

# ETHERNET TCP/IP Fieldbus Coupler

**10/100 Mbit/s; digital and analog signals**

This fieldbus coupler connects the WAGO-I/O-SYSTEM as a slave to the ETHERNET fieldbus.

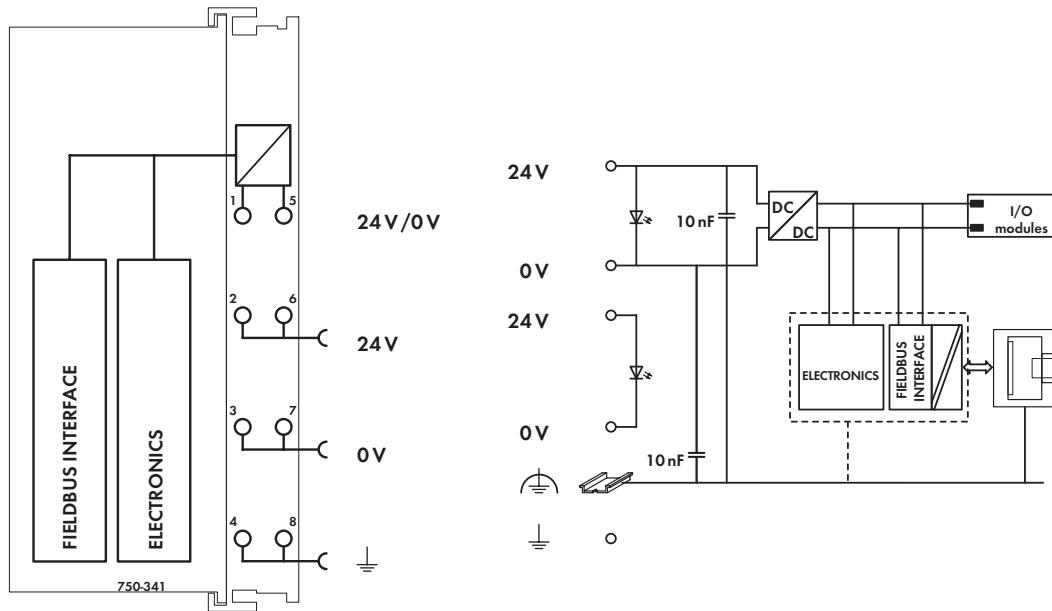

The fieldbus coupler is capable of supporting all I/O modules. The buscoupler automatically configures, creating a local process image which may include analog, digital or specialty modules. Analog and specialty data is sent via words and/or bytes. Digital data is sent bit by bit.

This buscoupler is suitable for data rates of 10MBit/s and 100MBit/s.

The buscoupler offers many different application protocols which can be used for data acquisition or control (MODBUS, ETHERNET /IP) or for system managing and diagnostics (HTTP, BootP, DHCP, DNS, SNTP, FTP and SNMP).

HTML pages can be placed on an internal server for use in Web-based applications.
