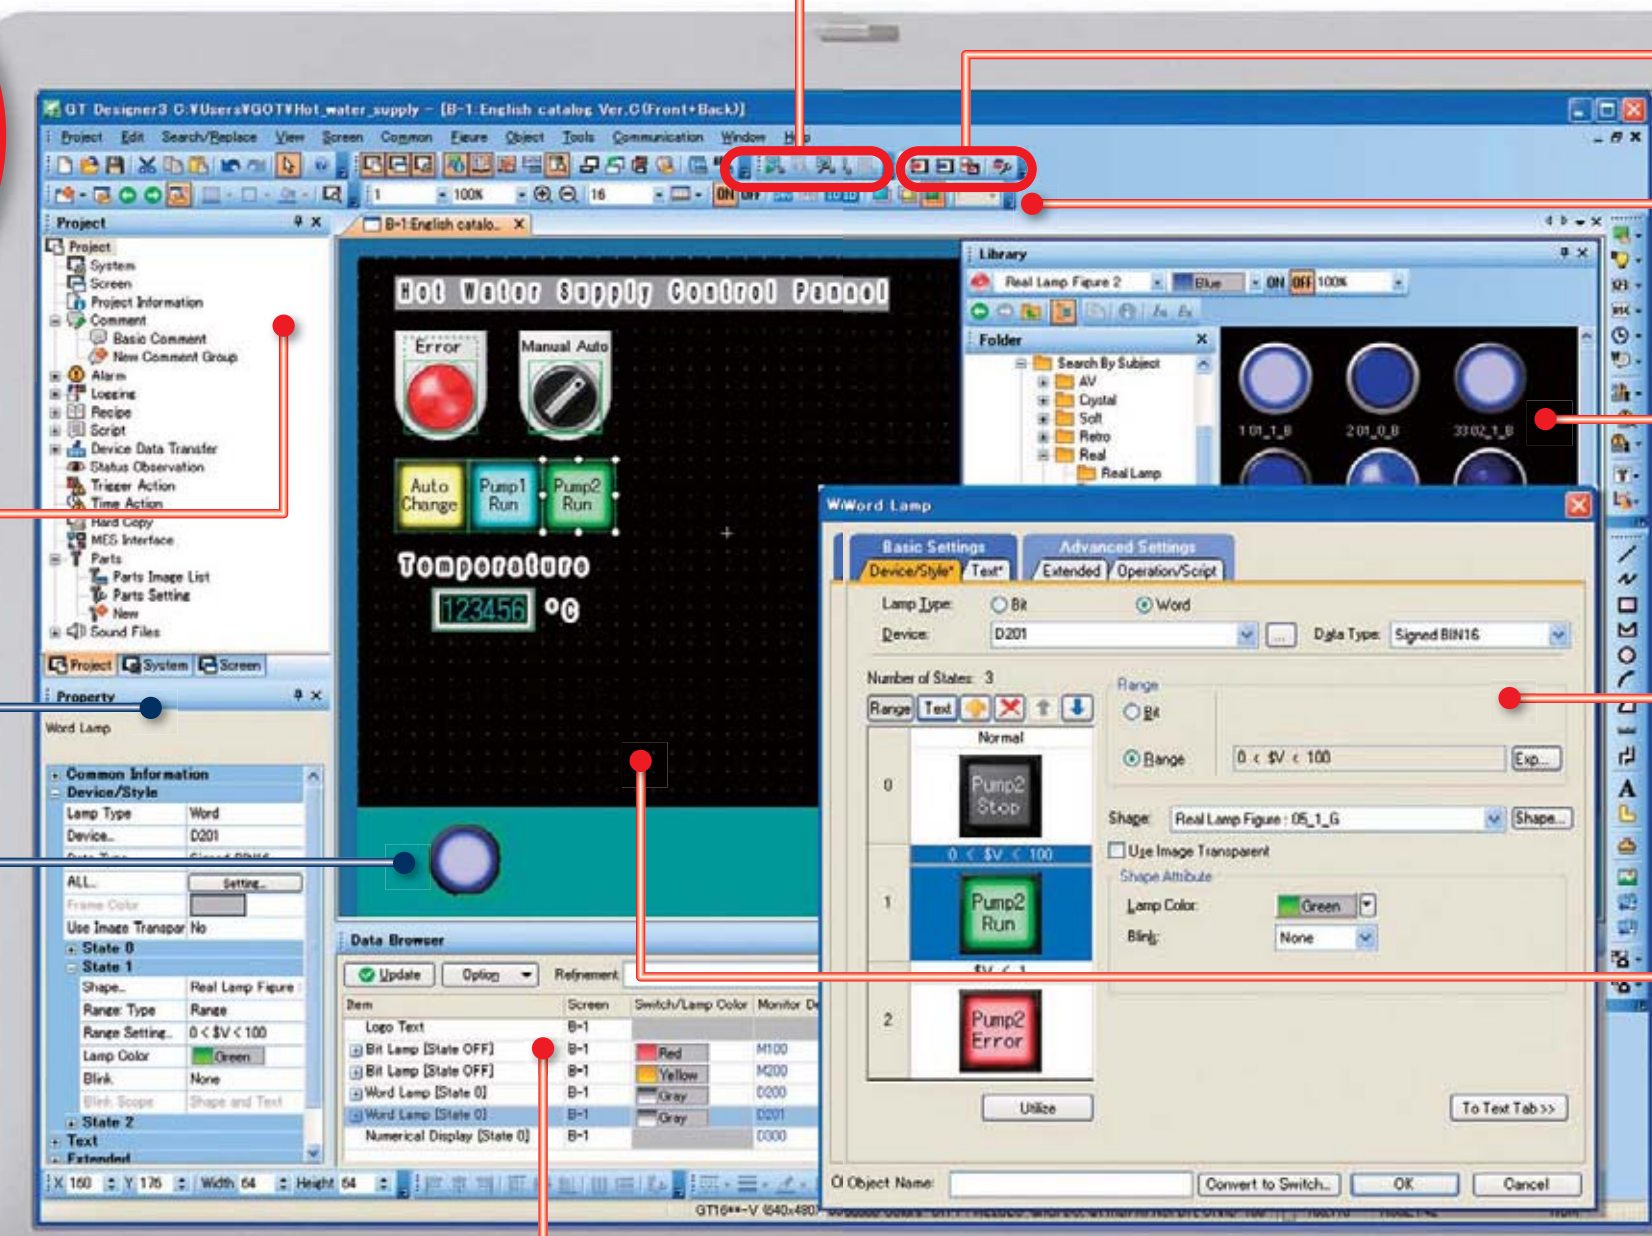

**More intuitive. No more wasted time. The screen**

**design software optimized for usability.**

GOT1000 Screen Design Software  
**MELSOFT GT Works3**

**Enhanced "easy-to-use" functions for efficient screen design!**

For more details, see the GT Works3 catalog (L (NA) 08170).

**Work Tree**  
View the whole project, create a new screen, and add and delete screens with ease.

**Property Sheet**  
A selected object or graphic's settings are displayed as a tree view. Set colors, devices, etc., on the property sheet without opening a dialog box. When selecting multiple objects or graphics, change color, character size, etc., all at the same time.

**Temporary Area**  
Reduce workspace clutter by moving objects off of the display area.

**MELSOFT iQ Works Improves Design Efficiency**  
Batch parameter check and system labels of MELSOFT Navigator are supported.

**Data Browser**  
The object settings are listed allowing settings to be confirmed and revised easily!

**Related Tools**  
GT Works3 comes with various tools such as the Data Transfer Tool and GT Converter2.

**Simulator**  
Preview operation without connecting to a GOT.

**Communication with GOT**  
Communication settings and drivers are automatically selected and downloaded to the GOT with the project data.

**Tool Bar**  
Vividly colored icons make distinguishing active functions from inactive ones easy.

**Library**  
Parts are easy to select. High resolution graphics and parts are easy create and incorporate into projects.

**Dialog Box**  
User-friendly dialog boxes and object settings.

**Editor <Screen Design Area>**  
Many convenient and efficient development functions are included!  
**New functions improve your screen design efficiency than ever before!**

- Use "templates" to greatly reduce your screen creation time!
- Make batch changes with a single right-click!
- Register parts with a single right-click!
- Easily create addition and subtraction word switches!

User (OEM/End User) Security Function!

**The Help Function** is available for quick reference!

## The GOT1000 series provides a variety of functions to satisfy user requirements

Usability depends on who the users are and where they carry out their tasks.

Designers want to use the most advanced HMI technology, while maintenance engineers want the most dependable HMI for their facilities.

To satisfy all of our customers, we are constantly developing more and more functions for the GOT1000 series.

### INDEX

GT16/GT15/GT14/GT12/GT11 Functions	32
<b>For Designers</b>	<b>32</b>
<b>For Initial Startup &amp; Adjustment Operators</b>	<b>38</b>
<b>For Maintenance Personnel</b>	<b>40</b>
GT10 Functions	48
iQ Platform	50
MELSEC Process Control	51
Specifications	52
External Dimensions	61
List of Connectable Models	65
Function List	70
Product List	74
Notes for Use	81
Warranty	87

There are many different applications to be solved. How do we stay flexible?

#### For designers

Multimedia function	32
Video/RGB function	32
Document display function	33
Multi-channel function	33
VNC® server function	34
Remote personal computer operation function (Ethernet)	34
SoftGOT-GOT link function	34
Remote personal computer operation function (Serial)	34
File transfer function (FTP client)	34
FTP server function	34
USB mouse/keyboard connection	34
Gateway function	35
MES interface function	35
Comment groups	36
Multilingual support	36
Advanced recipe function	37
Script function	37
Various types of window screens	37

Efficiency requires both fast data transfer as well as user-friendly functions.

#### For initial startup & operations

Drawing, computing, communication; a trio of high-speed response functions	38
Backlight brightness adjustment	38
Color-coded front face LED	38
Maintenance time notification function	38
Equipped with front USB interface	39
FA transparent function	39

To restore a system as quickly as possible, response capabilities for "just in case" situations are the key to selecting a HMI display.

#### For maintenance personnel

Logging function/historical trend graph/historical data list display	40
Log viewer function	40
Operator authentication function	41
Operation log function	41
Backup/restoration function	42
Advanced alarm	43
Ladder monitor function	44
SFC monitor function	44
Ladder editor function	45
Motion SFC monitor function	45
System monitor function	46
Network monitor function	46
Intelligent module monitor function	46
MELSEC-L troubleshooting function	46
Q series motion monitor function	47
Servo amplifier monitor function	47
CNC monitor function/CNC data I/O function	47
List editor for A/List editor for FX	47

The functions bearing these marks are available on the GT16, GT15, GT14, or GT12 model. All other functions are supported by GT16, GT15, GT14, GT12, and GT11 models.

\*: For details about the functions of GT10 models, see "GT10 (pages 48, 49)".

# Freedom to utilize advanced display functions to enhance the GOT

For designers

Smooth, high-quality motion images help efficiently investigate the cause of a problem

GRAPHIC OPERATION TERMINAL GOT 1000

## GT 16 Multimedia function

### Recording audio and video, displaying input images

Clear view before and after the trouble occurrence  
<Recording pre/post event motion images>

- Capable of recording motion images for 120 seconds before and after an error occurrence (when the event trigger device turned on), up to 240 seconds in total.

### High resolution recorded image (standard mode)

- Smooth, high resolution video can be recorded.
- Video size and frame rate
  - Maximum 15 fps in VGA (640 × 480)
  - Maximum 30 fps in QVGA (320 × 240)

### Playing back motion image files

Check the motion image before and after the occurrence of a problem, and diagnose the cause immediately.

- The motion image recorded on site is saved in the memory card of the GOT's multimedia unit and can be played back immediately after being recorded.
- The motion image files saved in a memory card can be played back by selecting the file name or record date **NEW** with a touch switch or in the multimedia screen on the GOT main unit.
- The files can be sent to your personal computer over the Ethernet interface of the GOT's multimedia unit and can be viewed on the computer.
- Fast forward and slow motion playback functions are also available.

### Use as a video guidebook for work tasks

- The GOT plays back motion image files that are created by your personal computer. Since the GOT is compatible with standard formats, commercially available software can be used to create motion image files.

<Applicable software programs> • Quick Time 7 Pro  
<Compatible file formats> • 3GP and MP4

## High-quality images with 65,536 colors provide precise detail

GRAPHIC OPERATION TERMINAL GOT 1000

## GT 16 GT 15 Video/RGB function

Enhanced compatibility with cameras and inspection devices <Video input>

- Input images from up to four video cameras and inspection devices are simultaneously and cleanly displayed in four windows in 65,536 colors. Images can be saved in JPEG format.

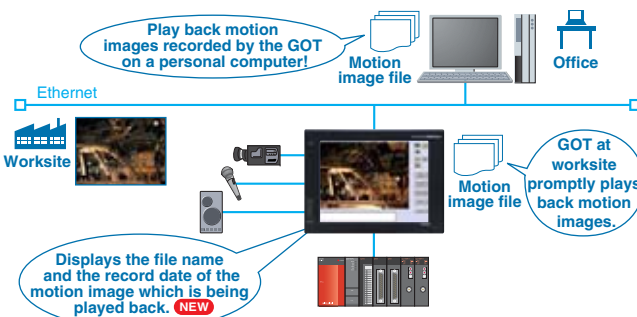

### For additional recording time (extended mode)

- Over two days of video can be recorded.
- Video size QVGA (320 × 240); frame rate 15 fps
- Possible to either delete saved motion image files or save them when starting a new recording. **NEW**

### Displaying input images

- In addition to the dedicated screen, images input from a video camera can be displayed on a user-created screen. Normally, input images are displayed on the user-created screen, and the dedicated multi-media screen is opened only when an error occurs or when playing back recorded images for confirmation.

The dedicated multimedia screen is available for recording and playback. Reduce your screen design time!

- \* : Not supported by GT16□□-VN□□, GT1655, GT16 Handy.
- \* : The multimedia data link tool and multimedia data link FTP services are necessary to transmit motion image files to a personal computer.
- \* : Only one of the following devices can be used at one time: multimedia unit, video input unit, RGB input unit, video/RGB input unit or RGB input unit.

The multimedia interaction tool and multimedia interaction FTP service are multimedia-dedicated software programs included with GT Works3.

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

### Displays PC images on the GOT <RGB input>

- Images on a personal computer display screen appear on the GOT simultaneously with the GOT's screen. RGB input of up to 2 channels is available when using the GT16M-R2.
- The display size can be changed, and the clip display is available. (For GT16 only)

### Display the GOT screen on a display <RGB output>

- Connect to a commercial display so that the GOT screen can be displayed larger.

- \* : Not supported by GT16□□-VN□□, GT1655, GT16 Handy.
- \* : Only one of the following devices can be used on the GT16 at one time; video input unit, RGB input unit, video/RGB input unit, RGB output unit, or multimedia unit.
- \* : Only the GT1585V and GT1575V for the GT15 series. Only one of the following devices can be used at one time; video input unit, RGB input unit, video/RGB input unit, or RGB output unit.

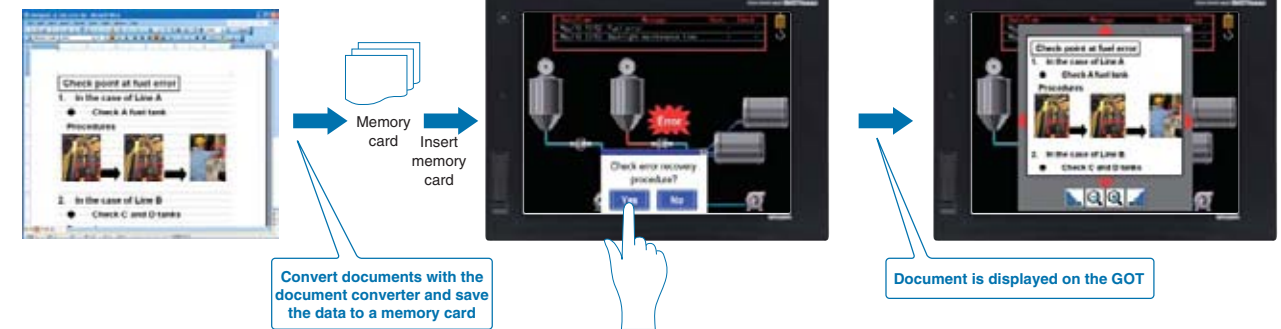

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

## Display various documents on the GOT at the worksite

GRAPHIC OPERATION TERMINAL GOT 1000

## GT 16 GT 15 Document display function

- When a system error occurs, referring to recovery methods in check lists and/or manuals on the GOT can reduce downtime.

Display of documents and manuals on the GOT can reduce downtime.

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

## Central storage of FA device information on a single GOT terminal

GRAPHIC OPERATION TERMINAL GOT 1000

## GT 16 GT 15 GT 14 GT 12 Multi-channel function

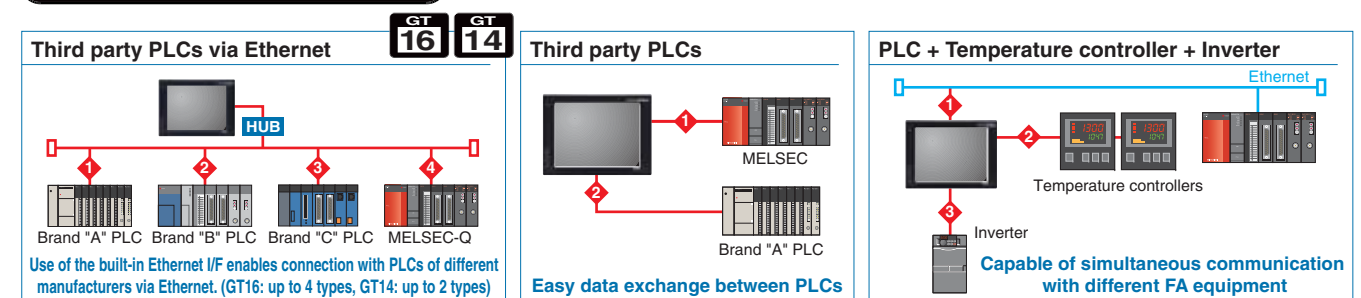

- Up to four FA device (PLC, servo, inverter, temperature controller, etc.) channels\* can be monitored with one GOT unit.
- Easy device transfer between connected devices. Use GT Works3 to specify triggers for source and destination devices for device transfer. (Device data transfer function)

### For various types of peripherals.

- General-purpose MODBUS® devices
- External devices (operation panels, switches, lamps, etc.)
- Two-dimensional code readers, barcode readers
- RFID readers, IC card readers
- Speakers
- Video cameras
- Displays (RGB output)
- PCs (RGB input)
- Serial printers
- PictBridge printers
- Vision sensors\*

\* : For details, see "CASE STUDY 2 (FA Solutions)" (page 20).

### Typical applications

- \* : For the Ethernet connection with GT1695 and GT1685 of function version A, if connected to equipment compatible with 10BASE-T, use a switching hub for its operation in a network environment where both 10Mbps and 100Mbps systems are operable.
- \* : The number of channels and functions, which can be used with the multi-channel function vary depending on the connection configuration. For more details, see "Notes for use" (page 81 to page 86).

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

INDEX

For Designers

For Initial Startup & Operations

For Maintenance Personnel

GT10

IQ Platform

MELSEC Process Control

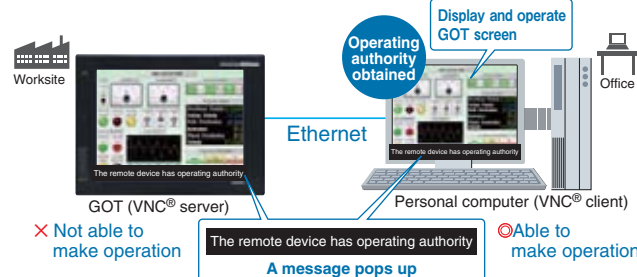

Specifications, External Dimensions

List of Connectable Models, etc.

## Operate the GOT at a remote location from a personal computer in your office

### GT 16 VNC® server function

- The screens of a GOT at a remote location can be viewed and operated from a personal computer in your office.
- Operating authority control prevents problems that may occur during simultaneous operations from a GOT at a worksite and a personal computer in a remote location. Available password setting allows control of who can view and operate the GOT.

**<Applicable VNC® Client Software>**  
 ● Software name: Ultra VNC version 1.0.8.2 is recommended.  
 ● Manufacture name: UltraVNC team  
 \* : A license key (GT16-VNCSKEY) is required.

### Monitor the screen of the onsite GOT from your PC screen

### GT 16 GT 15 SoftGOT-GOT link function

- Connect GT SoftGOT1000 with the GOT with an Ethernet connection. Use the GOT's project data with GT SoftGOT1000 to monitor connected equipment.\*
- Operation of an input object (e.g. touch switch, numerical input) is allowed by either the GT SoftGOT1000 or GOT, depending on which has operating authority.
- By using the GT SoftGOT1000 Commander, multiple GT SoftGOT1000 modules using the SoftGOT-GOT link function can be efficiently managed, and the SoftGOT-GOT link function can be utilized easily.

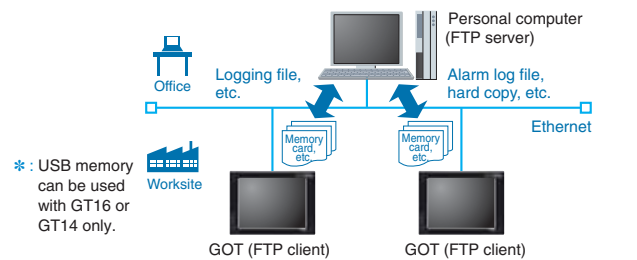

\* : Only CH1 can be monitored when GOT is connected via multi-channels. GOT and QCPU/LCPU can be connected by a bus connection, direct CPU connection, computer link connection, or Ethernet connection. GOT and OMRON PLC can be connected via Ethernet connection.

See "GT SoftGOT1000" (page 27), for more details.

### Files can be sent and received between a GOT and a personal computer

### GT 16 GT 15 GT 14 File transfer function (FTP client)

- By using a GOT, files (alarm log files, hard copies, etc.) stored in the GOT's memory card and USB memory can be sent to or from a personal computer.
- File names and folder names can be specified indirectly.

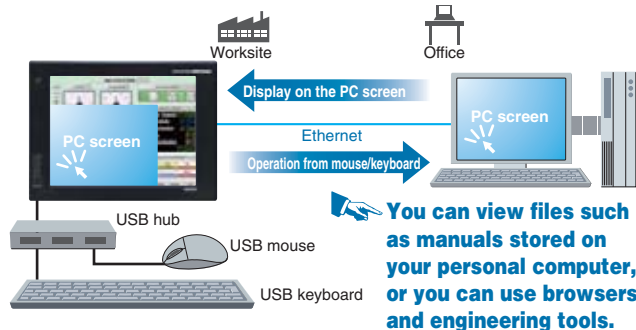

**<Applicable FTP Servers>**  
 ● GOT (FTP Server Function) ● Web Server Unit (QJ71WS96)  
 ● Windows® Server 2003 FTP Service (included with IIS)  
 ● Cognex Vision Sensor (In-Sight Series)

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

## Operate a remote PC from an onsite GOT

### GT 16 Remote personal computer operation function (Ethernet) (VNC® client function)

- A personal computer at a remote location can be operated from an onsite GOT when they are connected via Ethernet.
- A USB mouse/keyboard can be connected to the front USB interface.

