

Angle sensor 424A

The angle sensor 424A is used for measuring angles between 30° and 120°. The 424A is based on the contactless Hall measurement principle, which is extremely reliable and ensures a long service life. Due to high protection class IP67, the sensor can be used reliably even under tough environmental conditions. Owing to their robustness, the sensors are particularly suitable for measuring the angular positions of rotating elements under extreme environmental conditions, e.g. on mobile machinery, in cranes, excavators, ships, mobile and stationary waste compactors, valve controllers, robot technology and wind turbines or in large medical devices.

Product characteristics

- Long lifetime and extremely reliable from contactless measurement with Hall principle
- Angle measurement range between 30° and 120°
- IP67 protection class for harsh environmental conditions
- Operating temperature range from -40 °C to +85 °C
- Resolution 0.1°
- Various current or voltage output signals
- Infinitely short-circuit proof
- Available together with actuation lever for simple connection
- EMV stable for the motor vehicle sector, field withstand 200 V/m
- Ball bearing (optionally with plain bearing)

ORDERING KEY

424A...					Angle sensor 120°, magnetic
					Bearing
	1				Ball bearing
					Output signal 1 / signal sequence
		1A			4...20mA / CCW
		6A			0.5...4.5V, ratiometric / CCW
		7A			0.5...4.5V / CCW
					Angle measuring range
			030		30°
			045		45°
			060		60°
			090		90°
			120		120°
					Operating lever
				B	Yes
				-	No (if selected without lever, this position is omitted)

Optional

Output signal 1

1...5V

Other output signals, signal sequences and angle rates on request