\* : Not supported by GT16□□-VN□□, GT16 Handy  
 \* : The license key (GT16-PCRAKEY) is necessary.

## Operate a personal computer from the GOT touch screen

### GT 16 GT 15 Remote personal computer operation function (Serial)

- When using RGB input, operate a personal computer screen displayed on the GOT by touch operation (e.g. store information such as touched coordinates in GOT internal devices, transmit the data to a personal computer).

\* : Not supported by GT16□□-VN□□, GT1655, GT16 Handy  
 \* : Supported only on the GT1585V and GT1575V models in the GT15 series.

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

## Files can be sent and received between a personal computer and a GOT

### GT 16 GT 15 GT 14 GT 12 FTP server function

- By using a personal computer, files (alarm log files, hard copies, etc.) stored in a GOT's memory card and USB memory **NEW** can be sent to or from the GOT.

\* : USB memory can be used with GT16 or GT14 only.  
 \* : This function is a part of the Gateway function. For how to select optional devices, see the section about the Gateway function.

## Connect your mouse/keyboard to the front USB interface

### GT 16 GT 14 USB mouse/keyboard connection

- In a user-created screen, you can use your mouse to click touch switches and your keyboard to enter ASCII characters and numbers.

\* : Not supported by GT16 Handy

**This is convenient when you need to operate small switches or enter many characters.**

## Be alerted about worksite errors and collect device data from the office

### GT 16 GT 15 GT 14 GT 12 Gateway function

\*1 : GT12 supports only the FTP server function.

The gateway function remotely monitors the worksite and supports remote maintenance from the office.

### 1 Collect data on a personal computer (server function)

- A GOT (server) can be monitored from the host personal computer (MX Component) to perform indirect reading/writing of connected devices being monitored by the GOT.
- Even when third party devices are connected, MX Component can read and write the devices through the GOT using the server function.

\* : The collected data can be displayed and analyzed by Excel® without using any programs other than MX Sheet. Programming with Visual C++® and Visual Basic® enables applications to be flexibly designed and built. See the MELSOFT catalog (L (NA) 08008) for more details.

### 2 Monitor other GOTs from a GOT (client function)

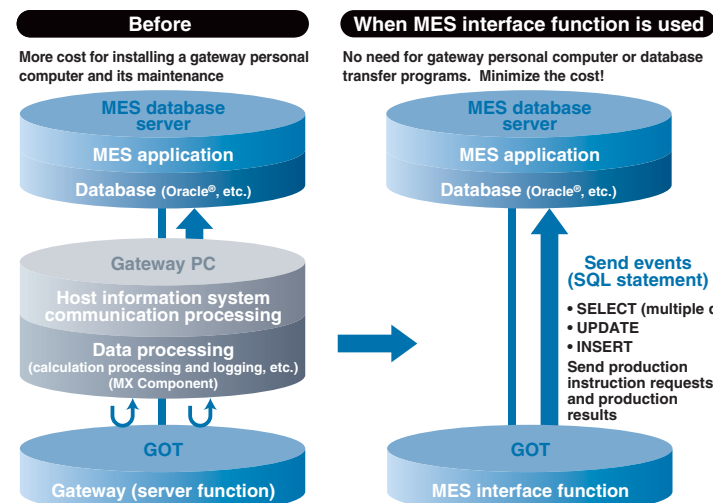

- A GOT (client) indirectly reads/writes device values of equipment monitored by another GOT (server).
- The client function can also be used to indirectly read/write device values of PLC CPUs other than the one to which the GOT (client) is connected.

## Database linkage support enhances productivity at your worksite

### GT 16 GT 15 MES interface function

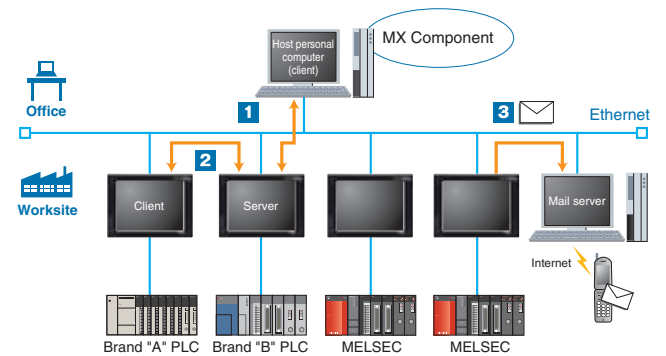

The GOT transmits data from connected FA devices to the server personal computer database via SQL statements.

- For communication with the database, just specify the necessary data in GT Works3 without programming. There is no need to use a gateway personal computer and complicated programs to communicate with the MES database server.

## 3 Mail send function

- The alarm history display function can transmit alarm occurrences and recovery information by e-mail to personal computers and mobile phones.
- The SMTP server port should be set to 25 (fixed). The SMTP authentication is not supported.

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

## MES interface function

- DB link function (tag function / trigger buffering function / trigger monitor function / SQL statement transmission function <SELECT / SELECT multiple data / UPDATE / INSERT> / calculation processing function / program execution function / DB buffering function)
- SNTTP time synchronization function
- Resource data transmission function
- Diagnosis function
- DB server function (ODBC connection function / connection setting function / log output function)

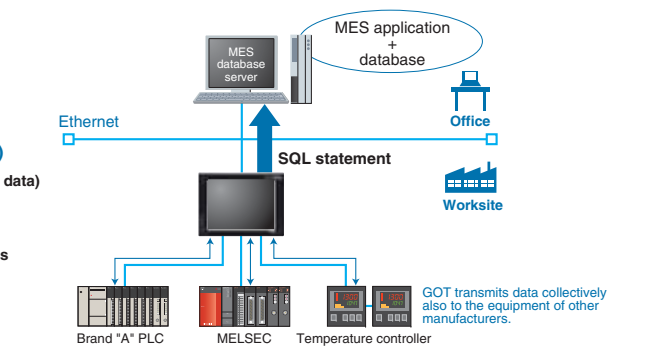

## Usable databases

- Oracle® 8i/9i/10g/11g
- Microsoft® Access® 2000/2003/2007/2010
- Microsoft® SQL Server® 2000/2005/2008
- Microsoft® SQL Server® 2000 Desktop Engine (MSDE2000)
- Wonderware® Historian 9.0

\* : Compatible only with 32-bit versions.

## <MES (Manufacturing Execution System)>

A manufacturing execution system (MES) is a system which controls and manages production processes at a worksite in order to optimize quality, productivity, delivery date, and cost.

\* : Not supported by the GT16 Handy.

Mitsubishi Electric e-Factory presents the appropriate products to connect production information and MES (manufacturing execution system) to improve productivity of clients' plants.

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

## Efficient input of extensive comment data

GRAPHIC OPERATION TERMINAL GOT 1000

### Comment groups

● CSV/Unicode text format files can be imported. Multiple files can also be imported to individual comment groups, allowing the task of inputting comments to be distributed among several workers, greatly reducing the required input time.

● Automatically adjusts character size and inserts line feeds according to the object size.

- <Supported objects>
- Touch switches or lamps where "comment group" is selected for labels
  - Comment displays where "comment group" is used

## Easy creation of multilingual screens

GRAPHIC OPERATION TERMINAL GOT 1000

### Multilingual support

● By using comment groups, different language comments can be created for each comment group column to switch the display language.

● Comment group comments can be created freely for applications, as well as for different languages.

● You can specify the column number of the comment group to change the language of the startup message on the GOT.

\* : Refer to "Comment groups (page 36)" for the details of comment groups.

● The system alarm and utility screen display languages can be changed in conjunction with the language selection function.

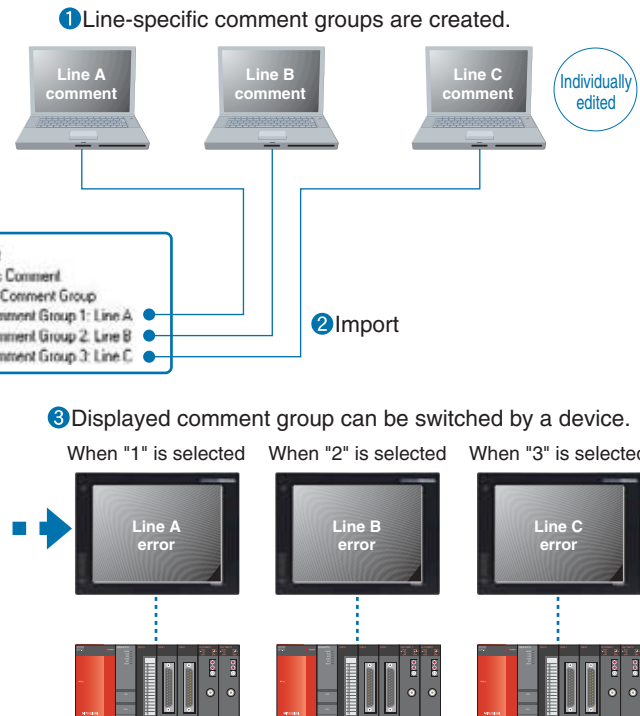

### Convenient for language switching

When stroke fonts are used with switching languages for touch switches, lamps or comment displays, the character size is automatically adjusted by the size of the object. There is no need to adjust the size of the object when creating a multi-language screen.

## Management of project data line by line is no longer required.

Example of comment group use

## Easily create complex recipe data

GRAPHIC OPERATION TERMINAL GOT 1000

### Advanced recipe function

This function allows material combination data and processing conditions data (device values) to be held in the GOT, with only required data being written to and read from the PLC.

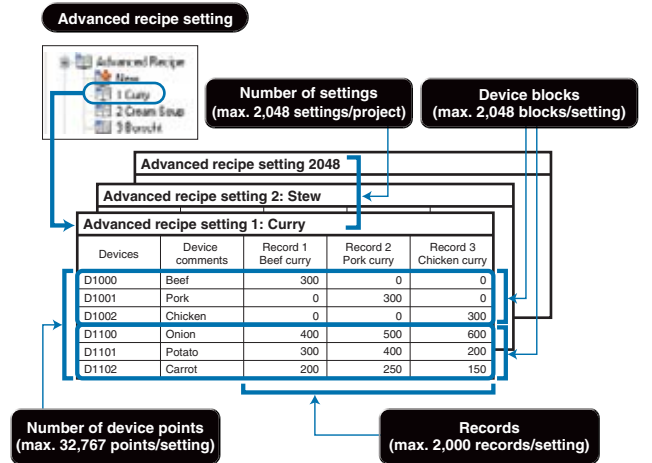

An extensive number of settings and flexible recipe data can be created

● Up to 2,048 blocks can be used, each block is comprised of sequential word devices, an arbitrary word device (1 point), and a bit device (1 point).

● Because devices also permit bit and word combinations and arbitrary device settings, there is no need to centralize the sequential devices used, thereby reducing the total number of device points used.

● Advanced recipe files can be converted into CSV or Unicode format text files, and can be edited on a personal computer.\*

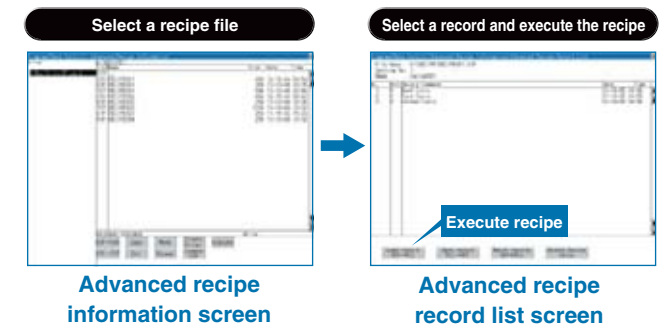

\* : The advanced recipe file has a binary format. It must therefore be converted to either a CSV file or a Unicode text file by using GT Works3, the GOT utility, or an external control trigger device. After being converted, only the device values can be edited. When more than 251 records are included in an exported Advanced Recipe file (CSV or Unicode text format), use a text editor or Microsoft Excel 2007 or later to open the file.

### Easy handling of recipe data using the GOT

● Recipes can be handled easily with the GOT's utility function without having to create a recipe operation screen.

● CSV/Unicode text files can be converted into binary format files on the GOT. Even without GT Works3, you can edit data on a personal computer and use it on the GOT.

## For better work efficiency and enhanced customization functions

GRAPHIC OPERATION TERMINAL GOT 1000

### Script function

#### Project script/screen script

● Control statements, file operation functions, string operation functions, etc. can be specified to a project or to individual screens.

#### Object script (For GT16/GT15/GT14 only)

● Drawing functions and display control functions can be specified per object. Object functions can be expanded, for example, to change colors and display positions and to freely draw graphics.

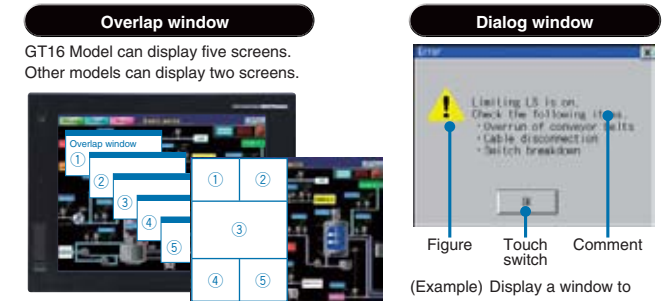

Controlling the GOT display with scripts can reduce load on the controller and enhance maintenance performance. The editor includes input support that makes it easy for you to write scripts.

## Extreme freedom in designing that enables you to create more effective screens

GRAPHIC OPERATION TERMINAL GOT 1000

### Various types of window screens

● Use overlap windows and dialog windows to create various types of screens.

(Example) Hide the title bars to view the screens as divided windows (GT16)

Key window: There is no need to create keypads for numerical input and key windows for ASCII input. When using a QVGA model, the key window screen size can be set from small to large. NEW

When entering ASCII characters, you can switch windows to display character selection windows.

# Standard functions to provide users with straightforward operation

For initial startup & operations

## Dramatically improved GOT overall response

GRAPHIC OPERATION TERMINAL GOT 1000

### Drawing, computing, communication—a trio of high-speed response functions

The GOT1000 series offers faster response in drawing, computing and communication, reducing monitoring and operation load.

#### High-speed drawing

- Sharp and quick drawing of complex, layered component screens, and detailed photographic data in 65,536 colors.
- The GT16 further speeds up drawing operations.

#### High-speed computing

- Ultra-high performance processing power to satisfy the most complex and demanding of applications.

#### High-speed communication

- High-speed communication is possible for connections with both Mitsubishi and third party PLCs.

For connectable PLC models, see "List of connectable models" (page 65 to page 69).

## Adjust brightness according to surroundings

GRAPHIC OPERATION TERMINAL GOT 1000

### Backlight brightness adjustment

- Consider the conditions in the operation environment (daytime/nighttime etc.) and user comfort. You can adjust the brightness of the backlight while viewing the user screen.
- By using the script function or the status monitor function, you can automatically adjust the brightness according to conditions.

The touch switches for brightness adjustment are registered in the system library.

## Easy-to recognize backlight state

GRAPHIC OPERATION TERMINAL GOT 1000

### Color-coded front face LED

- The color of the LED on the front of the GOT unit indicates whether the backlight is OFF or has expired.

#### [Power LED: Color-coded message]

<b>Green ON</b>	When normal power is being applied	<b>Orange/green blinking</b>	When backlight life has expired
<b>Orange ON</b>	When in screen-save mode	<b>OFF</b>	When power is not being supplied

## For planned commodity maintenance

GRAPHIC OPERATION TERMINAL GOT 1000

### GT16 GT15 Maintenance time notification function

- The cumulative backlight ON time is automatically monitored, and the operator is notified when maintenance is required. This facilitates scheduled maintenance and prevents system malfunctions.

<Subject to be monitored> Backlight, display area, touch keys, and built-in flash memory

**Warning! Backlight needs replacement soon.**

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

### GT16/GT15 response performance comparison

[Using MELSEC Q series] As of March 2012

The monitor screen includes about 250 points of word devices.

# To minimize production time, the GOT provides the user with worksite-required functions

For initial startup & operations

## Easy data transmission without opening the cabinet

GRAPHIC OPERATION TERMINAL GOT 1000

### Equipped with front USB interface\*1

\*1 : Back face layout for GT12.

#### USB device (Mini-B)

- Connect the USB device (Mini-B) port to a personal computer. You do not need to open the panel to transfer operating systems and project data or to use the FA transparent function.

\* : To connect the GOT to a personal computer, use the dedicated USB cable. For more details, see "Product list" (page 74 to page 80).

With USB environmental protection cover installed (standard feature) **IP671** \*

\* : This does not guarantee protection in all users' environments.

## Sequence program and parameters can easily be modified at the worksite

GRAPHIC OPERATION TERMINAL GOT 1000

### FA transparent function

- Connected with a personal computer, the GOT acts as a transparent gateway to enable programming, start up, and adjustment of FA equipment.
- Users do not have to bother with opening the cabinet or changing cable connections. (When using the USB interface)
- The FA transparent function can be used when a GOT and a personal computer are connected via USB, RS-232 or even using an Ethernet connection. (Supported only by GX Works2, MX Component/MX Sheet, MT Works2, MR Configurator2)
- When a GOT is directly connected to a FXCPU (CC-Link master station), CC-Link slave stations can be accessed from a personal computer. **NEW** (Connection between the GOT and the personal computer is USB or RS-232)

## USB host (TYPE-A) (For GT16/GT14 only)

- Operating systems, project data, and resource data can be stored in a USB memory device.
- A USB mouse/keyboard can also be used by connecting to the USB host interface.

\* : The USB host interface of the GT14 model is on the rear side.

#### <Example of the use of a USB memory>

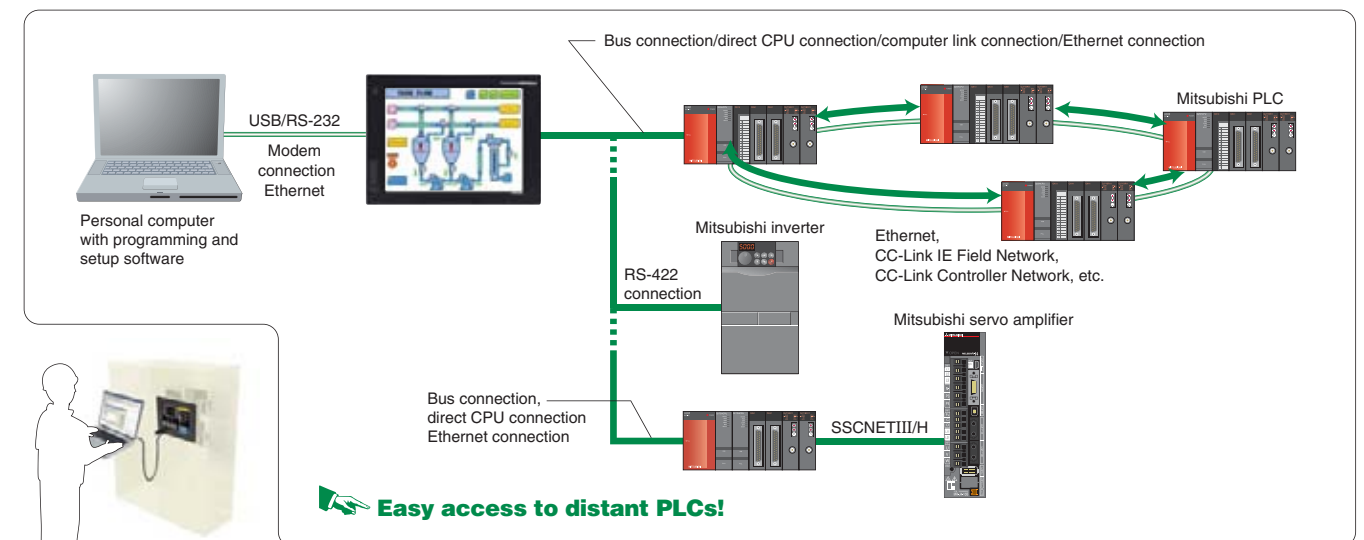

#### Supported software\*

- MELSOFT Navigator
- GX Works2
- GX Developer
- GX Configurator-AD/DA/SC/CT/TI/TC/AS/FL/PT/QP
- PX Developer
- FX Configurator-FP
- FX3U-ENET-L Configuration Tool
- MT Works2
- MT Developer
- MR Configurator
- MR Configurator2
- FR Configurator
- RT ToolBox2
- NC Configurator
- MX Component/MX Sheet
- GX LogViewer
- LCPU Logging Configuration Tool

\* : The version of the software depends on the system configuration. For more details, see the GOT1000 Series Connection Manual (Mitsubishi Products) for GT Works3.

\* : For the software access range when using the FA transparent function, refer to the manual of the software being used.

Easy access to distant PLCs!

IQ Platform

MELSEC Process Control

Specifications, External Dimensions

List of Connectable Models, etc.

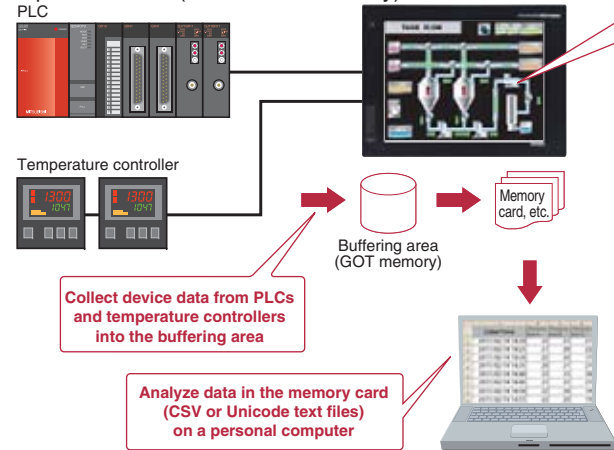

# The GOT provides complete traceability for safe and secure operation

For maintenance personnel

## Smooth operation from the collection of various data to storage of time-series data

### Logging function/historical trend graph/historical data list display

- Collecting data from temperature controllers and other units with the GOT can reduce the load on the PLC.
- Logging data is saved in the built-in SRAM even during a power failure. (For GT16/GT14 only)

### Display with graphs Historical trend graph

- After collecting data with the logging function, you can display the data in a time series.
- Scroll the view or specify the time so that you can check necessary data easily.
- Logging data to be displayed can be specified indirectly. **NEW**

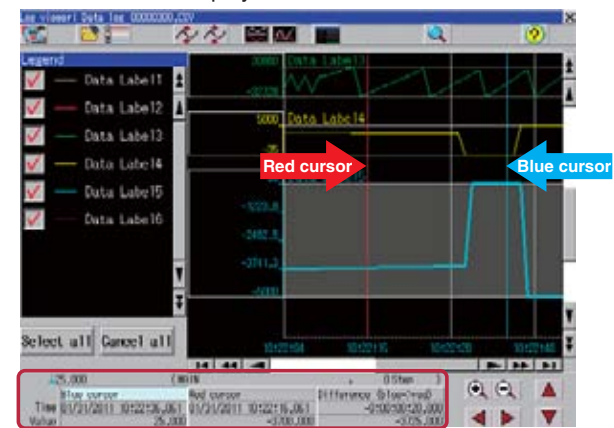

### Display with values Historical data list display

- Data collected with the logging function is displayed in list format.
- The historical trend graph for a specific time can be displayed by specifying the time.

## Display logging data of a LCPU and high speed data logger module on the GOT

### Log viewer function

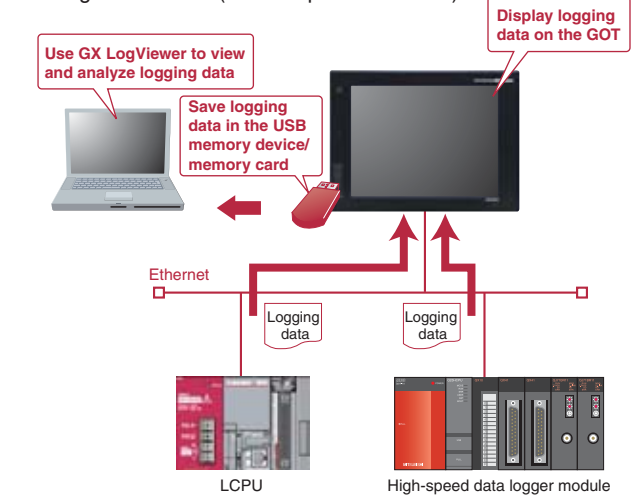

- Logging data collected by a LCPU or high speed data logger module can be displayed on the GOT.
- <Data to be displayed> Data logging (historical display)
- By displaying two cursors (multi-cursor), changes in data can easily be checked.
- The collected logging data can be searched for by time or index No. and displayed.

You do not need to have a PC onsite. Check logging data from the GOT, and you can take corrective actions quickly.

### Logging data can be collected without opening the cabinet

- In a USB memory device attached to the USB interface on the front of the GOT, you can save logging data of the LCPU and high speed data logger module. In this way, you can collect the logging data easily with the GOT without removing the SD card from the LCPU or the CF card from the high speed data logger module.
- Connect a personal computer to the front USB interface of the GOT to view the LCPU logging data with the GX LogViewer, or to change the logging settings with the LCPU Logging Configuration Tool. (FA transparent function)

## Enhanced security system using password control

### Operator authentication function

Option ① Enter the operator name and password to log into the system.

Option ② Use the ID card or ID tag to log in to the system.\*

Option ② can be used at the same time. Redundancy in case of an external authentication device failure.

Login OK

The screen appears, enabling operation!

Operator information can be registered and edited by the GOT operator management information conversion tool or from the main unit of the GOT.

Memory card, etc.

Jon Smith is now logged-in

Jon Smith is not authorized to change the set value of "Torque 3".

The GOT operator management information conversion tool is included with GT Works3.

\* : Combined with the operation log function, who, what, when, and how the operator operated can be recorded. See "Operation log function".

Setting the level (authority) of operation and display for each operator can strengthen security and prevent operation errors.

## Very helpful for identification and analysis of causes of incorrect operation

### Operation log function

- Operations performed by operators on the GOT can be recorded with respect to time, making it possible to check when, what, and how the operation was performed.

- List operations by type and easily search for specific device and GOT operation state changes.
- <Specifiable operations> Touch switch operation, numerical value input operation, security level change, screen change, etc.
- Recorded log data is saved in the memory card and is available for checking on the GOT main unit or on a personal computer (CSV or Unicode text files).
- \* : Use of this function together with the operator authentication function enables recording of "who" has operated. See "Operator authentication function".

A problem occurs

Check log on GOT

Record the operation log

Check log outline

Check log details

More detail

Date/Time: 11/14/2008 16:43:10

Function : NUM\_VAL

Numerical input

Screen No. : BASE\_2

Operation : Torque 1 set value

Operator : JonSmith (ID:1)

User ID : -

Action No. : 1

Data Type : BIN16

Device : D100

Change To : 100

Chng From : 10

Refer to the operation log file, and investigate the problem source.

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

Example ) At 16:43:10 on November 14, 2008, Jon Smith changed the Numerical Input data entry to change the D100 value from 10 to 100 in "Torque 1 Set Value" on the BASE\_2 screen.

INDEX

List of Connectable Models, etc.

## Back up important sequence programs for assurance in case of an emergency

### Backup/restoration function

#### With backup and restore, fear troubles no more

- The sequence program and parameter data of the PLC CPU and motion controller, etc. can be backed up to the memory card in the GOT.
- Users can perform batch operation to restore the data to the PLC CPU or motion controller.

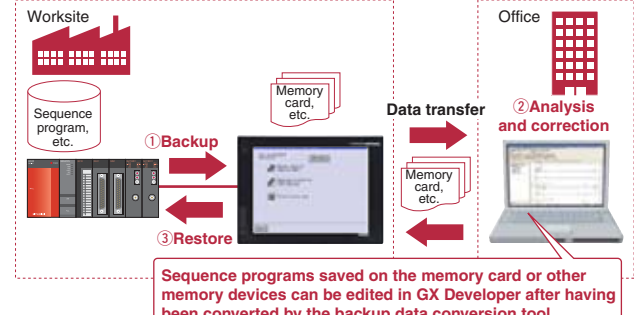

#### Example of use ①

Make a data backup in case of a PLC or CPU failure or a dead battery to quickly replace the faulty device and restore the system using the backup data in such a case.

#### Example of use ②

When a problem occurs, or when the PLC CPU program is updated, the sequence program data can be transferred, analyzed, and corrected without requiring an experienced engineer, increasing time and cost efficiency.

- <Objective data> Programs, parameters, device comments, device initial value data, file registers, etc.
- <Objective model> MELSEC Q-Series (excluding Q12PRH/Q25PRHCPU), L-Series, FX-Series, Q-Series motion controllers (SV13/SV22 only), CNC C70, Robot controller (CRnD-700, CRnQ-700)
- <Usable connection type> Bus connection, CPU direct connection, computer link connection, Ethernet connection

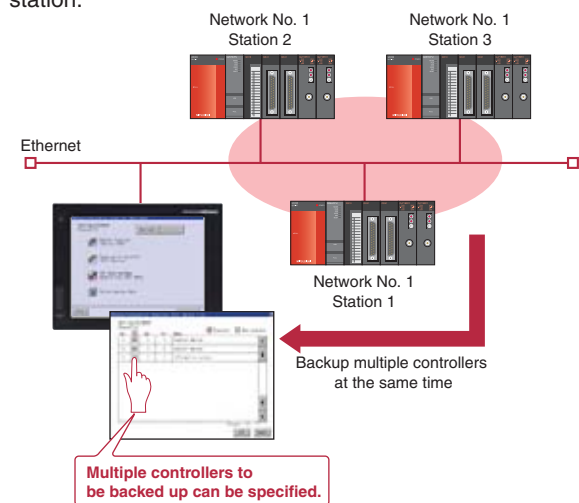

The backup data conversion tool is included with GT Works3.  
 \* : The backup data of Q00J/Q00/Q01CPU and FXCPU cannot be converted with the backup data conversion tool.  
 \* : Once backup data created with GX Works2 is converted by using the backup data conversion tool, the data cannot be edited with GX Works2.

## PLC CPU programs can be easily changed without a personal computer at the worksite or any previous GX Developer knowledge.

\* : When replacing the PLC CPU, the restoration function may not be available depending on the system configuration and connection type.

### Backup multiple controllers at the same time

- Multiple controllers can be backed up at the same time over Ethernet. Target controllers for backup can be specified per station.

### Automatic backup is available

- Besides automatic backup from touch switches, you can specify a trigger device, a day of the week, and time for automatic backup.

### Password for enhanced security

- Define a password to perform password authentication when executing backup/restoration.

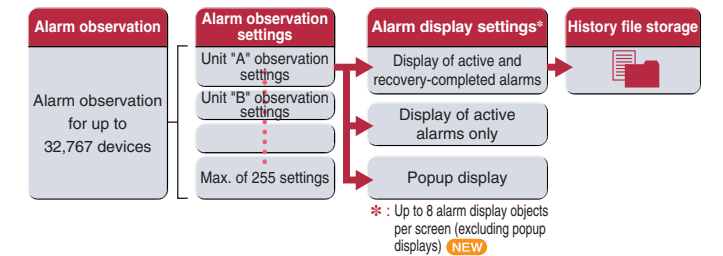

## Clear communication minimizes machine downtime even during an alarm

### Advanced alarm

#### A wider monitoring range protects even large-scale systems

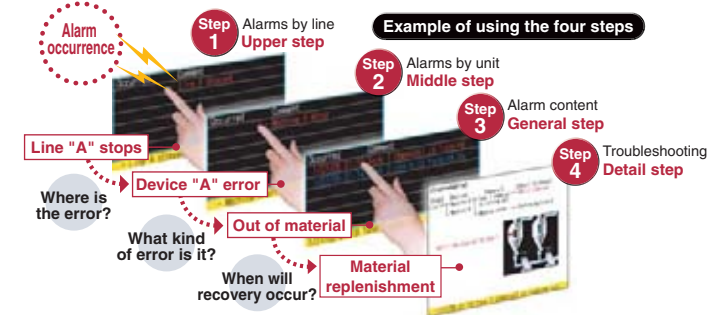

- Alarm observation is possible for up to 32,767 devices with a maximum of 255 alarm observation setting groups.
- Batch display of large amounts of alarm information in large-scale systems, and unit-specific classification for easy management.
- Alarm log data can be saved in the built-in SRAM even during a power failure. (For GT16/GT14 only)

#### Rapid detection and corrective action for a wide array of alarms

##### Four-step alarm notification

- Alarm occurrence conditions can be divided into 4 steps and conveyed to the operator in an easy-to-understand, step-by-step format.
- The four-step display makes it easy to take in and sort out alarm conditions (information such as where, what, and how). This enables efficient troubleshooting when multiple problems occur.

##### Group-specific & level-specific displays

- Alarms can be classified by group and level, with only specified alarms being displayed.

##### Easy searching with time designation

- Specify a time and easily check the required data.
- When used with the historical trend graph, by specifying the time at which an error appears to have occurred on the graph, the state of alarm occurrence at that time can easily be viewed.

##### Easy-to-understand display

- The use of colors and popups produce easily recognizable alarm displays.

##### Improved system alarms

- The PLC/GOT/Network monitoring subject can be specified in advance, with only those specified alarms being displayed.

##### Support in identifying alarm causes (utility function)

- Alarm occurrence conditions can be displayed in a time-series graph form.
- Alarm occurrence counts can be displayed in bar-graph form.

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

## The GOT Ladder Monitor Function is greatly improved with the One-Touch Ladder Jump function

### GT 16 GT 15 Ladder monitor function

MELSEC Q/QS/L/QnA/A/FX series PLCs, CNC C70, MELDAS C6/C64 sequence programs can be monitored in a circuit diagram (ladder format).

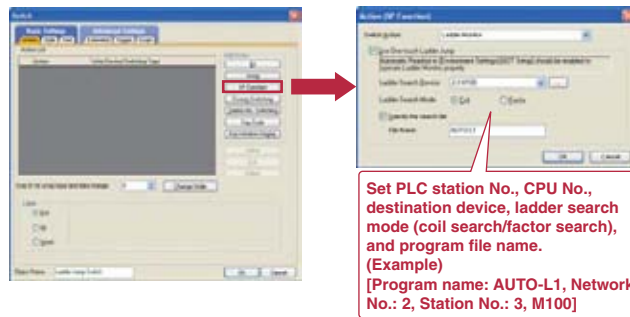

### Defect search with the One-Touch Ladder Jump function (Q/L/QnA series, CNC C70)

- By setting a program name and coil number of the PLC to a touch switch, the relevant ladder circuit block can be displayed directly.

- \* : Supported by XGA/SVGA/VGA models.
- \* : QS series models can only monitor the ladder program of a Q/L/QnA. It cannot alter device values, for instance.
- \* : FX3G(C) CPU is not supported.

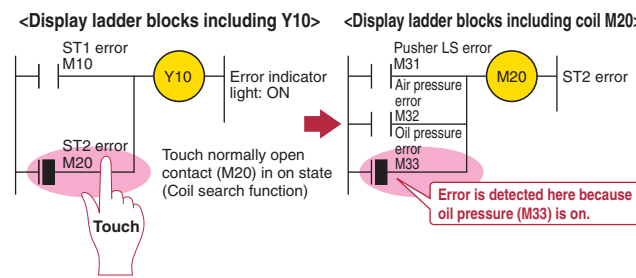

- Select [SP Function]-[Ladder Monitor] from the touch switch property dialog.

### Wide monitoring range and useful functions make maintenance work more efficient!

- Not only connected PLCs, but also PLCs of other stations, multiple CPUs, multiple programs in the CPU, and local devices can be monitored.
- The programs and comments of multiple connected controllers can be saved in a memory card, so the ladder data can be switched and displayed without reading the data from the PLC.(Q/L/QnA series)
- Device values and timer (T) / counter (C) set values can be changed.
- Used together with the alarm history, a back-tracking ladder search can be performed to find the contact which triggered the alarm. <Defect search>
- Simply touching the Ladder Monitor screen can execute a coil search and contact point search. (Q/L/QnA series) <Touch search>
- The number of ladder program lines displayed on a XGA model has increased thus it is more user-friendly than ever.

### Example of touch search (when error indicator light [Y10] is on)

Since the source of operation halts and interlocks can be easily checked, unexpected problems can be detected quickly.

## Simple and easy! Use the GOT to correct ladder programs, no need for a PC!

### GT 16 GT 15 Ladder editor function

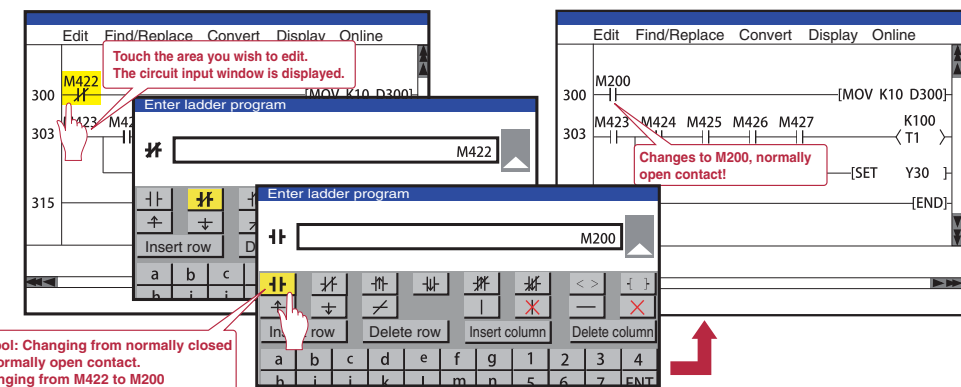

Sequence programs of MELSEC Q (Q mode)/L series PLCs and CNC C70 can be edited in the ladder format.

### Ladder programs can easily be edited on the GOT at the worksite

- Just touch the portion (e.g. contact points, vertical lines) you want to edit in the ladder program. You can enter, change, or delete circuit symbols and devices. You can also insert or delete vertical lines and horizontal lines as well as columns and rows.

- \* : Supported by XGA/SVGA/VGA models excluding 5.7" types.
- \* : QnPHCPU/QnPRHCPU are not supported.

- Search and replace of devices makes it easy to locate the point to be edited. You can also make two or more modifications in one operation.
- Statements and notes can be edited.
- The details edited last can be restored (undone).

### Writing into PLC while it is in operation

- Edited programs can be written from GOT to a PLC even if it is in operation. You do not need to stop equipment in operation to correct ladder programs.
- Remotely change the PLC's mode to "STOP" or "RUN" from the GOT.

### Grasping CPU status with PLC diagnosis

- The CPU operation status and current errors can be monitored.

### Long access range and convenient functions for efficient maintenance!

- Besides a directly connected PLC, you can edit multiple programs on another station's PLC, multi CPU, or CPU in the same network.
- You can view current values, perform a search, and conduct a device test.
- The one-touch ladder jump function is available. This is helpful to identify problem causes.

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

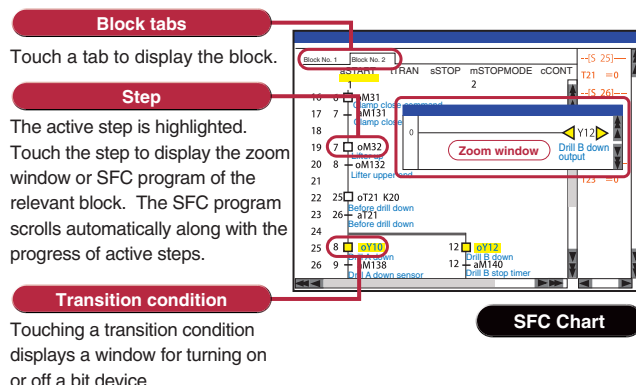

## Monitor SFC programs on the GOT to make troubleshooting even easier

### GT 16 GT 15 SFC monitor function

MELSEC Q/L series PLC SFC programs (MELSAP3, MELSAP-L) can be monitored in a graphical format.

- Viewing the block list or active step list enables you to see the complete status at a glance.
- Touch an SFC chart or a zoom window to specify a device. Then, the Ladder Monitor function displays other sequence programs that use the specified device.
- A device test can easily be conducted from a SFC chart or block list.
- Save programs and comments in the memory card of the GOT. They can be retrieved at a moment's notice.

- \* : Supported by XGA/SVGA/VGA models.

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

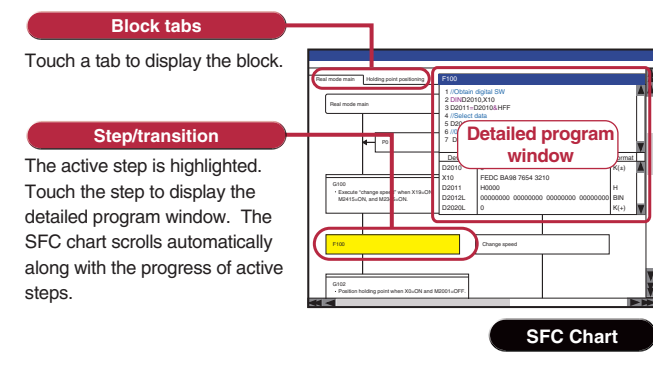

## Use the GOT to monitor a motion SFC program

### GT 16 GT 15 Motion SFC monitor function

Motion SFC programs of the Mitsubishi Motion Controller (Q Series) can be monitored.

- Viewing the batch program monitor or the active step list enables you to see the complete status at a glance.
- The detailed program window allows you to monitor programs and current values of operation control steps and transitions.
- Save programs in the memory card of the GOT. They can be retrieved at a moment's notice.

- \* : Supported by XGA/SVGA/VGA models.

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

## Monitor and change Mitsubishi FA devices

GRAPHIC OPERATION TERMINAL GOT1000

### System monitor function

- The devices of PLCs, motion controllers, CNCs and robot controllers can be monitored and changed.
- \* : Only monitoring, but not changing device values and other operations, is available with the QSCPU.
- The current values and setting values of timers (T) and counters (C) can be changed.
- The buffer memory (BM) of an intelligent function module can be monitored and changed.

## At-a-glance monitoring of network status

GRAPHIC OPERATION TERMINAL GOT1000

### Network monitor function

- Enable monitoring of network line conditions of the CC-Link IE Controller Network, CC-Link IE Field Network, MELSECNET/H, MELSECNET/10, and MELSECNET II on a dedicated screen.
- Communication line and information from the host and other stations can be monitored to check the communication status.

## Easy adjustment of Q series motion controller

GRAPHIC OPERATION TERMINAL GOT1000

### Q series motion monitor function

- Up to 3 Q-type motion controllers can be used on a single base, with monitoring and parameter settings possible.
- Access to other stations is also possible.
- <Objective models>
- Q172DS/Q173DSCPU **NEW**
- Q172D/Q173DCPU (-S1) • Q170MCP
- Q172H/Q173HCPU • Q172(N)/Q173(N)CPU
- \* : Supported only if the Q series motion controller CPU has the SV13/SV22 OS version. Moreover, available functions of the Q series motion monitor vary according to the CPU type or the servo amplifier model.

## Easy startup and adjustment of a servo amplifier

GRAPHIC OPERATION TERMINAL GOT1000

### Servo amplifier monitor function

- In a system which outputs pulse strings, the GOT can be connected to a servo amplifier in a serial connection to perform the following operations: set up, monitoring, alarm display, diagnosis, parameter setting, and test operations.
- MR-J4-A is supported. **NEW**
- \* : Available monitoring functions vary according to the servo amplifier type.

## Easy-to-understand display of buffer memory values and I/O information

GRAPHIC OPERATION TERMINAL GOT1000

### Intelligent module monitor function

- Buffer memory values of intelligent function modules (e.g. QD75MH) and the ON/OFF status of I/O units can be monitored and changed.
- When a QCPU (Q mode), a QSCPU or a LCPU is in use, CPU operating status and existing errors can be monitored by PLC diagnosis.
- The status of the LCPU built-in I/O function can be checked.
- QD77MS, QD73A1, and LD75 are supported. **NEW**
- \* : Supported by XGA/SVGA/VGA models.

## Easy maintenance of MELSEC-L Series

GRAPHIC OPERATION TERMINAL GOT1000

### MELSEC-L troubleshooting function

- The maintenance screen dedicated to LCPU is installed. Without designing new screens and even without using a personal computer, you can check CPU status/error information easily.
- Just touch the dedicated screen. You can jump to a function screen such as the intelligent unit monitor to quickly take corrective actions on site.

## Save space and cost when no dedicated display device is required

GRAPHIC OPERATION TERMINAL GOT1000

### CNC monitor function/CNC data I/O function

- CNC monitor function**
- Connecting to a CNC (C70, C6/C64) enables functions such as position display and alarm diagnosis, and allows tool offset parameters to be set.
- CNC data I/O function**
- This function can be used to copy and delete CNC C70 work programs, parameters, etc.

\* : Supported by XGA/SVGA models.

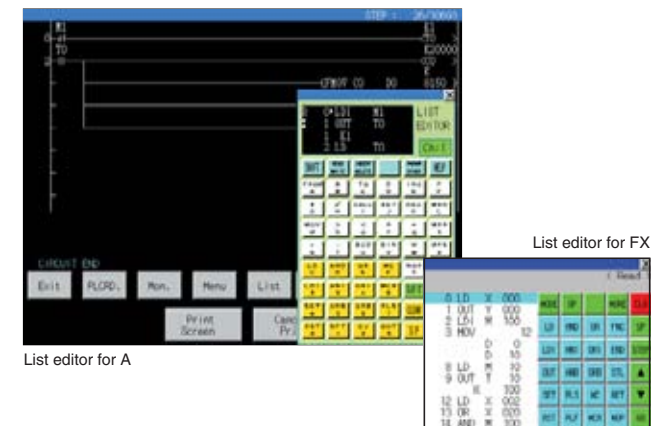

An optional device may be necessary. For details, see "Selection of optional units and devices" (page 81).

## Convenient method for minor program changes onsite

GRAPHIC OPERATION TERMINAL GOT1000

### List editor for A/List editor for FX

- MELSEC-A series, FX series PLC sequence programs can be edited in list format (instruction word).
- Permits minor program changes onsite, even without a peripheral device.
- Used together with the ladder monitor function, the GT16 and GT15 can edit sequence programs while viewing the ladder data.

List editor for A

List editor for FX

# Powerful features even down to the most basic

# GT10

# GOT

## Various screen sizes

The GT10 now offers a line of models with 5.7" and 4.7" screens, enabling more flexible screen layouts. The 4.5" and 3.7" wide screen models are also available with a white frame.

**GT1050/GT1055** **5.7inch**

- QVGA 320 × 240 dots
- Matrix touch panel
- Minimum touch key size: 16 × 16 dots
- Maximum number of touch keys: 50/Screen

**GT1040/GT1045** **4.7inch**

- QVGA 320 × 240 dots
- Matrix touch panel
- Minimum touch key size: 16 × 16 dots
- Maximum number of touch keys: 50/Screen

**Black frame**

**White frame**

**GT1030** **4.5inch**

- 288 × 96 dots
- Matrix touch panel
- Minimum touch key size: 16 × 16 dots
- Maximum number of touch keys: 50/Screen

**Black frame**

**White frame**

**GT1020** **3.7inch**

- 160 × 64 dots
- Analog touch panel
- Minimum touch key size: 2 × 2 dots
- Maximum number of touch keys: 50/Screen

## Similar dimensions to the F900 Series allows for simple replacement without panel design changes\*1

\*1 : When the F940GOT is replaced with the GT1050/GT1055 or when the F930GOT is replaced with the GT1030

**GT1050/GT1055**

The GT1050, GT1055, and F940GOT are of the same size, 5.7", with the same LCD, QVGA 320 × 240 dots. They are highly compatible.

**F940GOT ▶ GT1050/GT1055**

● QVGA 320 × 240 dots in each model

**GT1030**

The GT1030 has the same panel mounting dimensions as the F930GOT yet with improved resolution\*2.

**F930GOT ▶ GT1030**

\*2 : 1.44 times higher resolution compared with the F930GOT

Resolution ×1.4

## FA transparent function

When a GOT and a personal computer are connected, the FA devices can be programmed, started and adjusted via GOT.

**GT1050/GT1055**  
**GT1040/GT1045**  
**GT1030** **GT1020**

**GX Works2**  
**GX Developer**

Connect a PC with PLC via GOT.

**FA transparent**

Direct connection with FX/Q/L/QnACPU  
Q/L/QnACPU serial communication unit connection etc.

## GOT multi-drop connection

By using the serial multi-drop connection unit, the GT01-RS4-M, up to 16 GOT1000 units can be connected. The total distance can be up to 500m.

Mitsubishi PLC MELSEC Series FX, A, QnA or Q

\* : See relevant manuals for connectable hardware and software versions.  
\* : GOT multi-drop connection is also available for GT16, GT15, GT14, GT12, and GT11.

## Connection to Mitsubishi inverters and AC servos

Direct connection to Mitsubishi inverters and AC servo amplifiers with RS-485 makes it easy to adjust parameter settings etc.

Monitoring Parameter adjustment

Monitoring Operation commands

Can connect up to 32 axes of Mitsubishi general-purpose AC servos with a total extension of 500m.

Can connect up to 31 Mitsubishi general-purpose inverters with a total extension of 500m.

\* : See relevant manuals for connectable hardware and software versions.

## Common software functions

GT10 includes convenient functions of more advanced models in a compact package.

- Preinstalled OS to enable immediate use
- Choose your font
- A variety of alarm functions and window functions
- The recipe function and multi-action switch for reducing sequence program load
- Displaying custom startup screens
- Display in a variety of languages and comment switching function
- Screen save function
- Hard copy function **NEW** (connectable to a serial printer)

### Functionality

Common	<ul style="list-style-type: none"> <li>○ Screen (base: max. 1,024 screens, window: max. 512 windows)</li> <li>○ Fonts (standard (6 × 8 dots: Gothic, 16 dots: Gothic [except GT1020]/high quality/TrueType/Windows)</li> <li>○ Screen switching function, screen call-up function, language switching function, password, system information, setting connected devices, and startup logo</li> </ul>
Drawing and graphics	<ul style="list-style-type: none"> <li>○ Straight lines, continuous lines, rectangular, polygons, chamfered quadrangles, circles, ellipses, arcs, elliptic arcs, circular sectors, and elliptic sectors</li> <li>○ Division indication</li> <li>○ Painting</li> <li>○ Images (BMP/DXF)</li> </ul>
Objects	<ul style="list-style-type: none"> <li>○ Comment registration (basic comments and comment groups)</li> <li>○ Parts registration</li> <li>○ Data computing function</li> <li>○ Offset function</li> <li>○ Security function</li> <li>○ Lamp indications</li> <li>○ Touch switches</li> <li>○ Numeric indications and input</li> <li>○ ASCII indications and input</li> <li>○ Clock function (GT1050, GT1055, GT1040, GT1045, GT1030: Integrated clock, GT1020: Read from the PLC clock)</li> <li>○ Comment displays</li> <li>○ Alarm list and alarm history</li> <li>○ Parts display</li> <li>○ Panel meters</li> <li>○ Trend graphs, kinked line graphs, bar graphs, statistic crossbar graphs, statistic circular graphs</li> <li>○ Status monitor function</li> <li>○ Recipe function (4,000 points)</li> <li>○ Time action function</li> </ul>

\* : See the manual for details.

## Supporting the GT Works3 simulator function

Created screens can be easily debugged without an actual machine.

**Easily debug with a PC**

Click!

Using the GX Works2 simulator, the sequence program can also be debugged simultaneously.

\* : Supported with GT Works3 Ver. 1.22Y or later.

## Data transfer for improved user-friendliness and flexibility

Optional memory board and memory loader provide a convenient way to download project data and operating system data to terminals without a PC. Furthermore when downloading to multiple units speed and efficiency is increased.

**Data transfer memory board GT10-50FMB**

**GT1050/GT1055**  
**GT1040/GT1045**

Install a memory board storing the newest data

Data can be read or written as shown in the utility window below.

Data is written at startup when two points are pressed on the screen.

Basic OS, communication driver, and project data

Read/Write

**Memory loader GT10-LDR**

**GT1030** **GT1020**

- Has a compact design (70 × 110 mm), where the GOT transfer cable can be stored inside the body.
- Can write the standard monitor OS, communication driver, and project data.
- Can read the project data and resource data.
- Offers simple switch type operation, where the write-protect switch prevents erroneous reading.
- Does not require a power supply as power is supplied from the GOT or personal computer.

At the desk: Standard monitor OS, communication driver, project data, resource data\*1

At the worksite: Standard monitor OS, communication driver, project data, resource data\*2

Read/Write

Read/Write

PC (GT Works3)

USB cable (1m) packed together

RS-232 transfer cable (0.2m) incorporated

GT10-LDR

GT1020/GT1030

\*1 : Only the standard monitor OS and communication driver can be written and only resource data can be read.  
\*2 : Only resource data can be read.

# Real-time multi CPU access with the iQ Platform

Mitsubishi FA Integrated Platform optimizes the front line of production

## Platform

"iQ Platform," the next generation integrated platform

- integrated Q
- improved Quality
- intelligent & Quick
- innovation & Quest

With high speed control and convenience fully assured, controllers compatible with the iQ Platform and the GOT1000 are the keys to higher productivity at lower costs.

PLCs, motion controllers, CNCs, robot controllers, and C controllers are integrated into one as controllers compatible with the iQ Platform. The GOT1000 integrates different types of monitor units that were previously connected to each controller.

### ① Reducing engineering cost

The FA integrated software suite, MELSOFT iQ Works, in which the GT Works3 screen design software is included, allows for efficient design of systems and monitor screens for each controller.

### ② Reducing spare parts cost

A single GOT1000 can take the place of several types of monitor units, greatly reducing equipment cost.

### ③ Powerful support for maintenance

The GOT1000 has a variety of useful maintenance functions such as the "Q motion monitor function" and "CNC monitor function," very capable of and reliable for troubleshooting. (GT16 and GT15 only)

Quickly reduce total costs by creating a seamless integrated engineering environment.

## MELSOFT iQ Works

- System Management Software [MELSOFT Navigator]
- Programmable Controller Engineering Software [MELSOFT GX Works2]
- Motion Controller Engineering Software [MELSOFT MT Works2]
- Servo Setup Software [MELSOFT MR Configurator2]
- Screen Design Software for Graphic Operation Terminal [MELSOFT GT Works3]
- Robot Programming Software [MELSOFT RT ToolBox2 mini]

# Create an easy-to-operate process control system.

## GOT1000 flexibly ties into process control.

**MELSEC PROCESS CONTROL** MELSEC will change process control. From dedicated systems to PLCs.

"MELSEC process control" is used in a wide range of applications from device process control to plant process control.

The GOT1000 can be used as the monitoring interface.

When used together with Mitsubishi FA devices, outstanding integration allows a high-performance process control monitor system to be created easily.

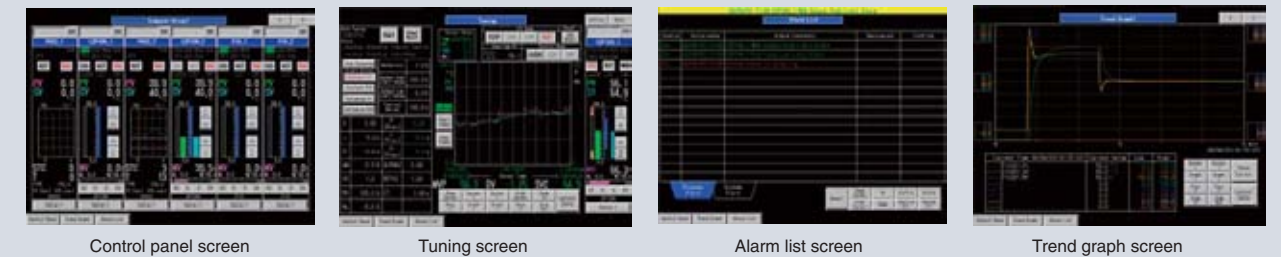

### Four benefits that MELSEC process control and GOT1000 (GT16/GT15) can offer.

#### ① PX Developer creates GOT process control monitor screens automatically

Based on the information such as tags defined by PX Developer, process control monitor screens for the GOT can be created automatically, greatly reducing the time required for screen design. GT Works3 can then customize the automatically created screens. By using the GT Works3 simulator function and GX Simulator, the operation of programs and screen data can be confirmed on a personal computer even without an actual machine.

\*: For details on the compatible software version and functions, see the PX Developer Operating Manual.

#### [Screen examples that can be created automatically]

#### ② Utilizing GOT1000 & GT SoftGOT1000 data

Only by using GT Works3 and PX Developer, a process control monitor system can be developed for both the worksite (GOT1000) and the remote monitoring location (GT SoftGOT1000). Screen data can be shared to monitor screens efficiently.

##### Worksite

##### Monitoring location

- Excellent anti-environment performance (IP67f) for operation in various types of worksites.
- The VESA mount adapter is available.

- Touch switches on the GT SoftGOT1000 can call up screens such as face plates and the alarm list of the PX Developer monitor tool.
- Since GOT1000 screen data can be used for GT SoftGOT1000 without modification, no screens need to be created just for the monitoring location.

\*: For more details, see "GT SoftGOT1000" (page 26)

#### ③ Process control parts library

Library of process control parts has been added. This allows a process control graphic screen to be created easily.

#### ④ Various GOT1000 functions are available for process and duplex CPU

The various GOT1000 functions usable with process and duplex CPUs support the maintenance work of the process control system.

- Operation log function
- Operator authentication function
- Backup/restoration function, etc.

\*: Connectable models and usable functions vary depending on the GOT main unit.

For more details, see "List of connectable models" (page 65 to page 69), "Function list" (page 70 to page 73) and "Notes for use" (page 81 to page 86).

# Specifications

## GT15

### General specifications

Item	Specification				
Operating ambient temperature <sup>*1</sup>	0°C to 50°C				
Other than display	0°C to 55°C				
Storage ambient temperature	-20°C to 60°C				
Operating ambient humidity <sup>*2</sup>	10 to 90%RH, no condensation				
Storage ambient humidity <sup>*2</sup>	10 to 90%RH, no condensation				
Vibration resistance <sup>*3</sup>	Conforming to JIS B 3502 and IEC 61131-2				
	Under intermittent vibration	5 to 8.4Hz 8.4 to 150Hz	Acceleration - 9.8m/s <sup>2</sup>	Half amplitude 3.5mm -	Sweep count 10 times each in X, Y and Z directions -
	Under continuous vibration	5 to 8.4Hz 8.4 to 150Hz	- 4.9m/s <sup>2</sup>	1.75mm -	-
	Conforming to JIS B 3502 and IEC 61131-2 (147m/s <sup>2</sup> , 3 times each in X, Y and Z directions)				
Impact resistance	Conforming to JIS B 3502 and IEC 61131-2 (147m/s <sup>2</sup> , 3 times each in X, Y and Z directions)				
Operating atmosphere	No oily smoke, corrosive gas or combustible gas, less conductive dust, away from direct sunlight (the same in storage)				
Operating altitude <sup>*4</sup>	2000m or less				
Installation location	In control panel				
Overvoltage category <sup>*5</sup>	II or lower				
Contamination level <sup>*6</sup>	2 or less				
Cooling method	Self-cooling				
Grounding	Type D grounding (100Ω or less). Connect to panel if unable to ground.				

- \*1: The maximum operating ambient temperature should be 5°C lower than that shown in the table on the left when connecting to a MELSECNET/H communication unit (GT15-J71LP23-25 or GT15-J71BR13) or CC-Link communication unit (GT15-J61BT13).
- \*2: Water bulb temperature for STN display type must be 39°C or lower.
- \*3: Refer to the Communication Unit User's Manual for vibration resistance specifications when using the MELSECNET/H communication unit (GT15-J71LP23-Z or GT15-J71BR13-Z) or CC-Link communication unit (GT15-J61BT13-Z). (The specifications of communication units are different from those of the GOT main unit.)
- \*4: Do not operate or store the GOT unit in pressurized environments where the pressure exceeds 0m elevation atmospheric pressure, as this could result in abnormal operation.
- \*5: Do not pressurize inside the control panel for air purge cleaning. The pressure could raise the surface sheet, making the touch panel difficult to operate or causing the sheet to come off.
- \*6: Assuming that the device is connected at some point between a public power distribution network and local system equipment. Category II applies to devices that are supplied with power from fixed equipment. The surge withstand voltage is 2,500V for devices with ratings up to 300V. Index that indicates the level of foreign conductive matter in the operating environment of the device. Contamination level 2 denotes an environment contaminated only by non-conductive matter which may, under certain conditions, become temporarily conductive due to condensation.

Do not use or store the GOT under direct sun light or in an environment with excessively high temperature, dust, humidity or vibration.

For inquiries relating to products which conform to UL, cUL, and CE directives and shipping directives, please contact your local sales office.

Panel cut dimensions	153(W) x 121(H) [mm]			
Weight (excl. mounting brackets)	1.1 [kg]			
Applicable software package	GT Works3 Version1.54G or later			

### Component names

- \*1: On LCD panels, bright dots (permanently lit) and black dots (never lit) generally appear. Because the number of display elements that exist on an LCD panel is large, it is not possible to reduce appearance of the bright and black dots to zero. Individual differences in LCD panels may cause differences in color, uneven brightness and flickering. Note that this is a characteristic of LCD panels and it does not mean the products are defective or damaged.
- \*2: Flickering may occur depending on the display colors.
- \*3: LC panels have characteristics of tone reversal. Note that even within the indicated view angles, the screen display may not be clear enough depending on the display color.
- \*4: Using the GOT screen save/backlight OFF functions prevents screen burn-in and extends the backlight life.
- \*5: An analog resistive touch display is used. When 2 points on the screen are touched simultaneously, if a switch is located the middle of the 2 points then the switch will be activated. Therefore, avoid touching 2 points on the screen simultaneously.
- \*6: The memory is ROM that permits overwriting of new data without having to delete the existing data.
- \*7: IP67 is supported when the USB environmentally protective cover is on. (The USB interface conforms to IP2X when a USB cable is connected.) However, this does not guarantee protection in all users' environments. The unit may not be used in an environment where it is exposed to splashing oil or chemicals for a long time or it is soaked with oil mist.
- \*8: Where more than one extension unit, barcode reader, and RFID controller are used, the sum of their current consumptions should be within the current level which the GOT can supply. For the currents which the extension units, barcode reader, and RFID controller consume and the current level which the GOT can supply, see "Notes for use" (page 81 to page 86).
- \*9: If necessary, use a stylus pen meeting the following specifications.
  - Material: Polyacetal resin
  - Pen point radius: 0.8mm or more
- \*10: When using a stylus pen with GT1595-XTBA, it will be 100,000 times or more (operating force 0.98N max.). Since the touch panel is a consumable product structurally, it may not be used even fewer than above, depending on the usage method and environment.

General specifications

Table with columns: Item, Specification. Rows include: Operating ambient temperature (Display: 0°C to 50°C; Other than display: 0°C to 55°C), Storage ambient temperature (-20°C to 60°C), Operating ambient humidity (10 to 90%RH), Storage ambient humidity (10 to 90%RH), Vibration resistance (Frequency, Acceleration, Half amplitude, Sweep count), Impact resistance, Operating atmosphere, Operating altitude (2000m or less), Installation location (In control panel), Overvoltage category (II or lower), Contamination level (2 or less), Cooling method (Self-cooling), Grounding (Type D grounding).

- \*1: Water bulb temperature for STN display type must be 39°C or lower.
\*2: Do not operate or store the GOT unit in pressurized environments where the pressure exceeds 0m elevation atmospheric pressure, as this could result in abnormal operation.
\*3: Assuming that the device is connected at some point between a public power distribution network and local system equipment.
\*4: Index that indicates the level of foreign conductive matter in the operating environment of the device.
\*5: 0 to 40°C for GT115-HS
\*6: Excluding GT115-HS
\*7: The 5VDC type requires no grounding.
Do not use or store the GOT under direct sun light or in an environment with excessively high temperature, dust, humidity or vibration.
For inquiries relating to products which conform to UL, cUL, and CE directives and shipping directives, please contact your local sales office.

Performance specifications

Table with columns: Item, Specification. Rows include: Type (TFT color LCD, STN color LCD, STN monochrome LCD), Screen size (5.7"), Resolution (QVGA: 320 x 240), Display size (115(W) x 86(H) mm), No. of displayed characters (16-dot standard font: 20 chars. x 15 lines), Display colors (256 colors), View angle (Right/left: 70°, Up: 70°, Down: 50°), Contrast adjustment (16-step adjustment), Intensity (400 [cd/m²]), Intensity adjustment (8-step adjustment), Backlight (Cold-cathode fluorescent tube), Life (Approx. 75,000 hours), Touch panel (Matrix resistive type, 300 keys/screen), Memory (3MB built-in flash memory, 512KB built-in SRAM), Battery (Clock data, alarm history, recipe data), Bus (RS-422/485, RS-232, USB), Built-in interface (RS-422/232, RS-232, USB), Buzzer output (Single tone), Protective construction (Front: IP67, In panel: IP2X), External dimensions (164(W) x 135(H) x 56(D) mm), Panel cut dimensions (153(W) x 121(H) mm), Weight (0.7 [kg]), Applicable software package (GT Works3 Version 1.54G or later).

Power supply specifications

Table with columns: Item, Specification. Rows include: Input power supply voltage (24VDC), Input frequency, Input maximum apparent power, Power consumption (9.84W or less, 9.36W or less, 11.16W or less, 9.72W or less, 7.92W or less, 9.84W or less, 9.36W or less, 3.6W or less), Inrush current (15A or less), Permissible instantaneous failure time (Within 5ms), Noise resistance (Noise voltage 1000Vp-p, noise width 1µs), Withstand voltage (500VAC), Insulation resistance (10MΩ), Applicable wire size (0.75 to 2 [mm²]), Clamp terminal (Clamp terminals for M3 screw), Tightening torque (0.5 to 0.8 [N·m]).

Performance specifications

Table with columns: Item, Specification. Rows include: Type (STN color LCD, STN monochrome LCD), Screen size (5.7"), Resolution (QVGA: 320 x 240), Display size (115(W) x 86(H) mm), No. of displayed characters (16-dot standard font: 20 chars. x 15 lines), Display colors (256 colors), View angle (Right/left: 55°, Up: 65°, Down: 70°), Contrast adjustment (16-step adjustment), Intensity (380 [cd/m²]), Life (Approx. 50,000 hours), Backlight (Cold-cathode fluorescent tube), Life (Approx. 75,000 hours), Touch panel (Matrix resistive type, 300 keys/screen), Memory (Built-in flash memory, 100,000 times), Battery (Clock data, alarm history, recipe data), RS-422/485 (Transmission speed: 115200/57600/38400/19200/9600/4800bps), Built-in interface (RS-232, USB), Buzzer output (Single tone), Protective construction (Conforming to IP67), External dimensions (164(W) x 135(H) x 56(D) mm), Panel cut dimensions (153(W) x 121(H) mm), Weight (0.7 [kg]), Applicable software package (GT Works3 Version 1.54G or later).

- \*1: On LCD panels, bright dots (permanently lit) and black dots (never lit) generally appear.
\*2: Using the GOT screen save/backlight OFF functions prevents screen burn-in and extends the backlight life.
\*3: The memory is ROM that permits overwriting of new data without having to delete the existing data.
\*4: This does not guarantee protection in all users' environments.
\*5: In the case of GOT multi-drop connection, set the terminal resistance transfer switch on the GOT main unit according to the connection configuration.

### Power supply specifications

Item	Specification					
	GT1030-HBD GT1030-HWD GT1030-HBD2 GT1030-HWD2	GT1030-HBDW GT1030-HWDW GT1030-HBDW2 GT1030-HWDW2	GT1020-LBD GT1020-LWD GT1020-LBD2 GT1020-LWD2	GT1020-LBDW GT1020-LWDW GT1020-LBDW2 GT1020-LWDW2	GT1030-HBL GT1030-HWL GT1030-HBLW GT1030-HWLW	GT1020-LBL GT1020-LWL GT1020-LBLW GT1020-LWLW
Input power supply voltage	24VDC (+10%, -15%), ripple voltage of 200mV or less					
Input frequency	-					
Input maximum apparent power	-					
Power consumption	2.2W or less (90mA/24VDC)		1.9W or less (80mA/24VDC)		1.1W or less (220mA/5VDC)	
With backlight off	1.7W or less (70mA/24VDC)		1.2W or less (50mA/24VDC)		0.6W or less (120mA/5VDC)	
Inrush current	18A or less (26.4DCV) 1ms		13A or less (26.4DCV) 1ms		-	
Permissible instantaneous failure time	Within 5ms					
Noise resistance	Noise voltage 1000Vp-p, noise width 1μs by noise simulator with noise frequency 30 to 100Hz					
Withstand voltage	500VAC for 1 minute between power supply terminal and ground					
Insulation resistance	10MΩ or higher with an insulation resistance tester (500VDC between power supply terminal and ground)					
Applicable wire size	Single-wire installation: 0.14 to 1.5mm <sup>2</sup> , AWG26 to AWG16 (single wire), 0.14 to 1.0mm <sup>2</sup> , AWG26 to AWG16 (stranded wire), 0.25 to 0.5mm <sup>2</sup> , AWG24 to AWG20 (bar terminal with insulation sleeve) Two-wire installation: 0.14 to 0.5mm <sup>2</sup> , AWG26 to AWG20 (single wire), 0.14 to 0.2mm <sup>2</sup> , AWG26 to AWG24 (stranded wire)					
Clamp terminal	AI2.5-6BU, AI0.34-6TQ, AI0.5-6WH (made by Phoenix Contact)					
Tightening torque (terminal block's terminal screws)	0.22 to 0.25 [N·m]					

Do not use or store the GOT under direct sun light or in an environment with excessively high temperature, dust, humidity or vibration.

For inquiries relating to products which conform to UL, cUL, and CE directives and shipping directives, please contact your local sales office.

Display*	Type	STN monochrome (black/white) LCD							
	Screen size	4.5"				3.7"			
	Resolution	288 × 96 [dots] (in horizontal mode)				160 × 64 [dots] (in horizontal mode)			
	Display size	109.42(W) × 35.98(H)[mm](in horizontal mode)				86.4(W) × 34.5(H)[mm](in horizontal mode)			
	No. of displayed characters	16-dot standard font: 36 chars. × 6 lines (1-byte) or 18 chars. × 6 lines (2-byte) (in horizontal mode) 12-dot standard font: 48 chars. × 8 lines (1-byte) or 24 chars. × 8 lines (2-byte) (in horizontal mode)				16-dot standard font: 20 chars. × 4 lines (1-byte) or 10 chars. × 4 lines (2-byte) (in horizontal mode)			
	Display colors	Monochrome (black/white)							
	View angle	Right/left: 30°, Up: 20°, Down: 30° (in horizontal display mode)							
	Contrast adjustment	16-step adjustment							
	Intensity	200 [cd/m <sup>2</sup> ] (in green)	500 [cd/m <sup>2</sup> ] (in white)	200 [cd/m <sup>2</sup> ] (in green)	500 [cd/m <sup>2</sup> ] (in white)	200 [cd/m <sup>2</sup> ] (in green)	300 [cd/m <sup>2</sup> ] (in white)	200 [cd/m <sup>2</sup> ] (in green)	300 [cd/m <sup>2</sup> ] (in white)
	Intensity adjustment	8-step adjustment							
Backlight	Life	Approx. 50,000 hours (Time for display contrast reaches 20% at operating ambient temperature of 25°C)							
	Color	3-color LED (green, orange and red) (no need to replace)	3-color LED (white, pink and red) (no need to replace)	3-color LED (green, orange and red) (no need to replace)	3-color LED (white, pink and red) (no need to replace)	3-color LED (green, orange and red) (no need to replace)	3-color LED (white, pink and red) (no need to replace)	3-color LED (green, orange and red) (no need to replace)	3-color LED (white, pink and red) (no need to replace)
	Function	Status control (color, on/flashing/off) is available and screen save time setting can be set. PLC can control color and status of backlight based on system information.							
	Type	Matrix resistive type				Analog resistive type			
	No. of touch keys	Max. 50 keys/screen				-			
Touch panel	Key size	Min. 16 × 16 [dots] (per key)				Min. 2 × 2 [dots] (per key)			
	No. of simultaneous touch points	Max. 2 points				Impossible (If there is a switch near the center of the pressed keys, the switch may function.)			
	Life	1,000,000 times or more (operating force 0.98N or less)							
Memory	User memory**	Built-in flash memory for saving project data (1.5MB or less) and OS				Built-in flash memory for saving project data (512KB or less), OS, alarm history, recipe data, time action set values			
	Life (No. of writings)	100,000 times							
Battery	Backed up data	GT11-50BAT type lithium battery							
	Life	Clock data, alarm history, recipe data, time action set values Replacement guideline approx. 5 years (operating ambient temperature: 25°C)							
Built-in interface	For communication with PLC	GT1030-HBD/HWD, GT1030-HBDW/HWDW RS-422/485, 1ch Transmission speed: 115200/57600/38400/19200/9600/4800bps Connector shape: Connector terminal block, 9-pin Application: Communication with PLC Terminal resistance*3: OPEN/110Ω/330Ω (switched by terminal resistance transfer switch)		RS-232, 1ch Transmission speed: 115200/57600/38400/19200/9600/4800bps Connector shape: Connector terminal block, 9-pin Application: Communication with PLC		GT1020-LBD/LWD, GT1020-LBDW/LWDW RS-422/485, 1ch Transmission speed: 115200/57600/38400/19200/9600/4800bps Connector shape: Connector terminal block, 9-pin Application: Communication with PLC Terminal resistance*3: OPEN/110Ω/330Ω (switched by terminal resistance transfer switch)		RS-232, 1ch Transmission speed: 115200/57600/38400/19200/9600/4800bps Connector shape: Connector terminal block, 9-pin Application: Communication with PLC	
	For communication with personal computer	GT1030-HBL/HWL, GT1030-HBLW/HWLW RS-422, 1ch Transmission speed: 115200/57600/38400/19200/9600/4800bps Connector shape: Connector terminal block, 9-pin Application: Communication with PLC		GT1020-LBL/LWL, GT1020-LBLW/LWLW RS-422, 1ch Transmission speed: 115200/57600/38400/19200/9600/4800bps Connector shape: Connector terminal block, 9-pin Application: Communication with PLC		RS-232, 1ch Transmission speed: 115200/57600/38400/19200/9600/4800bps Connector shape: Mini DIN 6-pin (female) Application: Communication with personal computer (project data read/write, OS installation, transparent function)			
	Buzzer output	Single tone (tone length adjustable/none)							
	Protective construction**	Conforming to IP67 (front panel)							
External dimensions	145(W) × 76(H) × 29.5(D)[mm]				113(W) × 74(H) × 27(D)[mm]				
Panel cut dimensions	137(W) × 66(H)[mm]				105(W) × 66(H)[mm]				
Weight	GT1030-H□□(W): 0.3kg (excl. mounting brackets) GT1030-H□□(L): 0.28kg (excl. mounting brackets)		0.3kg (excl. mounting brackets)		GT1020-L□□(W): 0.2kg (excl. mounting brackets) GT1020-L□□(L): 0.18kg (excl. mounting brackets)		0.2kg (excl. mounting brackets)		
Applicable software packages	GT Works3 Version1.54G or later (not supported GT Works2/GT Designer 2)				GT Works3 Version1.54G or later				

- \*1: On LCD panels, bright dots (permanently lit) and black dots (never lit) generally appear. Because the number of display elements that exist on a LCD panel is large, it is not possible to reduce appearance of the bright and black dots to zero. Flickering may occur depending on the display colors. Note that the existence of bright and black dots is a standard characteristic of LCD panels, and it does not mean that the products are defective or damaged. Displaying one single screen for a long time can lead to burn-in, causing afterimages or image irregularities that could not disappear. Use the screen saver that is effective to prevent burn-in.
- \*2: The memory is ROM that permits overwriting of new data without having to delete the existing data.
- \*3: In the case of GOT multi-drop connection, set the terminal resistance transfer switch on the GOT main unit according to the connection configuration.
- \*4: This does not guarantee protection in all users' environments. The specification is not applied when the interface protective cover and rear face protective cover are removed. The unit may not be used in an environment where it is exposed to splashing oil or chemicals for a long time or it is soaked with oil mist.

	GT145 <sup>*3</sup>		
	GT115 <sup>*3</sup>		
	GT105 <sup>*3</sup>		
4.7"	GT104	130	103
4.5"	GT1030	137	66
3.7"	GT1020	105	66

- \*1: Same dimensions as A985GOT(-V)
- \*2: Same dimensions as A975/970GOT(-B)
- \*3: Same dimensions as F940GOT
- \*4: For the GT104, GT1030 and GT1020, the tolerances are +1/0.

### When the CF card extension unit (mounting unit on control panel) is installed

Type	A	B
GT15-CFEX-C08SET	94.0	33.0

**Cautions when installing and uninstalling**  
When installing the CF card extension unit on the control panel, make sure that the extension unit does not interfere with the extension unit cable or the CF card interface of the GOT. Place the CF card extension unit at a distance of 25mm or more from the GOT.  
For installation locations, see the GT16 User's Manual (Hardware) or the GT15 User's Manual.

For compatibility with GOT900 series, see "Backward compatibility" (page 81).

## Product installation spacing

The GOT must have the clearances from other devices as shown in [Fig. A]. The GOT may require more distance than the dimensions shown in the table depending on the types of connection cables. Consider the connector dimensions and cable bending radius when designing the installation.

- \*1: The distance varies depending on the cable to be used. For details, consult your local sales office. The values in the table are given for your reference only and may not reflect actual conditions.
- \*2: The distances required when the coaxial cable 3C-2V (JIS C 3501) is used.
- \*3: The distance varies depending on the cable used. When the bending radius of the cable is larger than the indicated value, leave enough space appropriate for the bending radius.
- \*4: When using a battery, the required dimension is greater than when using a CF card.

### GT14

GOT main unit	A, D	B	C	E
GT1455	50 or more <sup>*3</sup>	80 or more <sup>*1</sup>	50 or more <sup>*2</sup>	100 or more <sup>*4</sup>
GT1450	(20 or more)	(20 or more)	(20 or more)	(20 or more)

- \*1: 50 or more (20 or more) in the case of vertical installation
- \*2: 80 or more (20 or more) in the case of vertical installation
- \*3: The distance varies depending on the Ethernet cable used. When the bending radius of the Ethernet cable is larger than the indicated value, leave enough space appropriate for the bending radius.
- \*4: When using a USB memory or SD card, allow space for removal and mounting when installing.

### GT12

GOT main unit	A, D	B	C	E
GT1275	50 or more	80 or more	When CF card is not used	50 or more
GT1265			When CF card is used	100 or more

### GT11

GOT main unit	A, D	B	C	E
GT1155	50 or more	80 or more <sup>*1</sup>	When CF card is not used	50 or more <sup>*2</sup>
GT1150			When CF card is used	100 or more

- \*1: 50 or more (20 or more) in the case of vertical installation
- \*2: 80 or more (20 or more) in the case of vertical installation

### GT10

GOT main unit	A	B	C	D	E
GT105	50 or more	80 or more	50 or more	50 or more	100 or more
GT104					(20 or more)
GT1030	50 or more	50 or more	50 or more	50 or more	80 or more
GT1020					(20 or more <sup>*1</sup> )

- \*1: 50 or more when a RS-232/USB conversion adapter is used.
- \*2: 80 or more when a personal computer connection cable is used or when a personal computer RS-232 interface is used for connecting multiple GOTs.
- \*3: 50 or more when a RS-232 interface is used for using an RS-232/USB conversion adapter.
- \*4: 80 or more when using a USB cable or a memory board.

### [Fig. A]

Dimensions shown in parentheses apply when there are no devices nearby (contactor, etc.) which produce radiated noise or heat. Even with these dimensions, however, the ambient temperature must never exceed 55°C.  
Depending on the unit and cable being used, a cable length longer than dimension A (or dimension D for the GT10) in above [Fig. A] may be required.

## Bus connection cables

Cable model name	Cable length (L)	External dimensions

CC-Link communication unit   Intelligent device station unit	GT15-J61BT13 Fig. 13		
Ethernet communication unit	GT15-J71E71-100 Fig. 14		
Serial multi-drop connection unit	GT01-RS4-M Fig. 15		
Connector conversion adapter	GT10-9PT5S Fig. 16		
RS-232/485 signal conversion adapter	GT14-RS2T4-9P Fig. 17		
CC-Link interface unit	GT11H(S)-CCL Fig. 18		

### Optional units

Product name	Model name	External dimensions
Printer unit	GT15-PRN Fig. 19	
Multimedia unit	GT16M-MMR Fig. 20	
Video input unit	GT16M-V4 Fig. 21	
	GT15V-75V4 Fig. 22	
RGB input unit	GT16M-R2 Fig. 21	
	GT15V-75R1 Fig. 22	
Video/RGB input unit	GT16M-V4R1 Fig. 21	
	GT15V-75V4R1 Fig. 22	
RGB output unit	GT16M-ROUT Fig. 23	
	GT15V-75ROUT Fig. 23	
CF card unit	GT15-CFCD Fig. 24	
CF card extension unit	GT15-CFEX-C08SET Fig. 25	
Audio output unit	GT15-SOUT Fig. 26	
External input/output unit	GT15-DIOR Fig. 27	
	GT15-DIO Fig. 27	
Handy GOT connector conversion box	GT11H-CNB-37S Fig. 28 GT16H-CNB-42S Fig. 29	

- \*1 : The connector shape varies depending on the model.
- \*2 : Dimensions A to D for each communication unit

Model name	A	B	C	D
GT15-QBUS	2.5	12	31.5	-
GT15-QBUS2	2.5	11	29	33.5
GT15-ABUS	4.5	15	29.5	-
GT15-ABUS2	4.5	11	31	31

\*3 : Dimension X when GOT is installed

GOT main unit factor		Y (main unit factor)
Type of GOT		
GT1695		-2
GT1595		-0.5
GT1685, GT1585		-3.5
GT167, GT157		-0.5
GT166, GT1655, GT156, GT155		1.5

(Unit: mm)

### Option factor for communication units / option units

Model name	Z (option factor)
GT15-CFCD, GT15-CFEX-C08SET	20.5
GT16M-V4, GT16M-R2, GT16M-V4R1, GT16M-ROUT, GT15V-75V4, GT15V-75R1, GT15V-75V4R1, GT15V-75ROUT, GT15-QBUS, GT15-QBUS2, GT15-ABUS, GT15-ABUS2, GT15-RS2-9P, GT15-RS4-9S, GT15-RS4-TE, GT15-J71LP23-25, GT15-J71E71-100, GT15-J71BR13, GT15-J61BT13, GT15-PRN, GT15-DIO, GT15-DIOR, GT15-SOUT	21.5
GT16M-MMR, GT15-J71GP23-SX, GT15-J71GF13-T2	35.5

(Unit: mm)

### Calculation of dimension X

- One-layer configuration: Y (main unit factor) + Z (option factor)
- Two-layer configuration: Y (main unit factor) + Z (option factor) + Z (option factor)
- Three-layer configuration: Y (main unit factor) + Z (option factor) + Z (option factor) + Z (option factor)

### Dimension A for each communication unit

Model name	For GT16	For GT15
GT15-75QBUSL	2.5	5
GT15-75QBUS2L	2.5	5
GT15-75ABUSL	4	8
GT15-75ABUS2L	4	10

(Unit: mm)

### Dimension A for each communication unit

Model name	For GT16	For GT15
GT15-75QBUSL	2.5	5
GT15-75QBUS2L	2.5	5
GT15-75ABUSL	4	8
GT15-75ABUS2L	4	10

# List of connectable models

For details of connection configurations, see the GOT1000 Series Handbook and the GOT1000 Series Connection Manual.

## Mitsubishi PLCs/Motion controllers/Safety controllers/ C controllers

Connectable to a broad range of product lines.

Series	Model name	Connection configuration													
		GT16/GT15/GT14/GT12/GT11						GT10

A3NCPUR21															

- \*1 : Supported by the GT16 and GT15 only. (Excluding the GT16 Handy)
- \*2 : Supported by the GT16, GT15, and GT11 only. When connecting multiple GOTs, note that the following GOT models cannot be used together: GOT1000 series, GOT800 series and A77GOT. If both of the GOT1000 series and the GOT-A900 series are included in a system, please refer to the Technical Bulletin No. GOT-A-1009.
- \*3 : When MELSECNET/H is used in NET1/0 mode, the GOT terminal cannot be connected directly to a remote I/O station.
- \*4 : CC-Link (ID): Connected as CC-Link system via A365BT-G4-S3 or A365BT-R2N (in the QnACPU, the latch relay (L) and step relay (S) are separate devices from the internal relay (M), but the internal relay is nonetheless accessed when either a latch relay or step relay is specified.)
- \*5 : When using a series connector box or a CC-Link module with an ACPU, only the devices within ACPU specifications are supported. The following devices cannot be monitored:
  - Latch relays (L) and step relays (S)
  - In the QnACPU, the latch relay (L) and step relay (S) are separate devices from the internal relay (M), but the internal relay is nonetheless accessed when either a latch relay or step relay is specified.
  - File register (R)
- \*6 : Use CPU function version B or later in a multi-CPU system.
- \*7 : When using a bus extension connector box, it must be installed on an extension base. (It cannot be installed on the main base.)

## Modules usable when connected with Mitsubishi PLCs

### For computer link connection

CPU series	Serial communication module/computer link module <sup>#1</sup>			
	Model name	CH1	CH2	
MELSEC-Q series (Q mode)	QJ71C24	RS-232	RS-422/485	
	QJ71C24-R2	RS-232	RS-232	
	QJ71C24N	RS-232	RS-422/485	
	QJ71C24N-R2	RS-232	RS-232	
Motion controller CPU (Q series)	QJ71C24N-R4	RS-422/485	RS-422/485	
	QJ71C24N-R4	RS-422/485	RS-422/485	
MELSECNET/H remote I/O station	QJ71CMO	Modular connector	RS-232	
	QJ71CMON	Modular connector	RS-232	
MELSEC-L Series CC-Link IE Field Network head unit	LJ71C24	RS-232	RS-422/485	
	LJ71C24-R2	RS-232	RS-232	
MELSEC-Q series (A mode)	A1SJ71UC24-R2	RS-232	-	
	A1SJ71UC24-R4	RS-422/485	-	
MELSEC-QnA series	AJ71QC24	RS-232	RS-422/485	
	AJ71QC24-R2	RS-232	RS-232	
	AJ71QC24-R4	RS-422	RS-422/485	
	AJ71QC24N	RS-232	RS-422/485	
	AJ71QC24N-R2	RS-232	RS-422/485	
	AJ71QC24N-R4	RS-422	RS-422/485	
	AJ71QC24N-R2	RS-232	RS-422/485	
	AJ71QC24N	RS-232	RS-422/485	
	A1SJ71QC24-R2	RS-232	RS-232	
	A1SJ71QC24N	RS-232	RS-422/485	
	A1SJ71QC24N-R2	RS-232	RS-232	
A1SJ71QC24N-R4	RS-232	RS-422/485		
A1SJ71QC24N1-R2	RS-232	RS-232		
AJ71UC24	RS-232	RS-422/485		
A1SJ71UC24-R2	RS-232	-		
A1SJ71UC24-R4	RS-422/485	-		
MELSEC-A series Motion controller CPU (A series)	AJ71UC24	RS-232	RS-422/485	
	A1SJ71UC24-R2	RS-232	-	
	A1SJ71UC24-R4	RS-422/485	-	
	A1SJ71C24-R2	RS-232	-	
	A1SJ71C24-R4	RS-422/485	-	
	A1SCPUC24-R2	RS-232	-	
A2CCPUC24	RS-232	RS-422/485		

<sup>#1</sup>: RS-485 communication is not possible; therefore, A0J2-C214-S1 is unusable.  
<sup>#2</sup>: With function version A, either CH1 or CH2 can be connected. With function version B or later, both CH1 and CH2 can be connected.  
<sup>#3</sup>: Only CH2 can be connected.  
<sup>#4</sup>: Either CH1 or CH2 can be connected.  
<sup>#5</sup>: When connecting to A1SHCPU, A2SCPUS(S1), A2SHCPU(S1), A1SHCPU, A0J2CPU, A171SHCPU(N) or A172SHCPU(N), use computer link module software version U or later.  
<sup>#6</sup>: Computer link module/serial communication module operate within the range of devices available on AnACPU. (R devices cannot be used.)

• The following devices cannot be monitored:  
 • Devices that have been newly added to the QnACPU  
 • Latch relays (L) and step relays (S)  
 • In the QnACPU, the latch relay (L) and step relay (S) are separate devices from the internal relay (M), but the internal relay is nonetheless accessed when either a latch relay or step relay is specified.  
 • File register (R)

### For Ethernet connection

CPU series	Ethernet module <sup>#1</sup>			
	Model name	CH1	CH2	
MELSEC-Q series (Q mode)/MELSEC-QS series	QJ71E71-100	QJ71E71-B5	QJ71E71-B2	QJ71E71
MELSEC-QnA series	AJ71QE71N3-T	AJ71QE71N-T	AJ71QE71N-B5	A1SJ71QE71-B5
	AJ71QE71N-B5	AJ71QE71N-B5T	A1SJ71QE71N3-T	A1SJ71QE71-B2
	AJ71QE71N-B2	AJ71QE71	A1SJ71QE71N3-T	A1SJ71QE71-B2
	AJ71QE71N-B2	AJ71QE71	A1SJ71QE71N3-T	A1SJ71QE71-B2
MELSEC-Q series (A mode)	AJ71E71N3-T	AJ71E71N-T	A1SJ71E71N3-T	A1SJ71E71-B2-S3
	AJ71E71N-B5	AJ71E71N-B5T	A1SJ71E71N-B5	A1SJ71E71-B2-S3
MELSEC-A series Motion controller CPU (A series)	AJ71E71N-B2	AJ71E71-S3	A1SJ71E71N-B2	
MELSEC-FX series	FX3U-ENET (L)			

## Inverters

The GOT can be connected to Mitsubishi inverters to set their parameters and display alarms.

Model name	GT16/GT15/GT14/GT12/GT11/GT10	
	RS-422	RS-232
FREQROL-S500/S500E	X	X
FREQROL-E500	X	X
FREQROL-F500/F500L	X	X
FREQROL-F500J	X	X
FREQROL-A500/A500L	X	X
FREQROL-V500/V500L	X	X
FREQROL-E700	X	X
FREQROL-F700	X	X
FREQROL-A700	X	X
FREQROL-D700	X	X
FREQROL-F700P/F700PJ	X	X

## Servo amplifiers

The GOT can be connected to Mitsubishi servo amplifiers to set their parameters and display alarms.

Series	Model name	GT16/GT15/GT14/GT12/GT11/GT10	
		RS-422	RS-232
MELSERVO-J4 series	MR-J4-IA	X	X
MELSERVO-J3 series	MR-J3-IA	X	X
MELSERVO-J2-Super series	MR-J2S-IA	X	X
MELSERVO-J2M series	MR-J2M-P8A	X	X
MELSERVO-J2M series	MR-J2M-UD	X	X

## Robot controllers

The GOT can be used to monitor Mitsubishi robot controllers and set their parameters.

Controller name	GT16/GT15/GT14/GT12/GT11 Connection configuration					
	Bus connection <sup>#6</sup>	CPU direct connection <sup>#4</sup>	Computer link <sup>#5</sup>	MELSEC NET/H <sup>#1</sup>	MELSEC NET/10 <sup>#2</sup>	CC-Link IE Field Network <sup>#3</sup>
CRnQ-700	X	X	X	X	X	X
CRnD-700	X	X	X	X	X	X

<sup>#1</sup>: Supported by the GT16 and GT15 only. (Excluding the GT16 Handy)  
<sup>#2</sup>: Supported only when MELSECNET/H is used in NET/10 mode. The GOT terminal cannot be connected to a remote I/O unit.  
<sup>#3</sup>: CC-Link (ID). Connected as CC-Link (intelligent device station).  
<sup>#4</sup>: The CRnQ-700 can be accessed via RS-232 of the QCPU of a multi-CPU system.  
<sup>#5</sup>: The CRnQ-700's DISP IF cannot be used. Access the controller via the Ethernet module or the Ethernet port of the QCPU of a multi-CPU system.  
<sup>#6</sup>: Supported by the GT16, GT15, and GT11 only.  
<sup>#7</sup>: Supported by the GT16, GT15, GT14, and GT12 only. (The GT14 supports connection to CRnQ-700 only.)

### For MELSECNET/H connection

CPU series	MELSECNET/H module		
	Optical loop	Coaxial bus	
MELSEC-Q series (Q mode) <sup>#1</sup>	QJ71LP21	QJ71LP21S-25	QJ71BR11
MELSEC-QS series C controller	QJ71LP21-25	QJ71LP21S-25	

<sup>#1</sup>: Use CPU and MELSECNET/H network unit function version B or later.

### For MELSECNET/10 connection

CPU series	MELSECNET/H (NET/10 mode), MELSECNET/10 module		
	Optical loop	Coaxial bus	
MELSEC-Q series (Q mode) <sup>#1</sup>	QJ71LP21	QJ71LP21S-25	QJ71BR11
MELSEC-QS series C controller	QJ71LP21-25	QJ71LP21S-25	
MELSEC-QnA series	AJ71QLP21	A1SJ71QLP21	AJ71QBR11
MELSEC-Q series (A mode)	AJ71QLP21S	A1SJ71QLP21S	A1SJ71QBR11
	AJ71LP21	A1SJ71LP21	AJ71BR11
Motion controller CPU (A series)	A1SJ71LP21	A1SJ71LP21	A1SJ71BR11

<sup>#1</sup>: Use CPU and MELSECNET/H network unit function version B or later.

### For CC-Link IE Controller Network connection

CPU series	CC-Link IE Controller Network communication unit	
	Optical loop	Coaxial bus
MELSEC-Q series (Q mode)	QJ71GP21-SX <sup>#1</sup>	QJ71GP21S-SX <sup>#1</sup>
MELSEC-QS series C controller	QJ71GP21-SX <sup>#1</sup>	QJ71GP21S-SX <sup>#1</sup>

<sup>#1</sup>: In the extension mode, use a CPU with the first 5 digits of the serial No. are 12052 or higher.

### For CC-Link IE Field Network connection

CPU series	CC-Link IE Field Network communication unit	
	Optical loop	Coaxial bus
MELSEC-Q series (Q mode)	QJ71GF11-T2	
MELSEC-QS series C controller	QJ71GF11-T2	
MELSEC-QS series	QS0J71GF11-T2	
MELSEC-L series	LJ71GF11-T2	

### For CC-Link (ID) connection

CPU series	CC-Link unit		Peripheral device unit
	Optical loop	Coaxial bus	
MELSEC-Q series (Q mode)	QJ61BT11	QJ61BT11N	AJ65BT-G4-S3
MELSEC-L series	LJ61BT11	LJ61BT11N	AJ65BT-R2N
MELSEC-QnA series	AJ61QBT11 <sup>#1</sup>	A1S61QBT11 <sup>#1</sup>	
MELSEC-Q series (A mode)	AJ61BT11 <sup>#1</sup>	A1S61BT11 <sup>#1</sup>	
MELSEC-A series Motion controller CPU (A series)	A1S61BT11 <sup>#1</sup>	A1S61BT11 <sup>#1</sup>	

<sup>#1</sup>: GOT can communicate only with CC-Link units function version B or later and software version J or later.

### For CC-Link (via G4) connection<sup>#1</sup>

CPU series	CC-Link unit		Peripheral device unit
	Optical loop	Coaxial bus	
MELSEC-Q series (Q mode)	QJ61BT11	QJ61BT11N	AJ65BT-G4-S3
MELSEC-L series	LJ61BT11	LJ61BT11N	AJ65BT-R2N

<sup>#1</sup>: GT11 and GT10 can monitor only the master station.

<sup>#1</sup>: When using an A series Ethernet with QnACPU, only the device ranges within AnACPU specifications are supported except for the following devices.  
 • Devices that have been newly added to the QnACPU  
 • Latch relays (L) and step relays (S)  
 • In the QnACPU, the latch relay (L) and step relay (S) are separate devices from the internal relay (M), but the internal relay is nonetheless accessed when either a latch relay or step relay is specified.  
 • File register (R)

## CNC

The GOT can be used to monitor Mitsubishi CNC C70 and C6/C64 and to set their parameters.

Series	Model name	GT16/GT15/GT14/GT12/GT11 Connection configuration								
		Bus connection <sup>#6</sup>	CPU direct connection <sup>#4</sup>	Computer link <sup>#5</sup>	MELSEC NET/H <sup>#1</sup>	MELSEC NET/10 <sup>#2</sup>	CC-Link IE Field Network <sup>#3</sup>	CC-Link (ID) (via G4) <sup>#7</sup>	CC-Link (via G4) <sup>#7</sup>	Ethernet <sup>#7</sup>
CNC C70	Q173NCCPU	X	X	X	X	X	X	X	X	X
MELDAS C6/C64	FCA C6	X	X	X	X	X	X	X	X	X
MELDAS C6/C64	FCA C64	X	X	X	X	X	X	X	X	X

<sup>#1</sup>: Supported by the GT16 and GT15 only. (Excluding the GT16 Handy)  
<sup>#2</sup>: When MELSECNET/H is used in NET/10 mode, the GOT terminal cannot be connected directly to a remote I/O station.  
<sup>#3</sup>: CC-Link (ID). Connected as CC-Link (intelligent device station).  
<sup>#4</sup>: Use NC system software version D0 or later.  
<sup>#5</sup>: Only a USB interface is available on the Q173NCCPU.  
 The Q173NCCPU can be accessed via RS-232 of the QCPU of a multi-CPU system.  
<sup>#6</sup>: Supported by the GT16, GT15, and GT11 only.  
<sup>#7</sup>: Supported by the GT16, GT15, GT14, and GT12 only.

## Units usable when connected with MELDAS C6/C64

### For MELSECNET/10 connection

Series	MELSECNET/H (NET/10 mode), MELSECNET/10 module	
	Optical loop	Coaxial bus
MELDAS C6/C64	FCU6-EX879	FCU6-EX878

### For CC-Link (ID) connection

Series	CC-Link unit	
	Optical loop	Coaxial bus
MELDAS C6/C64	FCU6-HR865	

### For Ethernet connection

Series	Ethernet module	
	Optical loop	Coaxial bus
MELDAS C6/C64	FCU6-EX875	

<sup>#1</sup>: Applicable GOT varies depending on the connection destination.  
 GT16 - When connected via RS-232, RS-422/485 or Ethernet: All models (Use the built-in interface of the GOT main unit.)  
 When connected via ports other than above: All models (Bus connection and network connection are enabled by mounting a communication unit on the GOT main unit.)  
 GT15 - When connected via RS-232: All models (Use the built-in interface of the GOT main unit.)  
 When other than RS-232: All models (Bus connection and network connection are enabled by mounting a communication unit on the GOT main unit.)  
 GT14 - When connected via RS-232, RS-422/485 or Ethernet: All models (Use the built-in interface of the GOT main unit.)  
 GT12 - When connected via RS-232, RS-422/485 or Ethernet: All models (Use the built-in interface of the GOT main unit.)  
 GT11 - When connected via RS-232 or RS-422: GT1115 - Q, BD  
 When using bus connection: GT1115 - Q, BD, GT1151 - Q, BD  
 Handy GOT - When connected via RS-232, RS-422/485 or Ethernet: GT1166SHS-VTBD  
 When connected via RS-232 or RS-422: GT1115 - HS-Q, BD  
 GT10 - When connected via RS-232: GT1051 - Q, BD, GT1041 - Q, BD, GT1030 - H, D2/H, DW2, GT1020 - L, D2/L, DW2  
 When connected via RS-422: GT1051 - Q, BD, GT1041 - Q, BD, GT1030 - H, D2/H, DW2, GT1030 - H, L/H, LW, GT1020 - L, D/L, DW, GT1020 - L, L/L, LW (The GT1030-H, L/H, LW and GT1020-L, L/L, LW can be used only with the MELSEC-FXCPU.)

## Third party PLCs/Motion controllers/Safety controllers

The GOT can be connected with third party PLCs through RS-232 communication at up to 115.2Kbps or Ethernet.

		GT1020-LWLD				5VDC	Dedicated to RS-422 connection		
		GT1020-LWLDW				24VDC	Dedicated to RS-422FX connection		

\*1: Not supported by GT Works2/GT Designer2.

## Communication interface

Product name	Model name	Specifications	Applicable model							
			GT16	GT15	GT14	GT12	GT11	Handy GOT	GT10	
Bus connection unit	GT15-QBUS	Bus connection (1ch) unit standard model for QCPU (Q mode)/motion controller CPU (Q series)	●	●						
	GT15-QBUS2	Bus connection (2ch) unit standard model for QCPU (Q mode)/motion controller CPU (Q series)	●	●						
	GT15-ABUS	Bus connection (1ch) unit standard model for QnA/ACPU/motion controller CPU (A series)	●	●						
	GT15-ABUS2	Bus connection (2ch) unit standard model for QnA/ACPU/motion controller CPU (A series)	●	●						
	GT15-75QBUSL	Bus connection (1ch) unit thin model <sup>*1</sup> for QCPU (Q mode)/motion controller CPU (Q series)	●	●						
	GT15-75QBUS2L	Bus connection (2ch) unit thin model <sup>*1</sup> for QCPU (Q mode)/motion controller CPU (Q series)	●	●						
	GT15-75ABUSL	Bus connection (1ch) unit thin model <sup>*1</sup> for QnA/ACPU/motion controller CPU (A series)	●	●						
	GT15-75ABUS2L	Bus connection (2ch) unit thin model <sup>*1</sup> for QnA/ACPU/motion controller CPU (A series)	●	●						
	Serial communication unit	GT15-RS2-9P	RS-232 serial communication unit (D-sub 9-pin (male))	●	●					
		GT15-RS4-9S	RS-422/485 serial communication unit (D-sub 9-pin (female)) <sup>*2</sup> <sup>*3</sup>	●	●					
GT15-RS4-TE		RS-422/485 serial communication unit (terminal block) <sup>*2</sup> <sup>*3</sup> <sup>*4</sup> Usable only when connecting to temperature controllers/indicating controllers via RS-485 or in GOT multi-drop connection	●	●						
RS-422 conversion unit	GT15-RS2T4-9P	RS-232 → RS-422 conversion unit	● <sup>*5</sup>	● <sup>*4</sup>						
	GT15-RS2T4-25P	RS-422 connector: 9-pin	● <sup>*6</sup>	● <sup>*4</sup>						
MELSECNET/H communication unit	GT15-J71LP23-25	Standard station unit (optical loop)	●	●						
	GT15-J71BR13	Standard station unit (coaxial bus)	●	●						
CC-Link IE Controller Network communication unit	GT15-J71GP23-SX	Standard station unit (optical loop)	●	●						
CC-Link IE Field Network communication unit	GT15-J71GF13-T2	Intelligent device station unit	●	●						
CC-Link communication unit	GT15-J61BT13	Intelligent device station unit (supporting CC-Link version 2)	●	●						
Ethernet communication unit	GT15-J71E71-100	Ethernet (100Base-TX) unit	●	●						
Serial multi-drop connection unit	GT01-RS4-M	For GOT multi-drop connection	●	● <sup>*5</sup>	●	● <sup>*5</sup>	● <sup>*5</sup>	● <sup>*5</sup>	● <sup>*5</sup>	
Connector conversion adapter	GT10-9PT5S	Conversion connector between D sub 9-pin male and Europe terminal block 5-pin	●	●	●	●	●	●	●	
RS-232/485 Signal Conversion Adapter	GT14-RS2T4-9P <sup>NEW</sup>	Conversion adapter from RS-232 to RS-485	●	●	●	●	●	●	●	
CC-Link interface unit	GT11HS-CCL	CC-Link interface unit for Handy GOT	●	●						
	GT11H-CCL		●	●						

\*1: The unit cannot be used stacked on other units.  
 \*2: The unit may not be able to be used depending on the connection destination. See "List of connectable models" (page 65).  
 \*3: The unit cannot be used when connecting to temperature controllers/indicating controllers via RS-485 (2-wire type).  
 \*4: The unit cannot be used with the GT1555.  
 \*5: For the hardware version compatible with GOT, please contact your local sales office.  
 \*6: For the instructions for connection of GT16/GT15, please contact your local sales office.  
 \*7: When using the unit in a direct connection with a QCPU, only the QnUCPU is supported.

## Optional units

Product name	Model name	Specifications	Applicable model						
			GT16	GT15	GT14	GT12	GT11	Handy GOT	GT10
Printer unit	GT15-PRN	USB slave (PictBridge) for printer connection, 1ch <sup>*</sup> Cable for printer connection (3m) included	●	●					
Multimedia unit	GT16M-MMR	For video input (NTSC/PAL) 1ch Record video images/play video files	● <sup>*2</sup>	●					
	GT16M-V4	For video input (NTSC/PAL) 4ch	● <sup>*2</sup>	●					
Video input unit	GT15V-75V4	For video input (NTSC/PAL) 4ch	● <sup>*2</sup>	● <sup>*3</sup>					
	GT16M-R2	For analog RGB input 2ch	● <sup>*2</sup>	●					
RGB input unit	GT15V-75R1	For analog RGB input 1ch	●	● <sup>*3</sup>					
	GT16M-V4R1	For video input (NTSC/PAL) 4ch / analog RGB 1ch composite input	● <sup>*2</sup>	●					
Video/RGB input unit	GT15V-75V4R1	For video input (NTSC/PAL) 4ch / analog RGB 1ch composite input	●	● <sup>*3</sup>					
	GT16M-ROUT	For analog RGB output 1ch	● <sup>*2</sup>	●					
RGB output unit	GT15V-75ROUT	For analog RGB output 1ch	●	● <sup>*3</sup>					
	GT16M-ROUT	For analog RGB output 1ch	●	●					
CF card unit	GT15-CFCD	For additional CF card port (B drive) on the back of the GOT	●	●					
CF card extension unit	GT15-CFEX-C08SET	For additional CF card port (B drive) at the front of the control panel <sup>*1</sup>	●	●					
Sound output unit	GT15-SOUT	For sound output	●	●					
External input/output unit	GT15-DIOR	For external input/output devices and operation panel connection (negative common input / source type output)	●	●					
	GT15-DIO	For external input/output devices and operation panel connection (positive common input / sink type output)	●	●					

\*1: Includes unit to be installed on the control panel, unit to be installed on the GOT, and connection cable (0.8m).  
 \*2: Excluding the GT16 (VNB) and GT1655.  
 \*3: Only the GT1585V and GT1575V are supported.

GT12-70VLT	For GT1275-VNB	—	—	—	●	—	—	—	—	
GT12-60VLT	For GT1265-VNB	—	—	—	—	●	—	—	—	
Optional function board	GT16-MESB	For MES interface function (No expansion memory)	●	—	—	—	—	—	—	—
	GT15-FNB	(No expansion memory)	—	●	—	—	—	—	—	—
	GT15-QFNB	+ 16MB expansion memory	—	●	—	—	—	—	—	—
	GT15-QFNB16M	+ 32MB expansion memory	—	●	—	—	—	—	—	—
	GT15-QFNB32M	+ 48MB expansion memory	—	●	—	—	—	—	—	—
	GT15-QFNB48M	+ 48MB expansion memory	—	●	—	—	—	—	—	—
	GT11-50FNB		—	—	—	—	—	—	● <sup>*5</sup>	● <sup>*6</sup>
GT10 memory loader	GT10-LDR	For GT1030/GT1020 (for OS project data transfer) no power source required	—	—	—	—	—	—	—	●
GT10 memory board	GT10-50FMB	For GT105 /GT104 (for OS and project data transfer)	—	—	—	—	—	—	—	●
Protective sheet	GT16-90PSCB	Clear, 5 sheets	●	—	—	—	—	—	—	—
	GT16-90PSGB	Anti-glare, 5 sheets	●	—	—	—	—	—	—	—
	GT16-90PSCW	Clear (frame: white), 5 sheets	●	—	—	—	—	—	—	—
	GT16-90PSGW	Anti-glare (frame: white), 5 sheets	●	—	—	—	—	—	—	—
	GT16-90PSCB-012	Clear (USB protective cover type), 5 sheets <sup>*14</sup>	●	—	—	—	—	—	—	—
	GT15-90PSCB	Clear, 5 sheets	—	●	—	—	—	—	—	—
	GT15-90PSGB	Anti-glare, 5 sheets	—	●	—	—	—	—	—	—
	GT15-90PSCW	Clear (frame: white), 5 sheets	—	●	—	—	—	—	—	—
	GT15-90PSGW	Anti-glare (frame: white), 5 sheets	—	●	—	—	—	—	—	—
	GT16-80PSCB	Clear, 5 sheets	●	—	—	—	—	—	—	—
	GT16-80PSGB	Anti-glare, 5 sheets	●	—	—	—	—	—	—	—
	GT16-80PSCW	Clear (frame: white), 5 sheets	●	—	—	—	—	—	—	—
	GT16-80PSGW	Anti-glare (frame: white), 5 sheets	●	—	—	—	—	—	—	—
	GT16-80PSCB-012	Clear (USB protective cover type), 5 sheets <sup>*14</sup>	●	—	—	—	—	—	—	—
	GT15-80PSCB	Clear, 5 sheets	—	●	—	—	—	—	—	—
	GT15-80PSGB	Anti-glare, 5 sheets	—	●	—	—	—	—	—	—
	GT15-80PSCW	Clear (frame: white), 5 sheets	—	●	—	—	—	—	—	—
	GT15-80PSGW	Anti-glare (frame: white), 5 sheets	—	●	—	—	—	—	—	—
GT16-70PSCB	Clear, 5 sheets	●	—	—	—	—	—	—	—	
GT16-70PSGB	Anti-glare, 5 sheets	●	—	—	—	—	—	—	—	
GT16-70PSCW	Clear (frame: white), 5 sheets	●	—	—	—	—	—	—	—	
GT16-70PSGW	Anti-glare (frame: white), 5 sheets	●	—	—	—	—	—	—	—	
GT16-70PSCB-012	Clear (USB protective cover type), 5 sheets <sup>*14</sup>	●	—	—	—	—	—	—	—	
GT15-70PSCB	Clear, 5 sheets	—	●	—	—	—	—	—	—	
GT15-70PSGB	Anti-glare, 5 sheets	—	●	—	—	—	—	—	—	
GT15-70PSCW	Clear (frame: white), 5 sheets	—	●	—	—	—	—	—	—	
GT15-70PSGW	Anti-glare (frame: white), 5 sheets	—	●	—	—	—	—	—	—	
GT11-70PSCB	Clear, 5 sheets	—	—	—	●	—	—	—	—	
GT16-60PSCB	Clear, 5 sheets	●	—	—	—	—	—	—	—	
GT16-60PSGB	Anti-glare, 5 sheets	●	—	—	—	—	—	—	—	
Protective sheet for 8.4" screen (for GT16)	GT16-60PSCW	Clear (frame: white), 5 sheets	●	—	—	—	—	—	—	—
	GT16-60PSGW	Anti-glare (frame: white), 5 sheets	●	—	—	—	—	—	—	—
	GT16-60PSCB-012	Clear (USB protective cover type), 5 sheets <sup>*14</sup>	●	—	—	—	—	—	—	—
	GT15-60PSCB	Clear, 5 sheets	—	●	—	—	—	—	—	—
	GT15-60PSGB	Anti-glare, 5 sheets	—	●	—	—	—	—	—	—
	GT15-60PSCW	Clear (frame: white), 5 sheets	—	●	—	—	—	—	—	—
Protective sheet for 8.4" screen (for GT12)	GT15-60PSGW	Anti-glare (frame: white), 5 sheets	—	●	—	—	—	—	—	—
Protective sheet for 5.7" screen (for GT16)	GT16H-60PSC	Clear, 5 sheets	●	—	—	—	—	—	—	—
	GT16-50PSCB	Clear, 5 sheets	●	—	—	—	—	—	—	—
	GT16-50PSGB	Anti-glare, 5 sheets	●	—	—	—	—	—	—	—
	GT16-50PSCW	Clear (frame: white), 5 sheets	●	—	—	—	—	—	—	—
	GT16-50PSGW	Anti-glare (frame: white), 5 sheets	●	—	—	—	—	—	—	—
	GT16-50PSCB-012	Clear (USB protective cover type), 5 sheets <sup>*14</sup>	●	—	—	—	—	—	—	—
	GT15-50PSCB	Clear, 5 sheets	—	●	—	—	—	—	—	—
	GT15-50PSGB	Anti-glare, 5 sheets	—	●	—	—	—	—	—	—
	GT15-50PSCW	Clear (frame: white), 5 sheets	—	●	—	—	—	—	—	—
	GT15-50PSGW	Anti-glare (frame: white), 5 sheets	—	●	—	—	—	—	—	—
Protective sheet for 5.7" screen (for GT14)	GT14-50PSCB	Clear, 5 sheets	—	—	—	●	—	—	—	—
	GT14-50PSGB	Anti-glare, 5 sheets	—	—	—	●	—	—	—	—
	GT14-50PSCW	Clear (frame: white), 5 sheets	—	—	—	●	—	—	—	—
	GT14-50PSGW	Anti-glare (frame: white), 5 sheets	—	—	—	●	—	—	—	—
Protective sheet for 5.7" screen (for GT11)	GT11-50PSCB	Clear, 5 sheets	—	—	—	—	●	—	—	—
	GT11-50PSGB	Anti-glare, 5 sheets	—	—	—	—	●	—	—	—
	GT11-50PSCW	Clear (frame: white), 5 sheets	—	—	—	—	●	—	—	—
	GT11-50PSGW	Anti-glare (frame: white), 5 sheets	—	—	—	—	●	—	—	—

	GT10-40PSCW	Clear (frame: white), 5 sheets	—	—	—	—	—	—	—	●	
	GT10-40PSGW	Anti-glare (frame: white), 5 sheets	—	—	—	—	—	—	—	●	
	GT10-30PSCB	Clear, 5 sheets	—	—	—	—	—	—	—	●	
	GT10-30PSGB	Anti-glare, 5 sheets	—	—	—	—	—	—	—	●	
	GT10-30PSCW	Clear (frame: white), 5 sheets	—	—	—	—	—	—	—	●	
	GT10-30PSGW	Anti-glare (frame: white), 5 sheets	—	—	—	—	—	—	—	●	
	Protective sheet for 3.7" screen (for GT1020)	GT10-20PSCB	Clear, 5 sheets	—	—	—	—	—	—	—	●
	GT10-20PSGB	Anti-glare, 5 sheets	—	—	—	—	—	—	—	—	●
GT10-20PSCW	Clear (frame: white), 5 sheets	—	—	—	—	—	—	—	—	●	
GT10-20PSGW	Anti-glare (frame: white), 5 sheets	—	—	—	—	—	—	—	—	●	
USB protective cover	GT16-UICOV	Protective cover for USB interface on main unit front panel (for replacement)	●	—	—	—	—	—	—	—	
	GT15-UICOV		●	—	—	—	—	—	—	—	
	GT14-50UICOV		—	●	—	—	—	—	—	—	
	GT11-50UICOV		—	—	●	—	—	—	—	—	
Oil resistant cover <sup>*7</sup>	GT05-90PCO	Oil resistant cover for 15" screen	●	●	—	—	—	—	—	—	
	GT05-80PCO	Oil resistant cover for 12.1" screen	●	●	—	—	—	—	—	—	
	GT05-70PCO	Oil resistant cover for 10.4" screen	●	●	—	—	—	—	—	—	
	GT05-60PCO	Oil resistant cover for 8.4" screen	●	●	—	—	—	—	—	—	
	GT16-50PCO	Oil resistant cover for 5.7" screen	●	—	—	—	—	—	—	—	
	GT05-50PCO	Oil resistant cover for 5.7" screen	—	●	—	—	—	—	—	—	
	GT10-40PCO	Oil resistant cover for 4.7" screen	—	—	—	—	—	—	—	●	
	GT10-30PCO	Oil resistant cover for 4.5" screen	—	—	—	—	—	—	—	●	
	GT10-20PCO	Oil resistant cover for 3.7" screen	—	—	—	—	—	—	—	●	
	Emergency stop switch guard	GT16H-60ESCOV	Cover for accidental operation prevention of emergency stop switch (for GT16 Handy GOT)	—	—	—	—	—	—	—	●
GT11H-50ESCOV		Cover for accidental operation prevention of emergency stop switch (for GT11 Handy GOT)	—	—	—	—	—	—	—	●	
Stand	GT15-90STAND	Stand for 15" type	●	●	—	—	—	—	—	—	
	GT15-80STAND	Stand for 12.1" type	●	●	—	—	—	—	—	—

	GT15-A370C12B	1.2m	○	For connection between motion controller CPU (A series, main base) and A7GT-CNB	●	●	—	—	●	—	—		
		GT15-A370C25B			2.5m								
		Small CPU extension cable			GT15-A1SC07B	0.7m	○	For connection between QnAS/AnSCPU/motion controller CPU (A series) and GOT	●	●	—	—	●
GT15-A1SC12B					1.2m								
GT15-A1SC30B					3m								
GT15-A1SC50B					5m								
GT15-A1SC05NB	0.45m												
GT15-A1SC07NB	0.7m												
Small CPU long-distance connection cable	GT15-A1SC30NB	3m	○	For connection between QnAS/AnSCPU and GOT	●	●	—	—	●	—			
	GT15-A1SC50NB	5m											
	GT15-C100EXSS-1	10.6m			○	For long-distance connection between QnAS/AnSCPU/motion controller CPU (A series) and GOT For long-distance connection between A7GT-CNB and GOT	●	●	—	—	●	—	
GT15-C200EXSS-1		20.6m											
GT15-C300EXSS-1	30.6m	○	Set of GT15-EXCNB and GT15-C <sup>□</sup> BS	●	●	—	—	●	—				
	GT15-C07BS			0.7m	○	For connection between GOT and GOT	●	●	—	—	●	—	
GT15-C12BS	1.2m												
GT15-C30BS	3m												
GOT-to-GOT connection cable	GT15-C50BS	5m	○	For connection between GOT and GOT	●	●	—	—	●	—			
	GT15-C100BS	10m											
	GT15-C200BS	20m											
GOT-to-GOT long-distance connection cable	GT15-C300BS	30m	○	For connection between GOT and GOT	●	●	—	—	●	—			
	AQJ2HCPU connection cable	GT15-J2C10B			1m	○	For connection between power supply unit (AQJ2-PW) for AQJ2HCPU and GOT	●	●	—	—	●	—
	A7GT-CNB	—											
Buffer circuit cable	GT15-EXCNB	0.5m	○	Useable as GT15-C <sup>□</sup> EXSS-1 in combination with GT15-C <sup>□</sup> BS	●			●	—	—	●	—	
Ferrite core set for Q bus cable (two-pack)	GT15-QFC	—	○	Ferrite cores for replacing existing GOT-A900 bus cable with bus cable for GOT1000	●	●	—	—	●	—			
Ferrite core set for A bus cable (two-pack)	GT15-AFC	—	○	Ferrite cores for replacing existing GOT-A900 bus cable with bus cable for GOT1000	●	●	—	—	●	—			
RS-422 conversion cable	GT16-C02R4-9S	0.2m	○	For connection between RS-422/485 (connector) of GT16 and RS-422 cable (D-sub 9 pins)	●	—	—	—	—	—	—		
	GT16-C02R4-25S	0.2m		For connection between RS-422/485 (connector) of GT16 and RS-422 cable (D-sub 25 pins)	●	—	—	—	—	—	—		
RS-485 terminal block conversion unit	FA-LTBGTR4CBL05	0.5m	○	RS-485 terminal block conversion unit	●	—	—	—	—	—	—		
	FA-LTBGTR4CBL10	1m		*With cable for connection between RS-422/485 (connector) of GT16 and RS-485 terminal block conversion unit	●	—	—	—	—	—	—		
	FA-LTBGTR4CBL20	2m			●	—	—	—	—	—	—		
QnA/FXCPU direct connection cable Computer link connection cable	GT01-C30R4-25P	3m	—	For connection between QnA/ACPU/motion controller CPU (A series)/FXCPU (D-sub 25-pin connector) and GOT For connection between FA-CNV <sup>□</sup> CBL and GOT For connection between serial communication unit and GOT For connection between AJ65BT-G4-S3 and GOT	●	●	●	●	●	—	●		
	GT01-C100R4-25P	10m											
	GT01-C200R4-25P	20m											
	GT01-C300R4-25P	30m											
	GT10-C30R4-25P	3m											
	GT10-C100R4-25P	10m											
Computer link connection cable	GT10-C200R4-25P	20m	○	For connection between QnA/FXCPU (D-sub 25-pin connector) and GOT For connection between serial communication unit (AJ71QC24(N)-R4) and GOT	—	—	—	—	—	—	●		
	GT10-C300R4-25P	30m											
	GT09-C30R4-6C	3m											
	GT09-C100R4-6C	10m											
	GT09-C200R4-6C	20m											
	GT09-C300R4-6C	30m											
RS-422 cable	GT01-C10R4-8P	1m	○	For connection between FXCPU (MINI-DIN 8-pin connector) and GOT For connection between FXCPU communication function extension board (MINI-DIN 8-pin connector) and GOT	●	●	●	●	●	—	●		
	GT01-C30R4-8P	3m											
	GT01-C100R4-8P	10m											
	GT01-C200R4-8P	20m											
	GT01-C300R4-8P	30m											
	GT10-C10R4-8P	1m											
	FXCPU direct connection cable FX communication function extension board connection cable	GT10-C30R4-8P	3m	○	For connection between FXCPU (MINI-DIN 8-pin connector) and GOT For connection between FXCPU communication function extension board (MINI-DIN 8-pin connector) and GOT	—	—	—	—	—	—	●	
		GT10-C100R4-8P	10m										
		GT10-C200R4-8P	20m										
		GT10-C300R4-8P	30m										
		GT10-C10R4-8P	1m										
		GT10-C30R4-8P	3m										
Connector conversion cable for F930→GT1030 replacement	GT10-C200R4-8PC	1m	—	For connection between FXCPU (MINI-DIN 8-pin connector) and GOT For connection between FXCPU communication function extension board (MINI-DIN 8-pin connector) and GOT	—	—	—	—	—	—	●		
	GT10-C30R4-8PC	3m											
	GT10-C100R4-8PC	10m											
	GT10-C200R4-8PC	20m											
	GT10-C300R4-8PC	30m											
	GT10-C02H-9SC	0.2m											
Q/LCPU direct connection cable Data transfer cable	GT01-C30R2-6P	3m	—	For connection between Q/LCPU and GOT/personal computer (GT SoftGOT1000) (D-sub 9-pin) For connection between personal computer (screen design software) (D-sub 9-pin, female) and GOT (MINI-DIN 6-pin, male) For connection between Q/LCPU and GOT For connection between GOT and GOT	●	●	●	●	●	—	●		
	GT10-C30R2-6P	3m											
	GT11H-C30R2-6P	3m											
	GT11H-C30R2-6P	3m

RS-232 cable	FX communication function extension board connection cable, FX communication function adapter connection cable, Data transfer cable	GT01-C30R2-9S	3m	—	For connection between FXCPU communication function extension board (D-sub 9-pin connector) and GOT/personal computer (GT SoftGOT1000) (D-sub 9-pin) For connection between FXCPU communication function adapter (D-sub 9-pin connector) and GOT For connection between personal computer (screen design software) (D-sub 9-pin, female) and GOT (D-sub 9-pin, female)	●	●	●	●	●	●	●	
		GT01-C30R2-25P	3m			○	For connection between FXCPU communication special adapter (D-sub 25-pin connector) and GOT, personal computer (GT SoftGOT1000) (D-sub 9-pin)	●	●	●	●	●	●
		GT09-C30R2-9P	3m			○	For connection between serial communication unit and GOT For connection between computer link unit and GOT For connection between AJ65BT-R2N and GOT (GT09-C30R2-9P only)	●	●	●	●	●	●
GT09-C30R2-25P	3m	●	●	●	●			●	●	●			
Connector conversion box for Handy GOT	GT16H-CNB-42S	—	—	Converts Handy GOT connector to RJ45 for terminal block, D-sub connector or Ethernet for each signal type	—	—	—	—	—	—	●		
	GT11H-CNB-37S	—	—	Converts D-sub 37-pin connector to terminal block and D-sub 9-pin connector	—	—	—	—	—	—	●		
External connection cable	FA device, power supply and operation switch connection cable	GT16H-C30-42P	3m	—	For connection between connector conversion box and Handy GOT	—	—	—	—	—	—	●	
		GT16H-C60-42P	6m										
		GT16H-C100-42P	10m										
		GT16H-C30-32P	3m										
		GT16H-C50-32P	5m										
		GT16H-C80-32P	8m										
		GT16H-C130-32P	13m										
		GT11H-C30-37P	3m										
	Dedicated cable for CC-Link interface unit	GT11H-C30-37P	6m	—	For connection between FA device connection relay cable and GOT	—	—	—	—	—	—	●	
		GT11H-C100-37P	10m										
		GT11H-C30-32P	3m										
For connection between CC-Link interface unit and Handy GOT	GT11H-C50-32P	5m	—		—	—	—	—	—	—	●		
	GT11H-C80-32P	8m											
	GT11H-C130-32P	13m											
RS-422, power supply and operation switch connection cable	GT11H-C15R4-8P	1.5m	—	For connection between FXCPU and GOT For connection between power supply and operation switches and GOT For connection between A/QnACPU and GOT For connection between power supply and operation switches and GOT	—	—	—	—	—	—	●		
	GT11H-C15R4-25P	1.5m											
	GT11H-C15R2-6P	1.5m											
Barcode reader connection cable	GT10-C02H-6PT9P	0.2m	—	For connection between barcode reader (D-sub 9-pin, male) and GOT (MINI-DIN 6-pin, male) RS-232	—	—	—	—	—	—	●		
	External I/O unit connection conversion cable	GT15-C03HTB			0.3m	○	For connection between GOT1000 (external I/O unit) and GOT-A900 external I/O interface unit connection cable (A8GT-C05TK/A8GT-C30TB/user-fabricated cable)	●	●	—	—	—	—
Analog RGB cable	GT15-C50VG	5m	○	For connection between external monitor, personal computer and vision sensor and GOT	●			●	—	—	—	—	
USB cable	RS-232/USB conversion adapter for data transfer	GT10-RS2TUSB-5S	—	—	For connection between personal computer (USB) and GOT (RS-232) (Adapter and personal computer are connected with GT09-C30USB-5P.)	—	—	—	—	—	●		
	Data transfer cable	GT09-C30USB-5P	3m	○	For connection between personal computer (USB) and GOT (USB mini-B) For connection between QnL/PCPU (USB mini-B) and personal computer (GT SoftGOT1000) For connection between printer and GOT (printer unit)	●	●	—	—	—	—		
Extension USB waterproof cable	GT14-C10EXUSB-4S	1m	—	For extending the USB port of GOT to the control panel	—	—	●	—	—	—	—		
	GT10-C10EXUSB-5S	1m			—	—	—	—	—	—	—	●	

#1 : FA-LTBGTR4CBL□□ is developed by Mitsubishi Electric Engineering Company Limited and sold through your local sales office. The other products listed are developed by Mitsubishi Electric System & Service Co., LTD. and sold through your local sales office.  
 #2 : The applicable connection configuration and cable vary depending on the GOT main unit. For more details, see the GOT1000 Series Handbook and the GOT1000 Series Connection Manual.  
 #3 : Can be used only when together with the Handy GOT connector conversion box.  
 #4 : Can be used only with the GT105□ and GT104□.  
 #5 : Can be used only with the GT1030 and GT1020.  
 #6 : To connect with RS-422/485 interface of GT16 main unit, an RS-422 conversion cable (GT16-C02R4-9S) is required.  
 #7 : Can be used only with the GT16 Handy.  
 #8 : Can be used only with the GT11 Handy.

\*1 : Items listed above are developed by Mitsubishi Electric System & Service Co., LTD., and sold through your local sales office.  
 \*2 : The applicable connection configuration and cable vary depending on the GOT main unit. For more details, see the GOT1000 Series Handbook and the GOT1000 Series Connection Manual.  
 \*3 : RS-422 cables less than 10m and the RS-232 cable less than 3m can be used when the connector conversion box for the Handy GOT is used.  
 \*4 : Can be used only with the GT105 and GT104.  
 \*5 : To connect with RS-422/485 interface of GT16 main unit, an RS-422 conversion cable (GT16-C02R4-9S) is necessary.

Backward compatibility

Project data

**GT Designer/GT Designer2 → GT Works3 compatibility \***  
 Project data created in GT Designer2 can be used in GT Works3.  
 Project data created in GT Designer can be used in GT Works3 after the data is converted by GT Designer2/GT Designer2 Classic.

**GOT900 series → GOT1000 series compatibility \***  
**Using data from the GOT-A900 series**  
 Project data for the GOT-A900 series can be used in the GOT1000 series.  
 For the details, see Technical Bulletin No.GOT-A-0009 "Precautions when Replacing GOT-A900 Series with GOT1000 Series".

**Using data from the GOT-F900 series**  
 Project data for the GOT-F900 series can be used in the GOT1000 series.  
 For the details, see "Replacement Guidance (for GOT1000 Series) - From GOT-F900/A950 Handy Series to GOT1000 Series" (JY997D39301).

\*Some data and functions cannot be used in the GOT1000 series.

Selection of optional units and devices

Using the optional functions listed in the table below may require optional devices or units as shown. Note that the availability of the function or the required optional units and devices may vary depending on the model of the GOT main unit.  
 Functions not listed in the table below may also require a memory card or a USB memory device depending on the application. For details, see "Function list" (page 70 to page 73) and "GT Designer3 Version1 Screen Design Manual."  
 An optional function board or a memory card may be necessary depending on the function version and hardware version of the GOT main unit or available space of the user area.  
 For details, see "Optional function board, memory card (CF card, SD card), and USB memory selection <GT16/GT15/GT14/GT12/GT11>" (page 82 to page 83).

\*1 : Excluding the GT16□-VNB□ and GT1655. \*2 : For the GT15, only the GT1585V and GT1575V are applicable. \*3 : Only XGA and SVGA of the GT16 and GT15 are applicable. \*4 : Excluding QVGA of the GT155□. \*5 : Excluding the GT155□. \*6 : Including the GT11 Handy. \*7 : Not necessary when the data storage drive is the built-in SRAM.

INDEX For Designers For Initial Startup & Operations For Maintenance Personnel GT10 IQ Platform MEL SEC Process Control Specifications, Models, etc.

Optional function board, memory card (CF card, SD card), and USB memory selection <GT16/GT15/GT14/GT12/GT11>

When using the GT16

**Necessary optional function board when using optional functions**  
The following optional function board is necessary when using optional functions

Function	Necessary optional function board
MES interface function	GT16-MESB
Optional function other than the above (Refer to P.84 [Table A])	Not necessary

**Storage memory (ROM) and operation memory (RAM)**

The GOT operates by decompressing the OS and project data, which is stored in the storage memory (ROM), into the operation memory (RAM). Since the GT16 compresses some data before storing it in the storage memory (ROM), the data size becomes larger when decompressed in the operation memory (RAM).  
The GT16 has a 15MB\* built-in flash memory for storage memory (ROM) as a standard feature. The CF card expands the memory capacity if the OS and project data exceeds 15MB\*. The GT16 has a 57MB\* operation memory (RAM) as a standard feature. The operation memory is not extendable.  
The built-in flash memory is for "drive C". The CF card is for "drive A (standard)" or "drive B (extension)."

\* Differs depending on the GOT main unit model.

**Data types, capacities, and CF card selection**

The data types and capacities are as shown in the table below.

Data type	Data capacity
<b>a</b> Extended function OS and optional function OS stored in ROM	Capacity of "GT16(ROM)" in [Table A] on page 84
<b>A</b> Extended function OS and optional function OS decompressed in RAM	Capacity of "GT16(RAM)" in [Table A] on page 84
<b>B</b> Communication driver	Check with [Table B] on page 84.
<b>C</b> Special data	Check with screen design software.
<b>D</b> Project data	Check with screen design software.
<b>E</b> Buffering area	Check with screen design software.

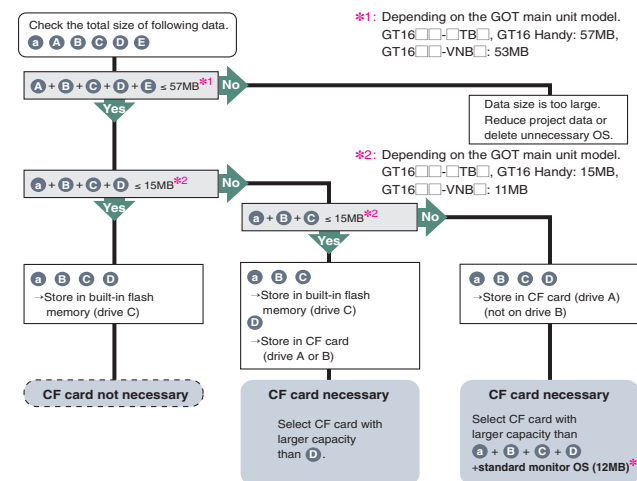

As for the extended function OS and optional function OS, when decompressing the compressed data **a** in the storage memory (ROM) to the operation memory (RAM), the data size becomes larger as shown in **A**.  
The buffering area **E** is an area for storing resource data for the functions such as logging and advanced alarms. It uses the operation memory (RAM). The data size differs depending on the setting.

When the file save mode is specified in the screen design software, the accumulated resource data is stored in the designated storage (drive A or B). (The storage memory (ROM) is not used.)

If the size of data decompressed on the operation memory (RAM) exceeds 57MB\*<sup>1</sup>, it is necessary to reduce, for instance, the project data size or delete unnecessary OS components.

Necessity and capacity of the CF card depends on the data size. Determine the necessity and capacity of the CF card according to the following flow chart.

\*<sup>1</sup>: Depending on the GOT main unit model. GT16: [Table A], GT16 Handy: 57MB, GT16-VNB: 53MB  
\*<sup>2</sup>: Depending on the GOT main unit model. GT16: [Table A], GT16 Handy: 15MB, GT16-VNB: 11MB

**CF card and USB memory capacities**

The CF card and USB memory capacities are as follows. FAT16 format: max. 2GB, FAT32 format: max. 32GB. (Boot OS and standard monitor OS of GT Designer3 Ver.1.17T or later must be installed in order to use a CF card or USB memory with a capacity exceeding 2GB. Such CF cards and USB memories cannot be used with GT Works2 / GT Designer2.)

When using the GT15

**Necessary optional function board when using optional functions**  
The following optional function board is necessary when using optional functions

Function	Necessary optional function board	
MES interface function	GT15-MESB48M	
SFC monitor function Motion SFC monitor function	GT15-QFNB_M or GT15-MESB48M	
Multi-channel function Document display function MELSEC-Q/L/QnA ladder monitor function	GT15-QFNB (M) or GT15-MESB48M	
Optional function other than the above (Refer to P.84 [Table A])	GT15 function version D or later	Built in the GOT main unit (It is necessary to install the standard monitor OS on the GOT by using GT Designer2 Version 2.55H or later).
	GT15 function version C or earlier	GT15 (-Q) FNB (M) or GT15-MESB48M

**Storage memory (ROM) and operation memory (RAM)**

The GOT operates by decompressing the OS and project data, which is stored in the storage memory (ROM), into the operation memory (RAM). The GT15 has a 9MB\* memory for the storage memory (ROM) and the operation memory (RAM) as a standard feature. When the OS or the project data exceeds 9MB\*, use a CF card and an optional function board with expansion memory (GT15-QFNB\_M or GT15-MESB48M) to increase the memory capacity.  
The built-in flash memory is for "drive C". The CF card is for "drive A (standard)" or "drive B (extension)."

\* Differs depending on the GOT main unit model. GT15: [Table A], GT15-VNB: 5MB

**Data types, capacities, and selection of CF card and optional function board**

The data types and capacities are as shown in the table below.

Data type	Data capacity
<b>A</b> Extended function OS, optional function OS	Capacity of "GT15" in [Table A] on page 84
<b>B</b> Second communication driver and onwards	150KB for each
<b>C</b> Special data	Check with screen design software.
<b>D</b> Project data	Check with screen design software.
<b>E</b> Buffering area	Check with screen design software.

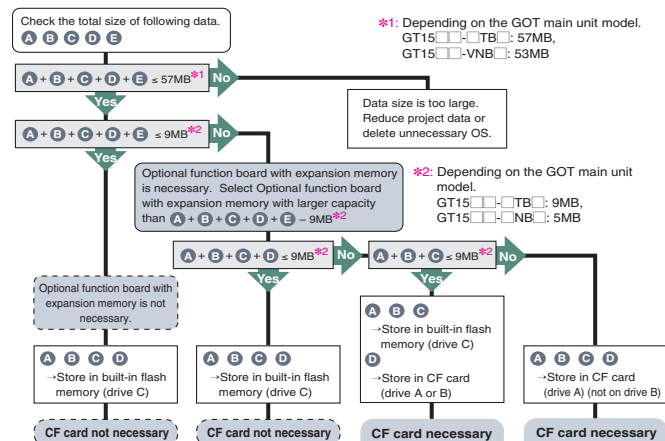

The buffering area **E** is an area for storing resource data for the functions such as logging and advanced alarms. It uses the operation memory (RAM). The data size differs depending on the setting.

When the file save mode is specified in the screen design software, the accumulated resource data is stored in the designated storage (drive A or B). (The storage memory (ROM) is not used.)

If the size of data decompressed on the operation memory (RAM) exceeds 57MB\*<sup>1</sup>, it is necessary to reduce, for instance, the project data size or delete unnecessary OS components.

Necessity and capacity of the optional function board with expansion memory and the CF card depends on the data size. Determine the necessity and capacity of the optional function board with expansion memory and the CF card according to the following flow chart.

\*<sup>1</sup>: Depending on the GOT main unit model. GT15: [Table A], GT15 Handy: 57MB, GT15-VNB: 53MB  
\*<sup>2</sup>: Depending on the GOT main unit model. GT15: [Table A], GT15 Handy: 9MB, GT15-VNB: 5MB

**CF card capacities**

The CF card capacities are as follows. FAT16 format: max. 2GB, FAT32 format: not usable

When using the GT14

**Necessary optional function board when using optional functions**  
No optional function board is required when using the optional functions or extended functions. Some functions, however, may require a SD card due to OS installation. See below for details.

**Storage memory (ROM) and operation memory (RAM)**

The GOT operates by decompressing the OS and project data, which is stored in the storage memory (ROM), into the operation memory (RAM). Since the GT14 compresses some data before storing it in the storage memory (ROM), the data size becomes larger when decompressed in the operation memory (RAM).  
The GT14 has a built-in flash memory (9MB for project data, 5MB for optional functions) for storage memory (ROM) as a standard feature. The SD card expands the memory capacity if the OS and project data exceeds 5MB.  
The GT14 has a 20MB operation memory (RAM) as a standard feature. The operation memory is not extendable.  
The built-in flash memory is for "drive C". The SD card is for "drive A (standard)".

**Data types, capacities, and SD card selection**

The data types and capacities to store in the GOT are as shown in the table below.

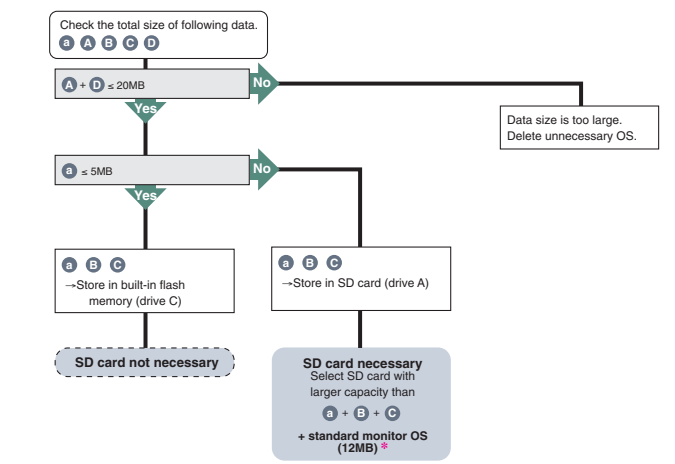

Data type	Data capacity
<b>a</b> Extended function OS and optional function OS stored in ROM	Capacity of "GT14(ROM)" in [Table A] on page 84
<b>A</b> Extended function OS and optional function OS decompressed in RAM	Capacity of "GT14(RAM)" in [Table A] on page 84
<b>B</b> Communication driver	Check with [Table B] on page 84.
<b>C</b> Project data	Check with screen design software
<b>D</b> Buffering area	Check with screen design software

As for the extended function OS and optional function OS, when decompressing the compressed data **a** in the storage memory (ROM) to the operation memory (RAM), the data size becomes larger as shown in **A**.  
The buffering area **D** is an area for storing resource data for the functions such as logging and advanced alarms. It uses the operation memory (RAM). The data size differs depending on the setting.

When the file save mode is specified in the screen design software, the accumulated resource data is stored in the designated storage (drive A or D). (The storage memory (ROM) is not used.)  
If the size of data decompressed on the operation memory (RAM) exceeds 20MB, it is necessary to reduce, for instance, the project data size or delete unnecessary OS components.

Necessity and capacity of the SD card depends on the data size. Determine the necessity and capacity of the SD card according to the following flow chart.

\*: When storing the extended function OS and optional function OS in the SD card (drive A), the standard monitor OS (standard monitor OS, standard font, etc.) needs to be stored in the SD card (drive A).

**SD card and USB memory capacities**

The SD card and USB memory capacities are as follows. FAT16 format: max. 2GB, FAT32 format: max. 32GB.

When using the GT11

**Necessary optional function board when using optional functions**  
The following optional function board is necessary when using the optional functions in [Table A] in page 84.

GOT type	Necessary optional function board
GT115-Q-BDQ, GT115-Q-BDA, GT115-QTBD, GT115-Q-BD (hardware version C or later), GT115-Q-BD (hardware version B or later)	Built in the GOT main unit
GT11 other than the above	GT11-50FNB

When using the GT12

**Necessary optional function board when using optional functions**  
No optional function board is required when using the optional functions or extended functions. Some functions, however, may require a CF card due to OS installation. See below for details.

**Storage memory (ROM) and operation memory (RAM)**

The GOT operates by decompressing the OS and project data, which is stored in the storage memory (ROM), into the operation memory (RAM). The GT12 has a 9MB built-in flash memory for storage memory (ROM) as a standard feature. The CF card expands the memory capacity if the OS and project data exceeds 9MB. Up to 6MB of project data can be stored in the storage memory (ROM) or a CF card. When storing the project data to the storage memory (ROM), the maximum size of the project data may be less than 6MB depending on the data size of the extended function OS, optional function OS, and communication drivers.  
The GT12 has a 12MB operation memory (RAM) as a standard feature. The operation memory is not extendable.  
The extended function OS, optional function OS, and communication drivers occupy 6MB of the operation memory (RAM). The remaining 6MB of the operation memory (RAM) is used for the project data and the buffering area.

The built-in flash memory is for "drive C". The CF card is for "drive A (standard)".

**Data types, capacities, and CF card selection**

The data types and capacities are as shown in the table below.

Data type	Data capacity
<b>a</b> Extended function OS and optional function OS stored in ROM	Capacity of "GT12(ROM)" in [Table A] on page 84
<b>A</b> Extended function OS and optional function OS decompressed in RAM	Capacity of "GT12(RAM)" in [Table A] on page 84
<b>B</b> Communication driver	Check with [Table B] on page 84.
<b>D</b> Project data	Check with screen design software.
<b>E</b> Buffering area	Check with screen design software.

As for the extended function OS and optional function OS, when decompressing the compressed data **a** in the storage memory (ROM) to the operation memory (RAM), the data size becomes larger as shown in **A**.

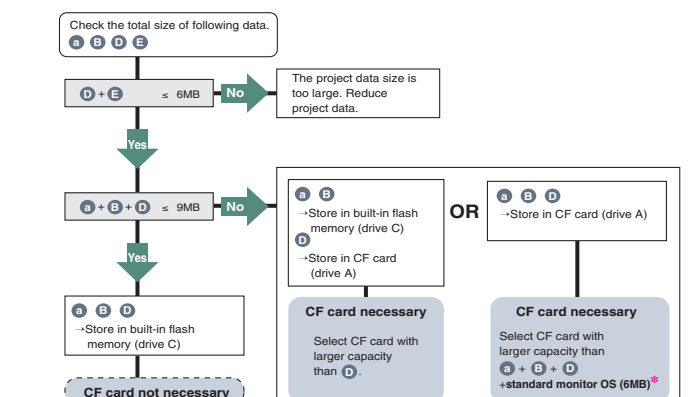

Up to 6MB of the operation memory (RAM) can be used for the total of the data **A** and the data **E**.

The buffering area **E** is an area for storing resource data for the functions such as logging and advanced alarms. It uses the operation memory (RAM). The data size differs depending on the setting.

When the file save mode is specified in the screen design software, the accumulated resource data is stored in the designated storage (drive A). (The storage memory (ROM) is not used.)  
Up to 6MB of the operation memory (RAM) can be used for the total of the project data **D** and the buffering area **E**. If the total data size exceeds 6MB, it is necessary to reduce, for instance, the project data size or delete unnecessary OS.

Necessity and capacity of the CF card depends on the data size. Determine the necessity and capacity of the CF card according to the following flow chart.

\*: When storing the extended function OS and optional function OS in the CF card (drive A), the standard monitor OS (standard monitor OS, standard font, etc.) needs to be stored in the CF card (drive A).

**CF card capacities**

The CF card capacities are as follows. FAT16 format: max. 2GB, FAT32 format: not usable

**CF card capacities**

The CF card capacities are as follows. FAT16 format: max. 2GB, FAT32 format: not usable

MELSOFT GT Works3 (English version) operating environment

Item	Description																																						
Personal computer	PC/AT compatible machine on which the following OS operates																																						
OS (English, Simplified Chinese, Traditional Chinese, Korean, German versions)	Microsoft® Windows® 7 (64bit/32bit) (Enterprise, Ultimate, Professional, Home Premium, Starter) Microsoft® Windows Vista® (32bit) (Enterprise, Ultimate, Business, Home Premium, Home Basic) Microsoft® Windows® XP Service Pack2 or later (32bit) (Professional, Home Edition) Microsoft® Windows® 2000 Professional Service Pack4																																						
CPU	1GHz or more recommended

\*1 : Use GT Simulator3, GX Developer, GX Simulator, and GX Works2 of the same language version.  
\*2 : The GOT-A900 cannot be simulated.  
\*3 : May be required when the simulation function is used.

[Cautions]  
•The software installation and the GOT-A900 simulation require administrator authority.  
•Using GT Works3 application requires an account with higher privileges than the standard user in Windows® 7 and Windows Vista®.  
•To use GT Works3 alongside another application in Windows® 7 and Windows Vista®, use an administrator account to run it if an administrator account is used to run the other application.  
•The following functions are not supported in Windows® 7, Windows Vista®, or Windows® XP.  
Running Applications in Windows® Compatibility Mode, Fast User Switching, Desktop Theme (Font Size) Change, Remote Desktop, DPI Setting other than 100%.  
•Windows XP Mode, Windows Touch features are not supported in Windows® 7.

GT SoftGOT1000 Version3 (English version) operating environment

Item	Description	
	With DOS/V personal computer	With PC CPU module
Personal computer	PC/AT compatible machine on which the following OS operates	CONTEC PC CPU unit (PPC-852-212, PPC-852-217, PPC-852-226) *3
OS (English, Simplified Chinese, Traditional Chinese, Korean, German versions)	Microsoft® Windows® 7 (64bit/32bit) (Enterprise, Ultimate, Professional, Home Premium, Starter) Microsoft® Windows Vista® (32bit) (Enterprise, Ultimate, Business, Home Premium, Home Basic) Microsoft® Windows® XP Service Pack2 or later (32bit) (Professional, Home Edition, Embedded *4) Microsoft® Windows® 2000 Professional Service Pack4	
CPU	1GHz or more recommended	
Required memory	Microsoft® Windows® 7, Microsoft® Windows Vista®: 1GB or more recommended Microsoft® Windows® XP, Microsoft® Windows® 2000: 512MB or more recommended	
Display	Resolution VGA (640 x 480 dots) or more	
Available hard disk space*1	For installation: 2GB or more recommended For execution: 512MB or more recommended	
Display colors	High Color (16 bits) or more	
Hardware*2	GT15-SGTKEY-U (License key (for USB port)) GT15-SGTKEY-P (License key (for parallel port))	GT15-SGTKEY-U (License key (for USB port))
Software	When creating or editing project data : GT Designer3 *5 When using with PX Developer : PX Developer Version 1.14Q or later (PX Developer Version 1.31H or later when using the security level change)	
Others	Mouse, keyboard, printer, CD-ROM drive (for installation only), sound function (sound card), speaker used with the above OS	

\*1 : Use of GT Designer3 and PX Developer requires additional memory space. For free space required when using the PX Developer monitoring tool, refer to the PX Developer Version1 Operation Manual (Monitor Tool). Additional memory space is also required when using user-created applications.  
\*2 : The PC must be equipped with a USB port to use the GT15-SGTKEY-U.  
The PC must be equipped with a parallel port (Centro/printer connector) to use the GT15-SGTKEY-P.  
\*3 : For CONTEC PC CPU unit, refer to the manual for the PC CPU module.  
\*4 : Use is possible only when PPC-852-226 is preinstalled.  
\*5 : GT Designer3 and GT SoftGOT1000 must be installed from the same GT Works3 suite.

[Cautions]  
•The software installation and the GOT-A900 simulation require administrator authority.  
•Using GT Works3 application requires an account with higher privileges than the standard user in Windows® 7 and Windows Vista®.  
•To use GT Works3 alongside another application in Windows® 7 and Windows Vista®, use an administrator account to run it if an administrator account is used to run the other application.  
•The following functions are not supported in Windows® 7, Windows Vista®, or Windows® XP.  
Running Applications in Windows® Compatibility Mode, Fast User Switching, Desktop Theme (Font Size) Change, Remote Desktop, DPI Setting other than 100%.  
•Windows XP Mode, Windows Touch features are not supported in Windows® 7.

Please confirm the following product warranty details before using this product.

Gratis Warranty Term and Gratis Warranty Range

If any faults or defects (hereinafter "Failure") found to be the responsibility of Mitsubishi occurs during use of the product within the gratis warranty term, the product shall be repaired at no cost via the sales representative or Mitsubishi Service Company.

However, if repairs are required onsite at domestic or overseas location, expenses to send an engineer will be solely at the customer's discretion. Mitsubishi shall not be held responsible for any re-commissioning, maintenance, or testing on-site that involves replacement of the failed module.

Gratis Warranty Term

The gratis warranty term of the product shall be for thirty-six (36) months after the date of purchase or delivery to a designated place.

Note that after manufacture and shipment from Mitsubishi, the maximum distribution period shall be six (6) months, and the longest gratis warranty term after manufacturing shall be forty-two (42) months. The gratis warranty term of repair parts shall not exceed the gratis warranty term before repairs.

Gratis Warranty Range

- The customer shall be responsible for the primary failure diagnosis unless otherwise specified.  
If requested by the customer, Mitsubishi Electric Corporation or its representative firm may carry out the primary failure diagnosis at the customer's expense. The primary failure diagnosis will, however, be free of charge should the cause of failure be attributable to Mitsubishi Electric Corporation.
- The range shall be limited to normal use within the usage state, usage methods, usage environment, etc. which follow the conditions, precautions, etc. given in the instruction manual, user's manual, caution labels on the product, etc.
- Even within the gratis warranty term, repairs shall be charged for in the following cases.
  - Failure occurring from inappropriate storage or handling, carelessness or negligence by the user. Failure caused by the user's hardware or software design.
  - Failure caused by unapproved modifications, etc., to the product by the user.
  - When the Mitsubishi product is assembled into a user's device, Failure that could have been avoided if functions or structures, judged as necessary in the legal safety measures the user's device is subject to or as necessary by industry standards, had been provided.
  - Failure that could have been avoided if consumable parts designated in the user's manual etc. had been correctly serviced or replaced.
  - Replacing consumable parts such as the battery, backlight and fuses.
  - Failure caused by external irresistible forces such as fires or abnormal voltages, and Failure caused by force majeure such as earthquakes, lightning, wind and water damage.
  - Failure caused by reasons unpredictable by scientific technology standards at time of shipment from Mitsubishi.
  - Any other failure found not to be the responsibility of Mitsubishi or that admitted not to be so by the user.

Onerous repair term after discontinuation of production

- Mitsubishi shall accept onerous product repairs for seven (7) years after production of the product is discontinued. Discontinuation of production shall be notified with Mitsubishi Technical Bulletins, etc.
- Product supply (including repair parts) is not available after production is discontinued.

Overseas service

Overseas, repairs shall be accepted by Mitsubishi's local overseas FA Center. Note that the repair conditions at each FA Center may differ.

Exclusion of loss in opportunity and secondary loss from warranty liability

Regardless of the gratis warranty term, Mitsubishi shall not be liable for compensation to damages caused by any cause found not to be the responsibility of Mitsubishi, loss in opportunity, lost profits incurred to the user by Failures of Mitsubishi products, special damages and secondary damages whether foreseeable or not, compensation for accidents, and compensation for damages to products other than Mitsubishi products, replacement by the user, maintenance of on-site equipment, start-up test run and other tasks.

Changes in product specifications

The specifications given in the catalogs, manuals or technical documents are subject to change without prior notice.

Product application

- In using the Mitsubishi graphic operation terminal, the usage conditions shall be that the application will not lead to a major accident even if any problem or fault should occur in the graphic operation terminal device, and that backup and fail-safe functions are systematically provided outside of the device for any problem or fault.
- The Mitsubishi graphic operation terminal has been designed and manufactured for applications in general industries, etc. Thus, applications in which the public could be affected such as in nuclear power plants and other power plants operated by respective power companies, and applications in which a special quality assurance system is required, such as for Railway companies or Public service purposes shall be excluded from the graphic operation terminal applications. In addition, applications in which human life or property that could be greatly affected, such as in aircraft, medical applications, incineration and fuel devices, manned transportation equipment for recreation and amusement, and safety devices, shall also be excluded from the graphic operation terminal range of applications. However, in certain cases, some applications may be possible, providing the user consults the local Mitsubishi representative outlining the special requirements of the project, and providing that all parties concerned agree to the special circumstances, solely at our discretion. In some of these cases, however, Mitsubishi Electric Corporation may consider the possibility of an application, provided that the customer notifies Mitsubishi Electric Corporation of the intention, the application is clearly defined and any special quality is not required.

## "Mitsubishi Global FA Centers" are located around the world in Asia, North America and Europe to provide optimum services.

### ● Global FA Centers

#### ◎ Shanghai FA Center

MITSUBISHI ELECTRIC AUTOMATION (CHINA) LTD. Shanghai FA Center  
10F, Mitsubishi Electric Automation Center, No.1386  
Hongqiao Road, Changning District, Shanghai, China  
Tel: +86-21-2322-3030 / Fax: +86-21-2322-3000 (9611#)

#### ◎ Beijing FA Center

MITSUBISHI ELECTRIC AUTOMATION (CHINA) LTD. Beijing FA Center  
Unit 908, Office Tower 1, Henderson Centre, 18  
Jianguomennei Avenue, Dongcheng District, Beijing, China  
Tel: +86-10-6518-8830 / Fax: +86-10-6518-3907

#### ◎ Tianjin FA Center

MITSUBISHI ELECTRIC AUTOMATION (CHINA) LTD. Tianjin FA Center  
Room 2003 City Building, No.35, Youyi Road, Hexi  
District, Tianjin, China  
Tel: +86-22-2813-1015 / Fax: +86-22-2813-1017

#### ◎ Guangzhou FA Center

MITSUBISHI ELECTRIC AUTOMATION (CHINA) LTD. Guangzhou FA Center  
Room 1609, North Tower, The Hub Center, No.1068,  
Xingang East Road, Haizhu District, Guangzhou, China  
Tel: +86-20-8923-6730 / Fax: +86-20-8923-6715

#### ◎ Korean FA Center

MITSUBISHI ELECTRIC AUTOMATION KOREA CO., LTD., (Service)  
B1F, 2F, 1480-6, Gayang-Dong, Gangseo-Gu, Seoul,  
157-200, Korea  
Tel: +82-2-3660-9632 / Fax: +82-2-3663-0475

#### ◎ Taiwan FA Center

SETSUYO ENTERPRISE CO., LTD.  
3F., No.105, Wugong 3rd Road, Wugu District,  
New Taipei City 24889, Taiwan, R.O.C.  
Tel: +886-2-2299-9917 / Fax: +886-2-2299-9963

#### ◎ ASEAN FA Center

MITSUBISHI ELECTRIC ASIA PTE. LTD.  
ASEAN Factory Automation Centre  
307 Alexandra Road, Mitsubishi Electric Building, Singapore 159943  
Tel: +65-6470-2480 / Fax: +65-6476-7439

#### ◎ India FA Center

MITSUBISHI ELECTRIC INDIA PVT. LTD. India Factory Automation Centre  
2nd Floor, Tower A & B, Cyber Greens, DLF Cyber City,  
DLF Phase-III, Gurgaon-122002, Haryana, India  
Tel: +91-124-463-0300 / Fax: +91-124-463-0399

#### ◎ Thailand FA Center

MITSUBISHI ELECTRIC AUTOMATION (THAILAND) CO., LTD.  
Bang-Chan Industrial Estate No.111 Soi Serithai 54,  
T.Kannayao, A.Kannayao, Bangkok 10230, Thailand  
Tel: +66-2906-3238 / Fax: +66-2906-3239

#### ◎ North American FA Center

MITSUBISHI ELECTRIC AUTOMATION, INC.  
500 Corporate Woods Parkway, Vernon Hills, IL 60061,  
U.S.A.  
Tel: +1-847-478-2100 / Fax: +1-847-478-2253

#### ◎ Brazil FA Center

MELCO-TEC Representacao Comercial e  
Assessoria Tecnica Ltda.  
Av. Paulista, 1439, cj74, Bela Vista, Sao Paulo  
CEP: 01311-200 - SP Brazil  
Tel: +55-11-3146-2200 / Fax: +55-11-3146-2217

#### ◎ European FA Center

MITSUBISHI ELECTRIC EUROPE B.V. Polish Branch  
32-083 Balice ul. Krakowska 50, Poland  
Tel: +48-12-630-47-00 / Fax: +48-12-630-47-01

#### ◎ German FA Center

MITSUBISHI ELECTRIC EUROPE B.V. German Branch  
Gothaer Strasse 8, D-40880 Ratingen, Germany  
Tel: +49-2102-486-0 / Fax: +49-2102-486-1120

#### ◎ UK FA Center

MITSUBISHI ELECTRIC EUROPE B.V. UK Branch.  
Travellers Lane, Hatfield, Hertfordshire, AL10 8XB, U.K.  
Tel: +44-1707-28-8780 / Fax: +44-1707-27-8695

#### ◎ Czech Republic FA Center

MITSUBISHI ELECTRIC EUROPE B.V. -o.s. Czech Office  
Avenir Business Park, Radicka 751/113e, 158 00  
Praha5, Czech Republic  
Tel: +420-251-551-470 / Fax: +420-251-551-471

#### ◎ Russian FA Center

MITSUBISHI ELECTRIC EUROPE B.V. Russian Branch  
St. Petersburg Office  
Piskarevsky pr. 2, bld 2, lit "Sch", BC "Benua", office 720;  
195027, St. Petersburg, Russia  
Tel: +7-812-633-3497 / Fax: +7-812-633-3499

## MEMO

## ISO9001 and ISO14001 certified.

All of Mitsubishi Electric's FA component products have acquired the international quality assurance "ISO9001" and the environment management system standard "ISO14001" certification.

## Mitsubishi's products comply with various standards and laws.

Mitsubishi's products also comply with various safety standards including UL standards, shipping standards, and radio laws.

### <Safety Standards>

Mark	Standards/Agency	Country/Region
CE	EN Standards	Europe
UL	UL Standards	United States
cUL	Canadian Standards Association (CSA)	Canada

### <Radio Laws>

Mark	Law	Country
KC	Korea Radio Waves Act	Korea

For the details on the approval model within each standards, please contact your local sales office.

### <Shipping Standards>

Abbrev.	Certification Organization	Country
ABS	American Bureau of Shipping	United States
BV	Bureau Veritas	France

# Mitsubishi Graphic Operation Terminal

## Precautions for Choosing the Products

This catalog explains the typical features and functions of the GOT1000 series HMI and does not provide restrictions and other information on usage and module combinations.

When using the products, always read the user's manuals of the products.

Mitsubishi will not be held liable for damage caused by factors found not to be the cause of Mitsubishi; machine damage or lost profits caused by faults in the Mitsubishi products; damage, secondary damage, accident compensation caused by special factors unpredictable by Mitsubishi; damages to products other than Mitsubishi products; and to other duties.

## For safe use

- To use the products given in this catalog properly, always read the related manuals before starting to use them.
- The products within this catalog have been manufactured as general-purpose parts for general industries and have not been designed or manufactured to be incorporated into any devices or systems used in purpose related to human life.
- Before using any product for special purposes such as nuclear power, electric power, aerospace, medicine or passenger movement vehicles, consult with Mitsubishi.
- The products within this catalog have been manufactured under strict quality control. However, when installing the product where major accidents or losses could occur if the product fails, install appropriate backup or failsafe functions in the system.
